ICAO USOAP CMA AND AGA FINDINGS

(Presented by the Secretariat)

SUMMARY

This paper provides APAC average AGA EI scores derived from the USOAP – CMA online framework and USOAP CMA Audit common findings in AGA Area.

1. INTRODUCTION

1.1 The USOAP CMA aimed at assessing Contracting States' capabilities to ensure an effective oversight of the aviation systems through the implementation of the eight critical elements of a safety oversight system. These critical elements include in particular:

The "Establishment CEs":

Critical Element (CE) 1 – Primary aviation legislation

Critical Element (CE) 2 – Specific operating regulations

Critical Element (CE) 3 – State system and functions

Critical Element (CE) 4 – Qualified technical personnel

Critical Element (CE) 5 – Technical guidance, tools and provision of safety-critical information

The "Implementation CEs":

Critical Element (CE) 6 – Licensing, certification, authorization and approval obligations

Critical Element (CE) 7 – Surveillance obligations

Critical Element (CE) 8 – Resolution of safety issues

1.2 The USOAP CMA focused on eight audit areas as follows:

- 1) Primary aviation legislation and specific operating regulations (LEG);
- 2) Civil aviation organization (ORG);
- 3) Personnel licensing and training (PEL);
- 4) Aircraft operations (OPS);
- 5) Airworthiness of aircraft (AIR);
- 6) Aircraft accident and incident investigation (AIG);

- 7) Air navigation services (ANS); and
- 8) Aerodromes and ground aids (AGA)

Note: State Safety Programme (SSP) as a new audit area will be added and announced in due course for its applicability.

1.3 ICAO launched the third edition of the *Safety Oversight Manual (Doc 9734), Part A — The Establishment and Management of a State Safety Oversight System*. It is expected that this manual will assist States in establishing and implementing their safety oversight systems.

1.4 The *Universal Safety Oversight Audit Programme Continuous Monitoring Manual (Doc 9735)* provides detailed information about USOAP CMA, specifically the policy, procedures and guidance on the management and conduct of programme activities under the CMA. The Doc 9735 is available at <https://soa.icao.int/USOAPLibrary/Library.aspx>.

2. DISCUSSION

ICAO USOAP CMA activities in APAC States in 2024

2.1 The USOAP CMA Activity Plan, which is issued as an Electronic Bulletin and posted on ICAO-NET twice a year, lists the scheduled USOAP CMA activities and can be accessed at ICAO secure portal (<https://soa.icao.int/USOAPLibrary/Library.aspx>). ICAO Electronic Bulletin (EB) 2025/2 dated 21 January 2025 is provided in **Attachment A**.

2.2 States are selected for CMA audits and ICVMs based on various factors, including risk indicators, previous audit results, deferrals, the level of activities in the State and progress made by States in resolving identified deficiencies. ICAO also conducts ICVMs for States with a Significant Safety Concern (SSC), once sufficient information is received indicating that the SSC has been resolved.

2.3 Each year, ICAO also carries out a number of off-site validation activities for States which have satisfactorily addressed certain findings (mostly related to Critical Elements 1 to 5) in the relevant audit areas.

2.4 In 2024, two audits and one ICVM conducted and USOAP CMA audit for Bangladesh postponed at the request of the State due to the civil unrest.

Dates (2024)	States	
	ICVM	Audit
16 to 30 April 2024		China [Completed]
15 to 27 May 2024		Viet Nam [Completed]
05 to 12 Jun 2024	Pakistan [Completed]	
15 to 27 Oct 2024		Bangladesh [Postponed ¹]

Table 1: USOAP CMA activities conducted in 2024 in APAC States

¹ Postponed at the request of the State and due to the ongoing civil unrest.

2.5 In 2025, the following USOAP CMA Activities will be conducted for following APAC States (see EB 2025/2 dated 21 January 2025 - **Attachment A**):

Dates (2025)	States	
	ICVM	Audit
12 to 24 Mar 2025		Philippines [Postponed]
9 to 16 Apr 2025	Papua New Guinea	
4 to 11 Jun 2025	Cambodia	
11 to 23 Jun 2025		Maldives
9 to 22 Jul 2025		New Zealand
27 Aug to 8 Sep 2025		Thailand

2.8 It is noted that there is some improvement in EI score (APAC average AGA EI and its corresponding CEs) in 2025 compared to EI data for June 2021 thanks to outstanding performance by China, Pakistan and Viet Nam in USOAP Audit/ICVM in 2024.

2.9 EIs in AGA Area derived from iSTARS4 USOAP Data Table for Asia and Pacific States are provided in **Attachment B** to this Working Paper.

2.10 There are **17 APAC States** [15 APAC States in 2024] with AGA EI Scores more than or equal to 75% as shown in the Table 4 below.

2.11 There are **4 APAC States** [5 APAC States in 2024] with AGA EI Scores more than 60% but less than 75% as shown in the Table 5 below.

Note: As Pakistan has scored EI = 80.16% as a result of the ICVM conducted on 05-12/06/2024, Pakistan has been moved to Table 4 above.

2.12 There are **18 APAC States** [19 APAC States in 2024] with AGA EI Scores less than or equal to 60% as shown in the Table 6 below.

Note: As Viet Nam has scored EI = 83.85% as a result of the CMA Audit conducted on 15-27/05/2024, Viet Nam has been moved to Table 4 above.

