

**22<sup>ND</sup> COSCAP-SEA STEERING COMMITTEE MEETING (SCM/22)**

**(19-20 June 2025, Manila, Philippines)**

**Working Paper 3 (WP/3)**

**Agenda Item 5: Programme Progress Report**

(Presented by the COSCAP-SEA Secretariat)

**EXECUTIVE SUMMARY**

This paper presents the progress achieved in implementing the COSCAP-SEA Programme activities for the period from May 2024 to May 2025.

**Action:** The Steering Committee is invited to review and comment on the progress achieved during the reporting period.

**1. INTRODUCTION**

1.1 This paper presents the progress achieved in implementing the COSCAP-SEA Programme activities during the period from May 2024 to May 2025.

1.2 International travel resumed after COVID-19, and a new CTA/PC joined in July 2023. These developments brought the Programme back to full momentum, with on-site activities actively carried out across Member States.

1.3 Earlier from April 2020, the implementation of COSCAP-SEA Programme activities was significantly impacted by travel restrictions due to the COVID-19 pandemic. During this period, continuity was ensured through virtual platforms. On-site technical missions outside Thailand resumed only in January 2022, with successful completion of five missions along with two hybrid trainings in Thailand and one on-site training.

**2. DISCUSSION**

2.1 The COSCAP-SEA Programme activities are based on the Programme Document objectives, State Assistance Needs Survey, and the Annual Work Plan approved during the annual Steering Committee Meeting and updated periodically with the approval of the COSCAP-SEA Chair.

2.2 The Work Plan has been implemented in coordination with the ICAO APAC Regional Office, other COSCAPs, ICAO ANB/TCB/GAT, and COSCAP-SEA partner States, International Organizations, and Industry partners.

2.3 The Programme aims to enhance the safety and efficiency of air transport in COSCAP-

SEA Member States by fostering coordination, providing targeted assistance, and promoting harmonization. It focuses on strengthening States' safety oversight and safety management capabilities, as well as their effective, sustainable, and resilient compliance with applicable ICAO provisions. Implementation follows a State-centered, risk-based, and results-oriented approach aligned with seven strategic priorities, which reflect ICAO's global and regional objectives.

- **SP1** Identifying and mitigating potential immediate risks for safety,
- **SP2** Effectively fulfilling the State's certification/licensing /approval, surveillance, and enforcement responsibilities,
- **SP3** Identifying and mitigating key emerging risks as well as specific risks related to the COVID-19 pandemic,
- **SP4** Enhancing the State safety oversight system in an effective, sustainable, and resilient manner,
- **SP5** Ensuring the establishment and implementation of an independent and effective accident and serious incident investigation system in each State,
- **SP6** Establishing and implementing effective safety data collection and processing systems, and
- **SP7** Continuously progressing SSP implementation.

2.4 The COSCAP-SEA meetings, missions, and training events are provided in this paper. **Appendix A** provides a copy of the approved 2024–2025 Annual Work Plan for reference. **Appendix B** presents the Programme Progress Summary Report, covering activities undertaken up to May 2025 with references to the corresponding Programme Objectives. **Appendix C** details Member States' participation in COSCAP-SEA capacity-building activities during the same period including the number of participants from each State who attended these events.

2.5 In the reporting period, COSCAP-SEA conducted 11 on-site technical assistance missions with a total of 5 Member States and one Mission to a State in South Asia. In addition, COSCAP-SEA provided 19 training activities to 301 participants, mostly the on-site delivery with the valuable support of the DGAC France, FAA, UK CAA, EASA, Airbus and Boeing.

2.6 COSCAP-SEA Phase V, covering July 2021 to June 2026, was launched following Member States' agreement at the 19th and 20th Steering Committee Meetings and the subsequent signing of the revised Programme Document (Revision F). As Phase V approaches completion, a separate paper, **DP/6**, will be presented to facilitate discussions on the development of the Programme Document for **Phase VI**, should Member States agree to continue the Programme. This will provide an opportunity to build on current achievements and further align with emerging regional and global priorities.

2.7 Further to the 18th COSCAP-SEA Steering Committee Meeting, which requested member States and Safety partners to consider offering experts to work in COSCAP-SEA Programme office, the DGCA of Indonesia kindly extended its secondment of an airworthiness expert on a part-time basis for the second year to continue supporting COSCAP-SEA Programme. More such secondments would be required from able and willing Member States during the year 2025-26.

2.8 As proposed at the 1st Joint Meeting of APAC Region COSCAPs (Nadi, Fiji, 24 October 2018), the three APAC COSCAPs agreed to strengthen collaboration through joint regional training, cross-COSCAP participation in subregional events, and shared use of ICAO COSCAP and

APAC RO experts for technical assistance, USOAP validations, and training. The initiative also promotes pooling of inspectors, instructors, and specialists among Member States and Partners. In line with this, COSCAP-SEA participated in a CAT Mission to the Maldives and has extended both in-person and virtual training opportunities to the other COSCAPs. The details are available at Attachment

2.9 In the spirit of the 1st Joint Meeting of APAC Region COSCAPs and with an intent to enhance sub-regional competency, experts and instructors were taken from other COSCAPs. For example, Bangladesh provided an expert in PEL and AIG, Sri Lanka generously extended support in Aviation medicine and India has agreed to provide an instructor for AIM course.

2.10 During this period, the Programme received generous support from Partners, both through financial contributions and in-kind assistance. Key contributors included the FAA, EASA, UK CAA, DGAC, Boeing, and Airbus.

### 3. CONCLUSION

3.1 COSCAP-SEA completed many activities covering all programme objectives during the reporting period. From May 2024 onwards, COSCAP-SEA, in close coordination with, and with significant support from its Partners, managed to provide capacity building activities using mostly in-person mode.

3.2 A very few of the courses or workshops which could not be conducted will be rescheduled in the proposed Annual Work Plan (2025-26)

3.3 In line with the decisions of the 18th COSCAP-SEA Steering Committee Meeting and the 1st Joint Meeting of APAC Region COSCAPs (Nadi, Fiji, 24 October 2018), Member State CAAs and esteemed Partners are invited to consider the secondment of experts to the COSCAP-SEA Programme, particularly to support on-site assistance activities in Member States.
