NETWORK  
MANAGER

# Agenda

- Views on Frequency Management
- VHF COM usage in the World
- Frequency congestion in Europe
- Audits and Evaluation
  - Principles
  - Automated tool
  - Process

# Frequency Management

**The management of radio frequencies is vital for the safety and efficiency of ATC services**

- Primary objective: Timely provision of suitable frequencies for aeronautical CNS systems
- Frequency Management is a State prerogative but coordination is required at regional level

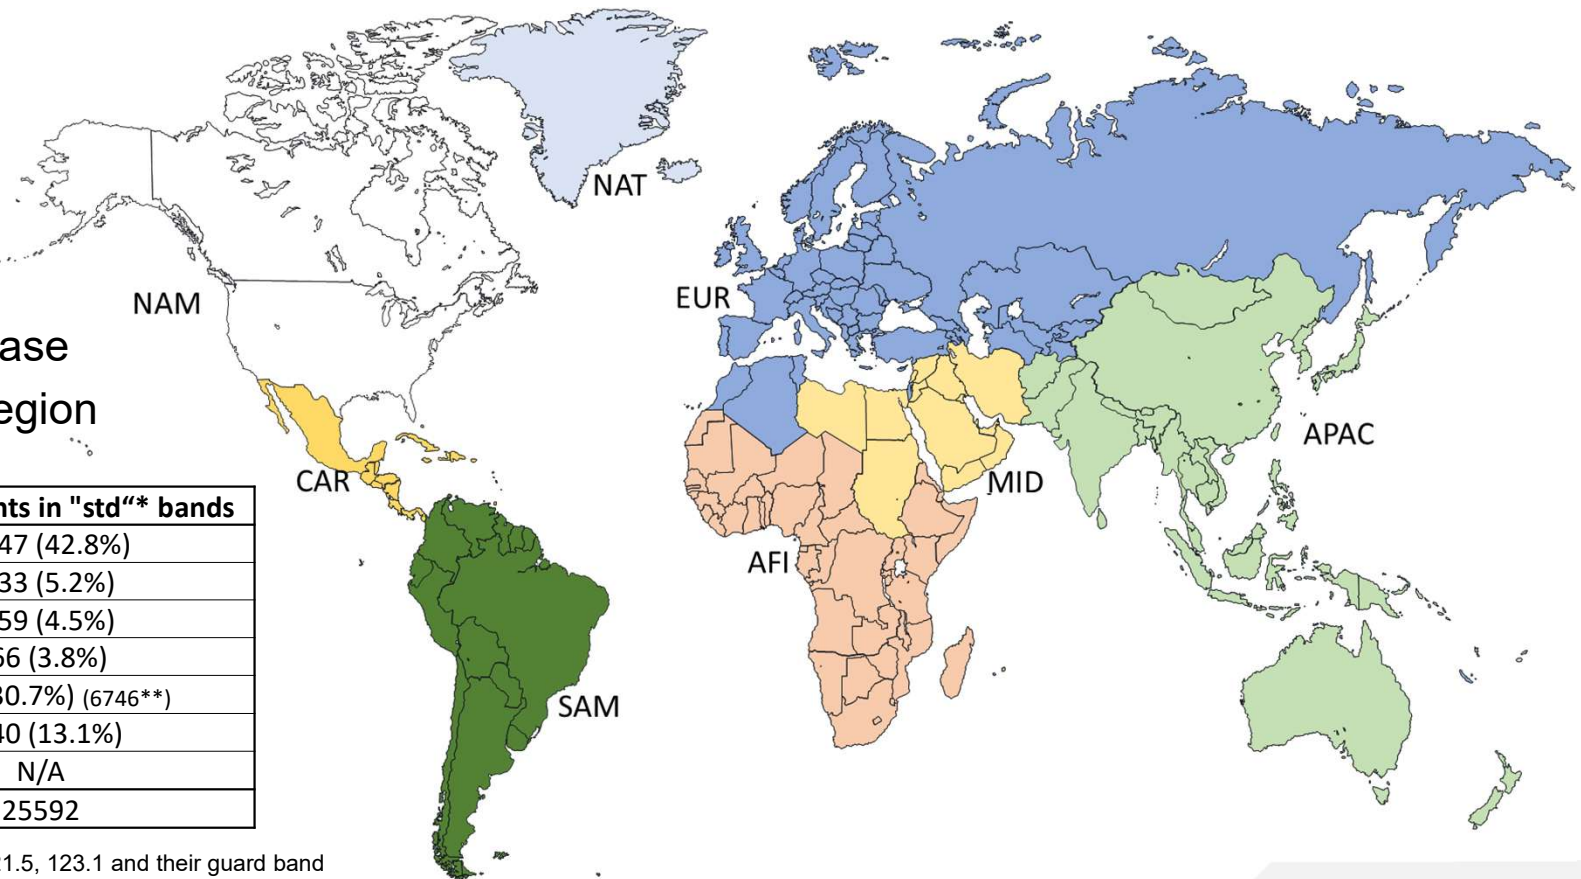

- **DATA**
  - Accuracy
  - Constantly Up to date
  - Operations oriented
- **PROCESS (Procedures)**
  - Coordination
  - Collaboration (States)
- **TOOLS**
  - Calculation
  - Data collection
  - Data analysis

# The ICAO Global Database

- SAFIRE Database
- ICAO Global database
- No Data for NAM region

ICAO Region	# Assignments in "std" bands
EUR/NAT	10947 (42.8%)
MID	1333 (5.2%)
AFI	1159 (4.5%)
CAR	966 (3.8%)
APAC	7847 (30.7%) (6746**)
SAM	3340 (13.1%)
NAM	N/A
Total	25592

