Agenda Item 8: Review AIDC Implementation Issues Reported and Discuss Recommended Solutions

**AIDC Implementation Issue Report**

(Presented by India, Indonesia and Singapore)

**SUMMARY**

This paper presents the AIDC implementation issues reported by members States/Administrations. The aim of this information sharing is to become a lesson learned for other members States/Administrations and trying to find solutions for these issues.

**1. INTRODUCTION**

1.1. As a continuation of the APAC AIDC Implementation Issues in ATMAS TF/3. The update issues will continue report by this meeting.

1.2. In accordance with the result of the APA TF/5 (2019) meetings in the Appendix C to the Report – List of Action Items for Asia/Pacific AIDC Task Force – All members States/Administrations are encouraged to provide identified ISSUES for sharing and learning by filling in the AIDC Issues Form.

1.3. During APA TF/5, the resolutions methodology against to the reported issues were suggested in three categories:

- Issues pertaining to Communication Infrastructure and Interfacing equipage:  
Various issues related to latency, outage and time-out are related to communication infrastructure and should be jointly addressed by the respective States.
- Issues pertaining to ATM system parameters and Application Software:  
These issues require States/Administrations to coordinate with the vendors, except in term of modifying system parameters are sufficient to be able to resolve the issues.
- Issues pertaining to Design Procedures, SOP, Operator's Training:  
These issues are internal to the States/Administrations concerned and should be addressed by the respective States.

**2. DISCUSSION**

**AIDC Issues Category**

2.1 In accordance with the AIDC implementation issues form, the predetermined Fault Category are as follows:

- a) Communication Link;
- b) ATM System;
- c) AIDC Message;
- d) Airspace Design/Procedures;
- e) Other.

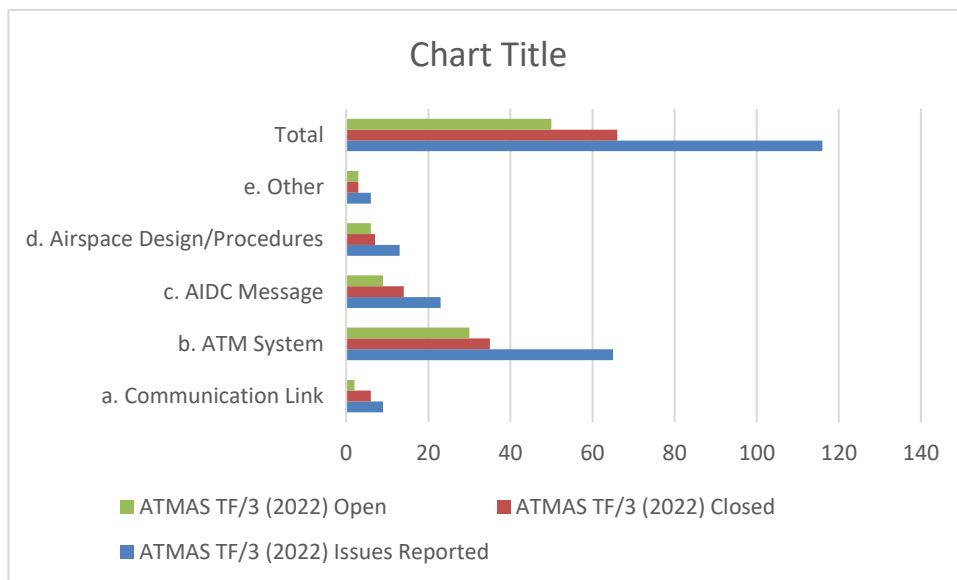

**AIDC Issues Reported**

2.2 The last ATMAS TF (ATMAS TF/3) the number of AIDC implementation issues reported by members States/ Administration, based on fault category are as shown in a table and chart:

*Table 1. AIDC Issues reported by ATMAS TF/3*

Fault Categories	ATMAS TF/3 (2022)

e. Other	6	3	3
<b>Total</b>	<b>116</b>	<b>66</b>	<b>50</b>

*Chart 1. AIDC Implementation Issues Chart by ATMAS TF/3*

2.3 There is no new reported AIDC implementation issues are provided in the **ATMAS TF/4**. update AIDC implementation issues are reported from India (17 reports) and Singapore (2 reports). Indonesia and Vietnam informed that there is no issue arise during the ATMAS TF/3 to ATMAS TF/4 period. All reported AIDC implementation issues are provided in the **Attachment A** to this paper.

