Introduction

Schedule

09:00 – 17:00

(≥ 17:00: after workshop, questions and answers)

Attendance form

12:30 – 13:30

10:45 – 11:00

15:15 – 15:30

Feedback form

Introduction

Objective of this training

>> Knowledge of procedures related to the transport of DG by air.

>> Procedures for overseeing operations and issuing approvals/exemptions...

- requirements for transport of DG by air;
- focus on lithium batteries
- shipper's and operators' roles, responsibilities and related documentation;
- CAAs' responsibilities;
- how to use safety risks analysis for the transport of DG by air;
- new requirement for DG trainings (CBT).

...while sharing with you the European approach and some best practices

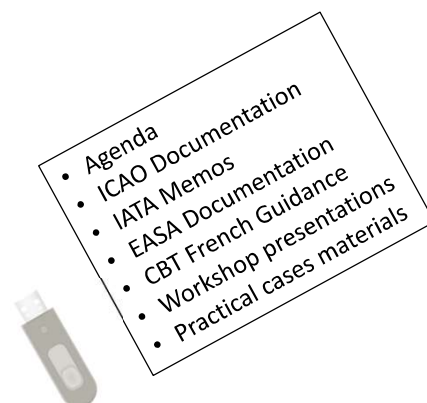

Introduction

Content

- 01 – Introduction about Dangerous Goods
- 02 – Limitations
- 03 – Classification
- 04 – The list of Dangerous Goods
- 05 – Packaging, marking and labelling
- 06 – The transport of lithium batteries
- 07 – Shipper's responsibilities
- 08 – Freight forwarders
- 09 – Operator's responsibilities
- 10 – Expected elements of an OM
- 11 – Safety Risks Analysis
- 12 – Specificities of helicopter operations (optional)
- 13 – CAAs' responsibilities and tasks
- 14 – DG training programs (CBT)

+ practical cases and exercises