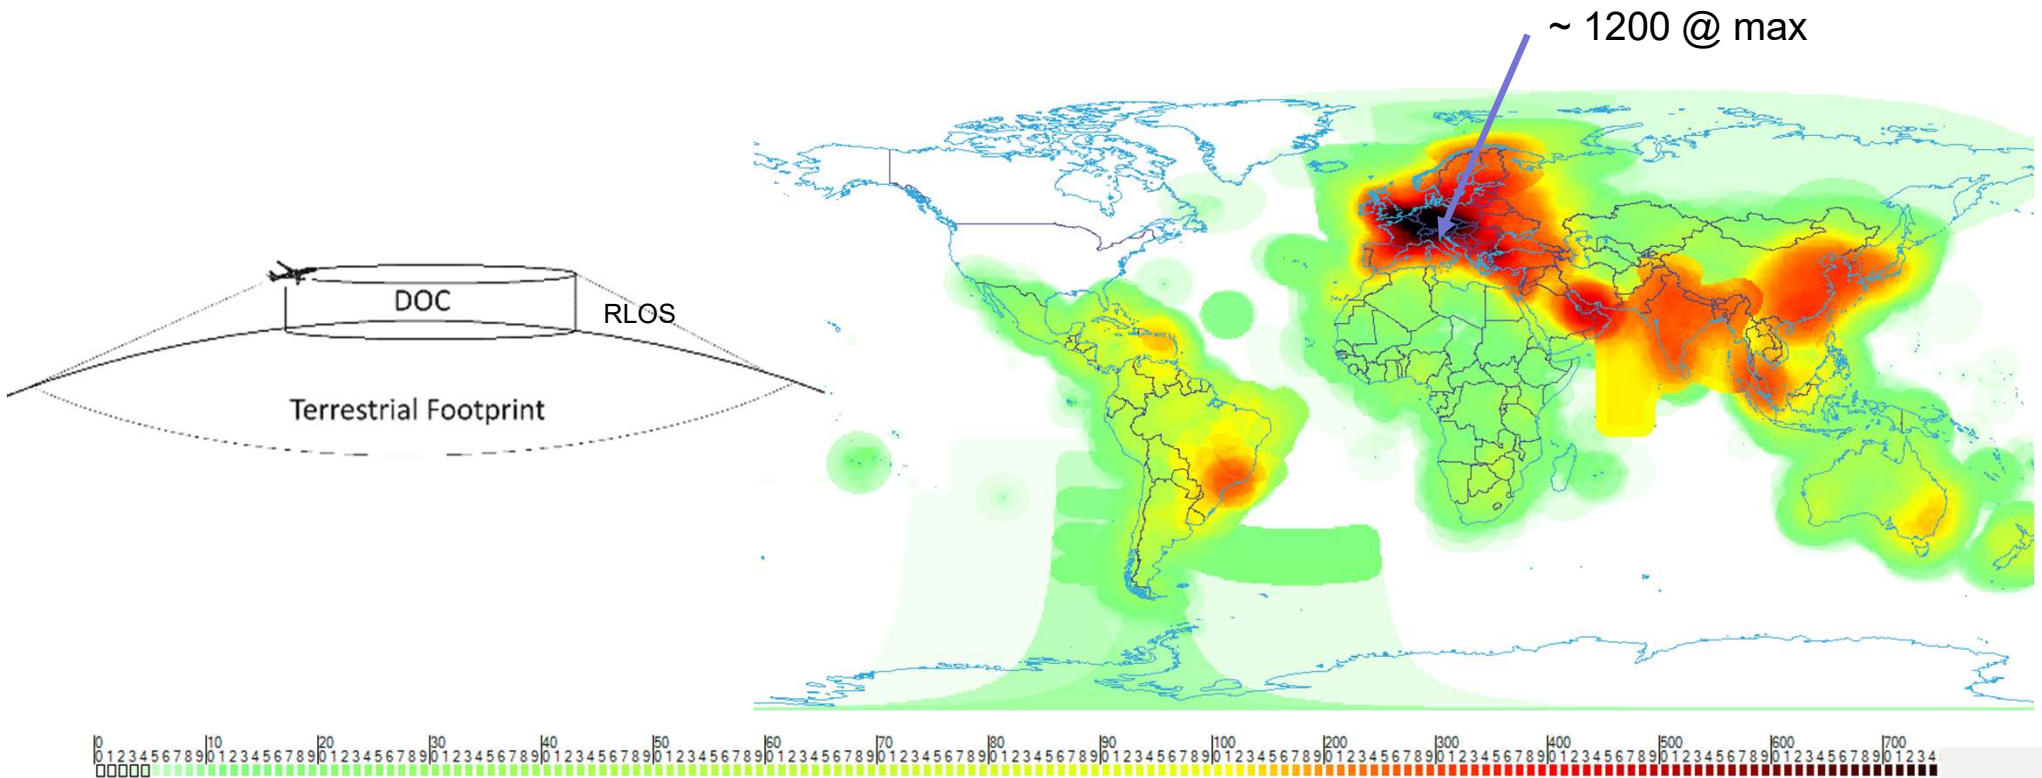

\*Non OPC, AS, DL, special channels as 121.5, 123.1 and their guard band  
 According to EUR region practices