Table 6: State's with USOAP EI (less than or equal to 60%) in AGA Area

2.13 As per above analysis conducted by ICAO APAC Office, it was revealed that:

- 1) **18** APAC States have their EI in AGA area less than 60%;
- 2) **4** APAC States have their EI in AGA area more than 60% to less than 75%;
and
- 3) **17** APAC States have their EI in AGA area more than or equal to 75%

Therefore, **22 States** [24 States in 2024] with EI less than 75% would require more resources and efforts to enhance their EI and meet the 75% EI target as set forth in the ICAO Global Aviation Safety Plan (GASP) 2023-2025 (Doc 10004).

USOAP Findings in AGA area

2.14

The most common findings in AGA area are related to:

- outdated primary aviation legislation [CE-1] not reflecting the current civil aviation situation or not establishing a civil aviation authority with the necessary human resources and vested with necessary powers, including for issuing, suspending or cancelling aerodrome certificates;
- the absence of specific operating regulations [CE-2] transposing into national standards from Annex 14 provisions and prescribing the conditions and criteria for the certification of aerodromes;
- the lack of dedicated entity within the CAA [CE-3] tasked with aerodrome regulation and certification, or when this entity exists, inadequate technical staff due to difficulties in attracting and retaining qualified personnel and/or of inadequate technical staff job descriptions not covering all the fields of expertise required for aerodrome certification and continuing surveillance;
- the lack of training programme taking account of technical staff training requirements [CE-4] and defining the various training activities required to access the various levels of aerodrome inspector functions;
- the lack of guidance material [CE-5] intended for aerodrome operators as well as for regulatory technical staff, including the lack of an approved process describing the various steps for the certification of an aerodrome and up-to-date ICAO documentation;
- the lack of an aerodrome inspector's handbook with methodology and procedures for initial audit and continuing surveillance, including checklists in the various disciplines [CE-5] to assist in the conduct of office review of aerodrome manuals and on-site aerodrome inspections;
- the lack of implementation of aerodrome certification and safety management requirements and publication of status of certification of aerodromes in the AIP [CE-6];
- the lack of policy and procedures for accepting non-compliance with established requirements, including risk assessment mechanism and notification procedures [CE-6];
- the lack of surveillance programme and plan for continuing surveillance of certified aerodromes [CE-7] and a methodology to address safety concerns identified during surveillance inspections, and enforcement procedures [CE-8].

State's Actions on USOAP CMA On-line Framework (OLF)

2.15

The following actions are required from States through USOAP CMA OLF:

- a) continuous update of the compliance checklist/EFOD and SAAQ;
- b) submission of the Corrective Action Plans (CAPs) on the USOAP CMA OLF, and inform the ICAO Regional Office when complete and ready for review; and

- c) implementation of the CAPs and complete the self-assessment of the PQs on the OLF, including uploading the evidence documents, to report the progress on the OLF, and inform the ICAO Regional Office when complete and ready for validation.

3. ACTION BY THE MEETING

3.1 The Meeting is invited to note the information contained in this paper and:

- a) urge States/Administrations to take action in accordance with Paragraph 2.15;
 - b) urge States with EI less than 75% to put more resources and efforts to improve EI to meet the 75% of GASP target; and
 - c) encourage States to approach respective COSCAPs, Pacific Aviation Safety Office (PASO) or ICAO APAC Office if State(s) require assistance in their preparation for USOAP CMA activity.

ICAO UNIVERSAL SAFETY OVERSIGHT AUDIT PROGRAMME — ACTIVITY PLAN

1. The International Civil Aviation Organization (ICAO) Universal Safety Oversight Audit Programme (USOAP) Activity Plan, published twice a year and posted on the USOAP Continuous Monitoring Approach (CMA) online framework (<https://www.icao.int/usoap>), lists the completed and planned CMA audits, ICAO Coordinated Validation Missions (ICVMs), off-site validation activities and workshops for the past and current year (see Attachments A and B for details). The activity plan published in January constitutes an update to the activity plan published in June of the previous year. The 2025 activity plan was first published on 4 July 2024 through Electronic Bulletin (EB) 2024/12.
2. States are selected for CMA audits and ICVMs based on various factors, including risk indicators, previous audit results, deferrals, the level of activities in the State and progress made by States in resolving identified deficiencies. ICAO also conducts ICVMs for States with a Significant Safety Concern (SSC), once sufficient information is received indicating that the SSC has been resolved.
3. To support the USOAP CMA objectives, States are strongly urged to accept the dates of a scheduled USOAP activity and to refrain from making deferral requests. Any such requests shall be subject to the provisions of Article 14 of the Memorandum of Understanding (MOU) signed with ICAO regarding the USOAP CMA and of Chapter 3, 3.5.4 of ICAO Doc 9735 (5th Edition — 2023).
4. Each year, ICAO also carries out a number of off-site validation activities (including integrated validation activities) for States which have satisfactorily addressed certain findings in the relevant audit areas.
5. In 2024, 15 CMA audits and 5 ICVMs were completed, along with three off-site validation activities.
6. For 2025, 20 USOAP CMA activities have been scheduled: 16 CMA audits and 4 ICVMs. States interested in receiving a CMA activity (either on-site or off-site), including on a cost-recovery¹ basis for on-site activities, are advised to contact the Deputy Director, Monitoring, Analysis and Coordination, Air Navigation Bureau by email at USOAPInbox@icao.int. Such requests will be considered based on various factors listed in paragraph 2 above, as well as available ICAO resources.

¹ A cost-recovery USOAP CMA activity is paid for by the requesting State and can include audits, validations, etc. (Doc. 9735).

7. In 2024, 5 USOAP CMA workshops were conducted in ICAO Regional Offices and a Member State. For 2025, 2 workshops have been tentatively scheduled.