2.4 The number of AIDC implementation issues reported by members States/ Administration, based on fault category are as shown in a table and chart:

2.5 Contributing countries in sharing of AIDC implementation issues up to ATMAS TF/4, are Australia, India, Indonesia, Malaysia, Maldives, Singapore and Philippines. All members States/Administrations are encouraged to contribute by reporting their AIDC implementation issues, if any.

**AIDC Issues Summaries and Solutions**

2.6 Issues pertaining to Communication Infrastructure and Interfacing Equipage reported in detail as follows:

- a) 6 cases of latency occurred among ACCs in India and with its adjacent ACC. These issues are still Opened, and being taken up by communication provider.
- b) 2 cases reported by Singapore; message time out parameter set too short whereby ACP messages from downstream ATSU were not processed, and link outage. The status of these issues is Closed.
- c) 1 case occurred between Ujung Pandang ACC and Brisbane ACC. It happened occasionally; the transmission has a transit time more than 180 seconds; Closed/by communication provider.

2.7 Issues pertaining to ATM system parameters and Application Software occurred in the most of contributing countries.

- a) 6 cases reported by Australia (Brisbane ACC and Melbourne ACC). The status is still recorded as Open, since 2016. Some update noted in action taken by Australia.
- b) Issues reported by India:
  - ID on ODF3 is not per ICD; Closed/*more information by contributor, if any.*
  - Error message 61 (CRC Error) caused by extra space in the ABI message; Open/need join observation by Delhi ACC and Lahore ACC.
  - Aircon2100 not support truncation indicator; Open/need software upgrade.
  - Unexpected CDN message sending; Open/*more information by contributor, if any.*
  - Chennai reported The SSR Codes received through AIDC message are getting retained in Chennai FDPS for days and are not available for re-use. Controllers must use Chennai adapted pool of limited SSR codes for track correlation. As a result, the adapted Chennai pool of SSR codes gets exhausted very soon. AIDC testing is suspended. Closed/*more information by contributor, if any.*
  - Some HMI Issues reported at Ahmedabad, and Nagpur. Closed/*more information by contributor, if any.*
  - Some new Issues from India on ATM system need more information regarding Action Taken. Open/*more information by contributor, if any.*
- c) Issues reported by Indonesia (Ujung Pandang ACC):
  - No ULAM notification; Closed/by software upgrade.
  - Received ODF3 issues from KK ACC & MNL ACC; Closed/by software upgrade in KK & MNL.
  - Received unexpected EST from BNE ACC; Closed/by modifying dataset in BNE.
  - Received false MAC from BNE ACC; Closed/by modifying dataset in BNE.
  - No response of LAM/LRM. After investigation was done, the cause of the problem was unstable connection in Jakarta AMHS; Closed/by communication provider.
  - False route in ABI message from MNL ACC; Closed/by software upgrade in KK.
  - Occasionally sending multiple EST to Manila; Closed/by modifying dataset parameter.
  - ACP reception indicator does not appear in the electronic strip; Open/need software upgrade in UPG.