\*\* Taking into account the AOC band in APAC

# VHF COM footprint density in the World (except NAM)

- Based on ICAO global Database & SAFIRE

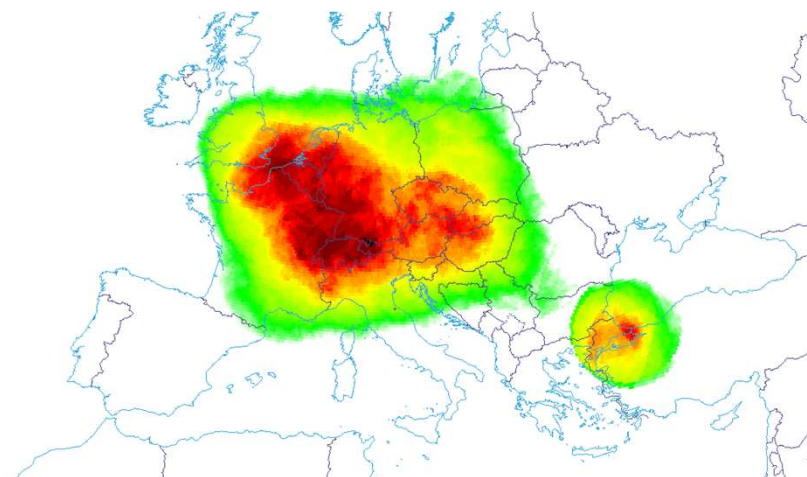

## Congestion / Density Maps

- For a determined service (coverage + criteria)
- Number of potential frequencies available
- In a specific location
- Visualization based on a colour scale

