

ICAO APAC-AIG/13

Taskforce-6 – Calendar of Regional Events

Presented by

Krystal Scott

Head of International

ATSB

Task Force-6

Task is to improve the communication of activities, meetings, regional workshops/ courses etc via a one-stop calendar of regional events.

Background

- Many APAC Regional States/ Administrations hold events, workshops and courses that would be beneficial for other States to participate in to improve the accident investigation capability in the region.
- Collecting and publishing a calendar of all the events scheduled for the region will improve communication and allow States to be aware of potential training opportunities.

Recommendations

- Every six months, States can provide the details of any upcoming events, workshops and courses that are open to external participation. Information collected will include:
 - Date of event, topic and type of event (training/ workshop/ course), mode of delivery (in-person/virtual), contact details and any associated costs.
- Information collected will then be collated into an annual 12 month rolling calendar and be made available to APAC AIG members.
- The APAC regional office will also contribute other ICAO events to the calendar.

Next Steps

- States will be contacted seeking any events/ training that is being held in 2026.
- The training topics identified in Task 1 will be included.
- Input will then be collated into a calendar and will be circulated to States.

Thank-you