- REJ message from OAK ACC and KK ACC could not be processed; Open/need software upgrade in UPG.
- d) Issues reported by Malaysia:
- Received LRM on ABI (item 18/RMK); Closed/*more information by contributor, if any.*
  - Unexpected CDN message sending; Closed/by modifying dataset in KL.
  - LRM from Chennai against ABI and EST from KL; Open/*more information by contributor and request clarification from Chennai, if any.*
  - LRM transmitted in response to AOC received from Chennai; Open/*more information by contributor and request clarification from Chennai, if any.*
  - Calculated CRC was not tally with received CRC from Chennai; Open/*more information by contributor and request clarification from Chennai, if any.*
  - Chennai transmitted second EST or ACP after complete process cycle of first EST; Open/*more information by contributor and request clarification from Chennai, if any.*
  - Singapore transmitted second EST after complete process cycle of first EST; Closed/*more information by contributor, if any.*
  - Bangkok transmitted second EST after complete process cycle of first EST; Open/*more information by contributor and request clarification from Bangkok, if any.*
  - Kota Kinabalu and Singapore Delayed in transmitting auto EST and No ACP received. Open/*more information by contributor, if any.*
- e) Issues reported by Maldives:
- Conflict SSR code on ABI message with SSR Colombo domestic; Closed/by modifying dataset in Colombo.
  - ODF3 issue; Closed/by software upgrade.
  - Unformatted Lat/Long in the item 15; Closed/by software upgrade.
  - ABI and CPL rejected due ICAO FPL 2012 format; Closed/by software upgrade.
- f) Issues reported by Philippines (Manila ACC):
- No AIDC transfer was made due negative FPL; Closed/provide appropriate FPL entry.
  - No EST transfer for some flights; Closed/correcting time discrepancies on system FPL.
  - No EST and TOC message was received; Closed/provide appropriate FPL entry and correcting time discrepancies on system FPL.
  - Failed EST due ACT entry time outside window; Closed/correcting time discrepancies on system FPL.
  - Received multiple ABI from KK ACC; Open/need further investigation by KK.
- g) Issues reported by Singapore:
- Rejection ABI due to unknown point; Closed/by updating dataset in ATM system.
  - Not reception of EST messages; Closed/*more information by contributor, if any.*
  - AOC/TOC message transmission constraint; Closed/by modifying dataset in MNL.
  - Invalid EST sent by ATM system; Closed/by modifying dataset.

- Multiple FDRs exist, unable to complete AIDC transaction; Closed/ensure FPL records in ATMS is up to date.
- Message not compatible with FP state; Closed/ensure FPL state is updated correctly.
- ACT entry time outside window; Close/ATMS parameter reconfiguration/software change.

2.8 Issues pertaining to AIDC Messages reported need more coordination between ACC's and investigation in the ATM system Capabilities.

2.9 Issues pertaining to Design Procedures, SOP, Operator's Training reported in detail as follows:

a) India reported:

- Airspace configuration issue; Closed/*more information by contributor, if any.*
- Dynamic sectorization of UTV between Chennai and Trivandrum; Open/*more information by contributor, if any*
- Under trial phase, the acceptance of EST message is in manual mode; Open/*more information by contributor, if any.*

b) Indonesia reported that Ujung Pandang activated flight data record prior to AIDC EST message transmitted by Manila. This occurrence happened when Ujung and Manila verbally coordinate flight level, which not in accordance with FLAS (Flight Level Allocation Scheme); Closed/by published an operational implementation AIDC LOCA.

c) Malaysia reported:

- Chennai did not respond or late response to CDN from KL; Open/need to evaluate the application of LOCA and SOP in respective ACCs.
- Singapore transmitted TOC/AOC which is not included in operational implementation; Open/*more information by contributor, if any.*
- Bangkok transmitted TOC, AOC and MAC which is not included in operational implementation; Open/*more information by contributor, if any.*
- Bangkok transmitted EST with incorrect COP due to incorrect FPL route from airline operator; Open/*more information by contributor, if any.*

d) Singapore reported that there was the rejected EST message due to invalid flight plan state (coordinated) were queued in erroneous folder; Closed/by creating SOP in the ATC Support Officer to handle this case.

2.10 Issues pertaining to others reported need to update the LoA and more observation by the contributing reported.

2.11 Due to the limited explanation contained in the report, it should be considered to provide an opportunity to get further clarification in this meeting, if there are other countries that need to elaborate the issues.

### **3. ACTION BY THE MEETING**

3.1 The meeting is invited to:

- a) note the information contained in this papers;

- b) update and elaborate the AIDC implementation issues above, including resolution has been taken, if any;
- c) discuss any relevant matter as appropriate; and
- d) encourage all States/Administration to continue report the AIDC implementation issues.
