ATFM/A-CDM Integration Webinar

12th September 2022 (1000 Hrs to 1300 Hrs ICT)

Objective: The webinar is intended to gain from the States experienced in the implementation of A-CDM and ATFM and assist States in developing implementation plans and strategies for A-CDM integration with ATFM. The webinar will focus on the integration process, needs, challenges and accruing benefits to the aviation community. The topic of presentation could cover information such as ANSP's experiences/strategies in integration of ATFM and A-CDM, Airspace users' expectations to enhance the flight predictability and CDM process, the roles of stakeholders (ANSP, Airspace User, Airports, Regulator etc.), technical/procedural/operational challenges, benefits and future developments.
