AIDX SURVEY

(Presented by IATA)

SUMMARY

This paper provides a brief on IATA's AIDX industry survey.

1. INTRODUCTION

1.1 The Aviation Information Data Exchange (AIDX) is the global XML messaging standard for exchanging flight data between airlines, airports, and any third party consuming operational data.

1.2 AIDX is endorsed as a standard by:

- IATA Recommended Practice 1797A
- ACI Recommended Practice 501A07
- ATA Recommended Practice 30.201A

1.3 The current release of AIDX is a standard for SESAR A-CDM information exchange, ACI ACRIS A-CDM Web Services and supported as the data exchange standard for A-CDM by ICAO (ICAO A-CDM Implementation Plan, Asia Pacific).

1.4 For more information about the AIDX please visit:

2. DISCUSSION

2.1 The AIDX Working Group develops and maintains the AIDX messaging standard to support the efficient and effective exchange of operational flight data across the aviation industry. Adoption of this industry data standards deliver substantial benefits to all stakeholders involved.

2.2 The Group comprises airlines, airports, IT Service providers, vendors and industry associations. Members may be involved in operational areas, architecting IT solutions, or responsible for maintaining Data Standards within their organizations.

2.3 In our continuing efforts to serve the industry better, IATA is undertaking this survey (<https://www.surveymonkey.com/r/AIDX>) to better understand where the AIDX standard is used

around the world, by which industry players, and for which business scope. The outcome will help IATA to define the work plan of the AIDX Group, as well as to develop and enhance the AIDX Standard for the benefit of the aviation industry.

2.4 The survey shall not take more than 10 minutes to be completed. Your support and cooperation are greatly appreciated.

2.5 The closing day for the survey is **30 April 2022**.

2.6 For any questions about the AIDX Standard, the AIDX Group, or about this survey, please contact the AIDX Group Secretary at AIDX@iata.org
