Chinney Alliance Engineering Limited ("CAE")

Chinney Alliance Engineering Limited ("CAE") was established in 1973 and has grown into one of the most important international distributors in Hong Kong. CAE's products include a wide range of leading edge engineering products and services covering electrical, mechanical, electronic, and information technology systems for large scale infrastructure, architectural and civil engineering projects throughout Hong Kong. In recent years, CAE has actively and successfully represented major global aviation brands for navigation, communications and surveillance solutions in tenders for airports in Hong Kong and China. In addition, CAE provides sales channels for mature Chinese brands to enter world market: for example, in the area of large-scale cargo inspection systems, narcotics, explosives and contraband detectors to customs and security authorities in Hong Kong and Australia.

FREQUENTIS

Frequentis leads the way in open, integrated solutions for safety-critical industries. Helping 400 ATM customers in 150 countries safely transport 95% of the world's passengers, Frequentis offers secure digital technology for efficient airspace management in towers, centres, airports as well as between countries. As technology partner to the CRV network provider PCCW Global, Frequentis enables CRV subscribers to increase performance, optimise traffic and minimise their carbon footprint for a safer, more secure and sustainable air traffic in the APAC region.
