Agenda Item 4: AMHS/AFTN routing issues and coordination with ATS Messaging Management Centre (AMC)

APAC AMHS IMPLEMENTATION STATUS FROM AMC

(Presented by the Thailand)

SUMMARY

This paper presents the AMHS Implementation status Information in Asia/Pacific Region updated in AMC.

1. INTRODUCTION

1.1 ATS Messaging Management Centre (AMC) is implemented by EUROCONTROL to provide off-line network management services in support of the ground ATS Messaging network of Air Navigation Service Providers (ANSPs). The key functions of the AMC are address management and routing management. It integrates the Aeronautical Fixed Telecommunications Network (AFTN), the Common ICAO Data Interchange Network (CIDIN) and the ATS Message Handling System (AMHS) to transparently deliver operational ATS Messages on a global basis.

1.2 Thailand, by AEROTHAI on behalf of the Asia/Pacific COM Centres perform as the regional focal point to update the AFTN/AMHS information via AMC website based on the AIRAC cycle.

2. DISCUSSION

2.1 Following the AMHS connections updated in AMC (OPER 247) on 3 May 2023, the information is as in **Attachment A**. The AMC round 248 has been cancelled due to technical failure. The next round for AMC data update will be AMC round 249 on 18 May.

2.2 All AFTN/AMHS connections updated will be effected to the Communication Chart in AMC.

3. ACTION BY THE MEETING

3.1 The meeting is invited to:

- a) note the information in this paper;
- b) review and update information to AMC via AEROTHAI if necessary, including points of contact; and
- c) discuss any relevant matter as appropriate.
