### Lacle Aviation Consultants

Lacle Aviation Consultants was established by a group of consulting engineers having previously worked for a major international ANSP for many years. Lacle is an independent specialist CNS/ATM engineering consultancy specialising in issues related to airport safeguarding, covering height restrictions, CNS/ATM equipment and flight operations. Other than these core capabilities, the company has experts in airspace and airport design, ATM procedures and operations, plus airport capacity/demand balancing and environmental studies.

Based here in Hong Kong, the team has grown from the 5 founding members to 12 in the 4 years the company has been operating and collectively has over 200 man-years of experience. They have an extensive track record having already completed more than 80 studies in a wide range of topics. They have current projects in Australia, the Philippines, Thailand and Singapore in addition to their long-term commitments in supporting the expansion of Hong Kong International Airport.

## VariFlight

As a leading provider of air travel services and digital technology solutions, VariFlight possesses nearly 20 years of civil aviation expertise. We have always been committed to efficiency promoting and value adding for the industry through advanced technologies.

Leveraging the power of smart IT solutions and digital services, we help airports, airlines and ANSPs to improve operational efficiency, whilst we also offer intelligent travel data applications for enterprises, passengers and the broader community.

Furthermore, VariFlight operates a number of platforms for civil aviation data analysis (CADAS), air passenger service evaluation (CAPSE), the professional trade information portal (CARNOC), plus a number of joint labs and research agencies with industry-leading partners.

At VariFlight, we always strive to enhance a more efficient and safer air travel world with digital and intelligent expertise in addition to create a more punctual ecosystem.