# COM Frequency Congestion in Europe

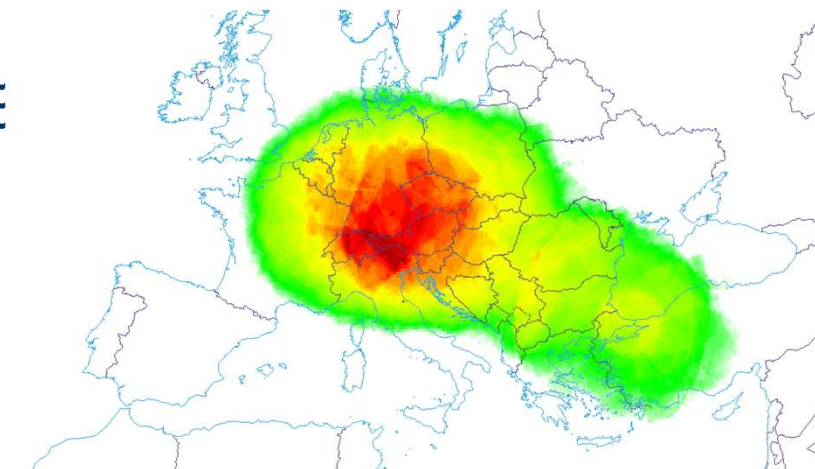

# COM Frequency Congestion in E

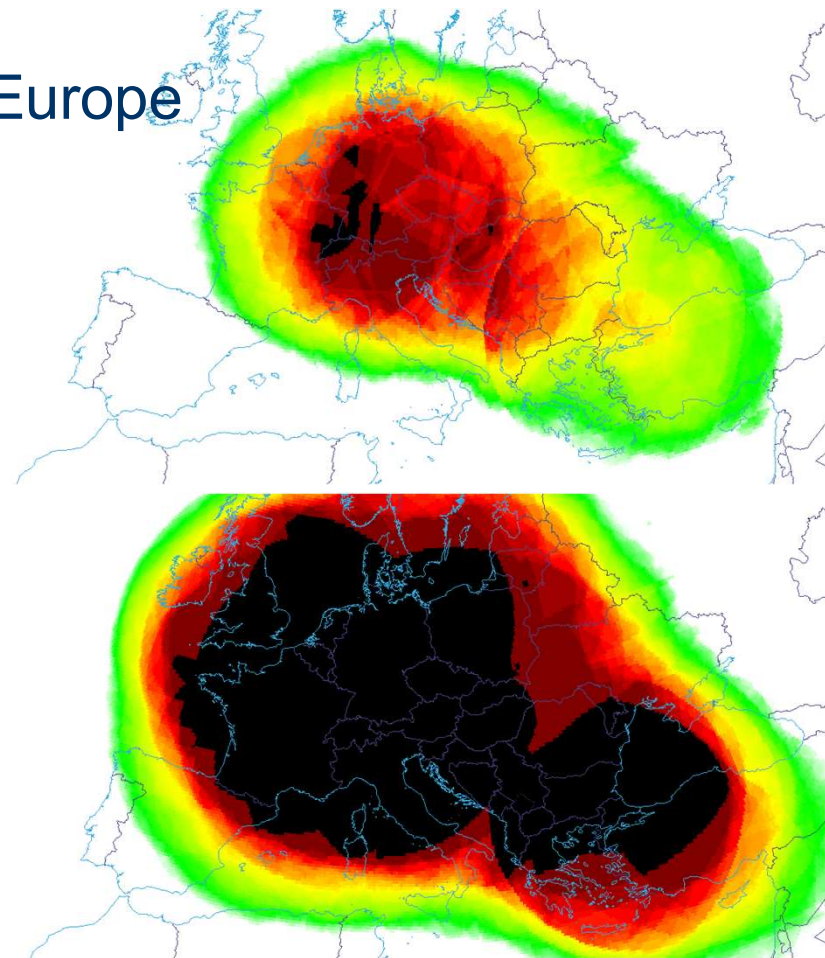

**8.33 kHz**

**25 kHz**

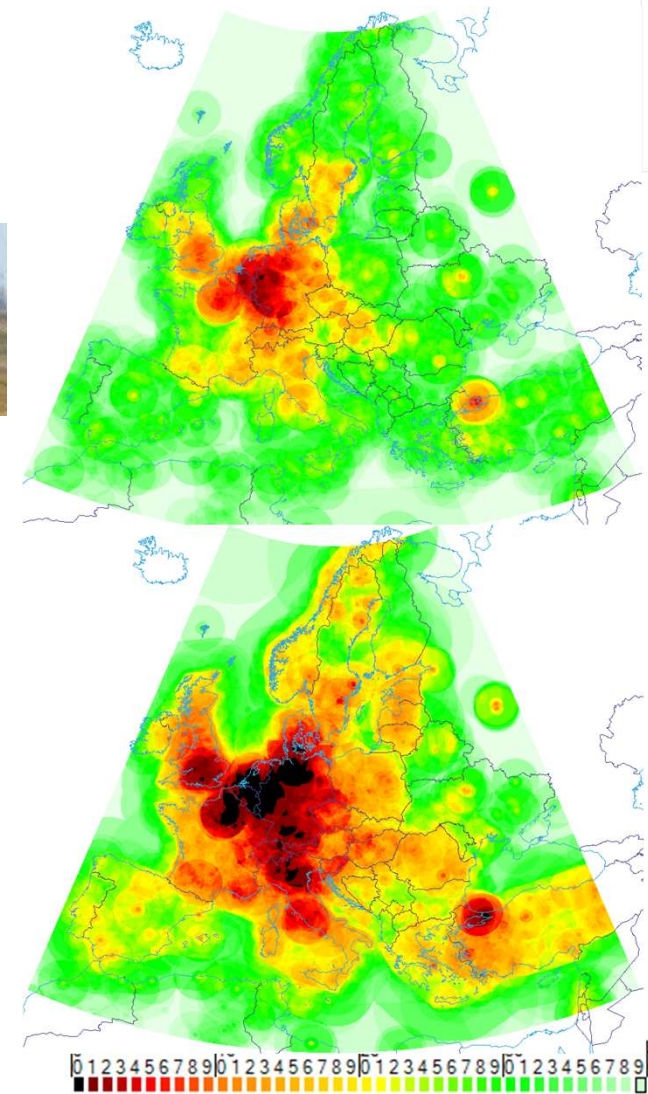

# COM Frequency Congestion in Europe

# ILS & ILS DME Congestion in Europe

**ILS**

**ILS/DME**

# VOR & VOR/DME congestion in Europe

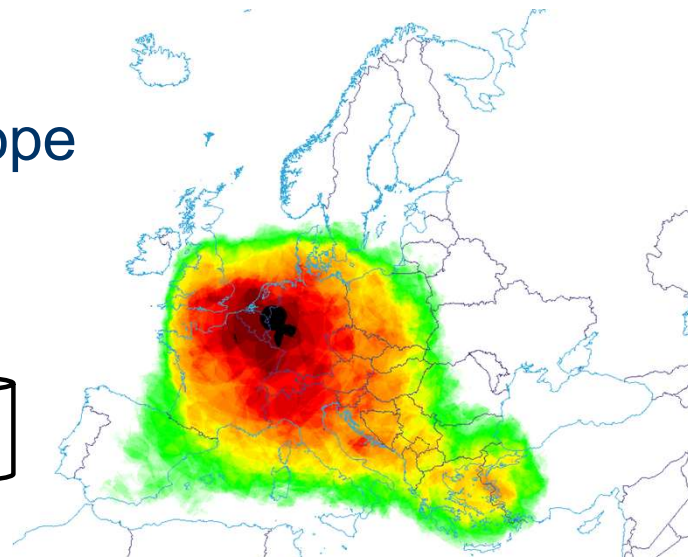

**VOR**

**VOR/DME**

100NM radius  
50 000 ft

## Audit & evaluation

- Every 2–3 years, a Frequency Database Quality Evaluation is conducted for COM and NAV
- Quantitative Approach
