NOKIA

We create technology that helps the world act together.

As a trusted partner for critical networks, we are committed to innovation and technology leadership across mobile, fixed and cloud networks. We create value with intellectual property and long-term research, led by the award-winning Nokia Bell Labs. Adhering to the highest standards of integrity and security, we help build the capabilities needed for a more productive, sustainable and inclusive world. ANSP communications network transformation simply can't wait. But what to do with legacy systems, and how to migrate while ensuring critical safety? It's a question Nokia answers every day all over the world with our industry leading mission-critical IP/MPLS ground-ground network solution. Its unique features let you seamlessly support your time-tested legacy services with assured quality of service, high availability, security and resiliency while introducing cutting-edge capabilities.
