

International Civil Aviation Organization**Twenty Seventh Meeting of the Communications/
Navigation and Surveillance Sub-group (CNS SG/27)
of APANPIRG**

Bangkok, Thailand, 28 August – 01 September 2023

Agenda Item 5: Aeronautical Mobile Communications Service and Aeronautical
electromagnetic spectrum utilization

PROGRESS ON VHF COM FREQUENCY ALLOTMENT PLAN FOR APAC REGION

(Presented by China)

SUMMARY

This paper presents the latest actions taken for VHF COM Frequency Allotment Plan for APAC Region, include the statistical analyses of the actual usage of frequencies in the APAC Region, and suggested to simplify the APAC Frequency Allotment Plan by converging the various allotments of “sub services” to the main service.

1. INTRODUCTION

1.1 Annex 10, Volume V, Chapter 4 contains a general allotment of the frequency band 117.975–137 MHz, which is allocated by the ITU to the Aeronautical Mobile (R) Service. The main subdivisions of this band are the frequency bands allocated to both international and national services and frequency bands solely allocated to national services. Specific allotments to services are to be determined regionally.

1.2 For all ICAO Regions allotment plans have been developed. These allotment plans subdivide the frequency band 117.975 – 137 MHz into sub bands that are to be used for certain aeronautical applications or services such as TWR, ACC, APP, VOLMET etc. These allotment plans are part of the ICAO Regional Air Navigation Plan.

1.3 Currently, the VHF COM frequency coordination and registration in APAC region is supported by ICAO tool Frequency Finder (FF). The tool is updated to implement the planning principle of Doc 9718 Volume II (Second Edition, 2022) as well as the VHF COM Frequency Allotment Plan for APAC which is provided in Doc 9718 Volume II as APP B-2.

1.4 Simulations of future spectrum requirements have shown that certain allotments in the current allotment plan are prone to becoming saturated while other allotments are under-utilized and can provide space for accommodating new requirements. In addition, some proposals by States/ Administrations were identified to fall into the Not allotted part of the VHF COM Frequency Allotment Plan for APAC.

1.5 The Seventh Meeting of the Spectrum Review Working Group (SRWG/7) held in 2023 reconsidered on VHF COM Frequency Allotment Plan for APAC Region. Subsequently the SRWG/7 agreed to form an ad hoc expert group with China as the rapporteur and Mr. Robert Witzgen as Advisor, to study the allotment plan, analyze the actual usage of allotment registered in FF, identify areas for improvement and to propose solutions (technical and administrative), explore the potential in reallocating sub-bands/pools, survey the use of the frequency for Traffic Information Broadcasts by Aircraft (TIBA).

2. DISCUSSION

2.1 On the basis of FF database, the Chinese team analyzed what services each frequency was used for and how many times it was reused in band 117.975–137 MHz, as follows:

It was noticed that each frequency was being used by other services in addition to the service of the VHF COM Frequency Allotment Plan.

2.2 An internal Aeronautical Spectrum Seminar initiated from China was held in Chengdu, China, from July 4 to 12, 2023, and Mr. Robert Witzgen was invited to participate. The seminar undertook a detailed review of the Frequency Allotment Plan for the APAC region which concentrated on the following sub-bands.

122.000 – 123.675 MHz (bandwidth 1.675 MHz).

Although this frequency band is not allotted to any service, ICAO is undertaking the frequency coordination for this band. The ICAO COM list 3 includes 830 frequency assignments in this band for a large variety of ATC services.

The seminar did not develop specific proposals for introducing allotment(s) in this band but this can be further explored in preparation towards the next ICAO SRWG meeting.

128.900 – 132.025 MHz (bandwidth 3.125 MHz).

This band is allotted to AOC in the APAC Region, and the number of frequency assignments for each frequency for AOC purposes was only 701. This number was compared with the number of frequency assignments in Europe which in a smaller frequency band (131.400 – 131.975 MHz) accommodates 2919 frequency assignments.

The seminar agreed that it may be used as a basis for further work on determining a reduction of the AOC band. This would allow for other services for which the current allocation frequency bands has resulted in some form of congestion.

136.000 – 137.000 MHz (bandwidth 1 MHz).

This band is allotted to VDL in the APAC Region. It was noted that the frequency band 136.000 – 137.000 MHz is only used for 24 frequency assignments of which 21 are for the VDL Mode 2 Common Signalling Channel 136.975 MHz.

The seminar agreed that it would be beneficial to support efficient frequency assignment planning to concentrate in this band frequency assignments for VDL. A suggestion was to have a closer look at how the EUR Region is handling VDL frequency assignments in this congested area.

2.3 The seminar agreed on a proposal to simplify the VHF COM Frequency Allotment Plan for APAC Region by converging the various allotments to “sub services” to the main service. E.g.,

allotments to APP-L, APP-I, APP-U would be replaced with an allotment to APP. It can be more flexibility when States/ Administrations coordinate/assign for a new or modified frequency. The revised APAC Frequency Allotment Plan is provided in **Appendix A**.

Note: This simplification would require modifications to Frequency Finder. ICAO HQ is expected to prepare this.

2.4 These works are planned to be further reviewed and discussed in next SRWG meeting in 2024.

3. ACTION BY THE MEETING

3.1 The meeting is invited to:

- a) note the information contained in this paper; and
- b) discuss any relevant matter as appropriate

APAC Frequency Allotment Plan