  - Are the declared frequency assignments truly in use ?
  - Are all the active frequency assignments declared ?
- Qualitative Approach
  - Are the active and declared frequency assignments correctly defined ?

## Simple Data Consistency

- DOC Vs service (range & ceiling)
- Out of Band assignments (OPC, AS ...)
- Volumes/Coordinates outside the State FIR it belongs to
- Other inconsistencies ...

# AIPs Analysis

- Using Aeronautical Information Publications (AIPs)
  - Paper (pdf format)
  - Digital (AIXM 4.5 / 5.1)
- Checking assignments
  - identify obsolete assignments for deletion
  - Verify if non coordinated assignments are operational
- Improving/correcting data details
  - Geographical Coordinates (correction and/or better accuracy)
  - Runway, TRD, ILS category
  - Nav aids Ident
  - Transmitted power ...
  - .....
- But Many Frequency assignments are not published in AIPs

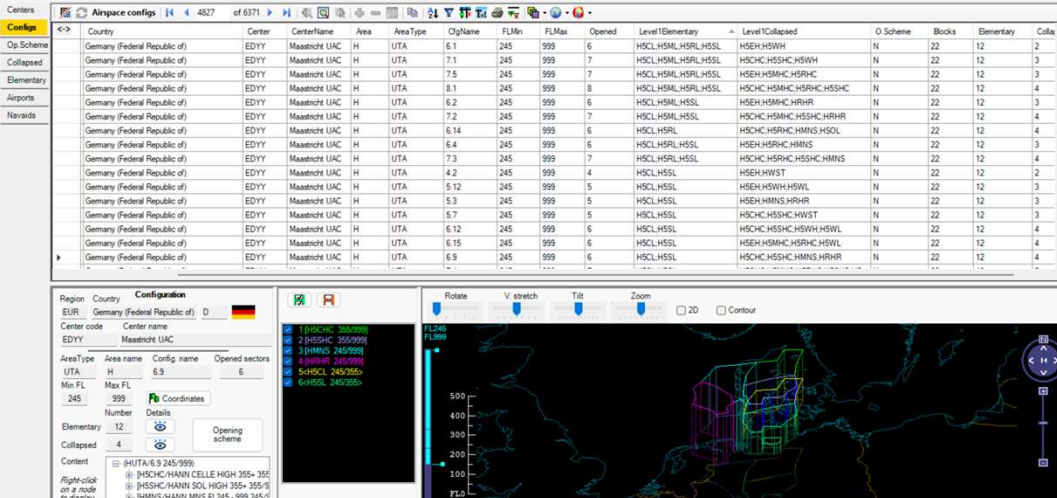

# Frequency assignment Vs Operational Data

- Airspace data extracted every AIRAC cycle (28 days)

- Contains :

- Aerodromes/Airports/Heliports
- Nav aids
- ATC centers (ACCs and some airports)
- ACC configuration and opening scheme
- Elementary sectors and FIRs
- Collapsed sectors and National Airspace

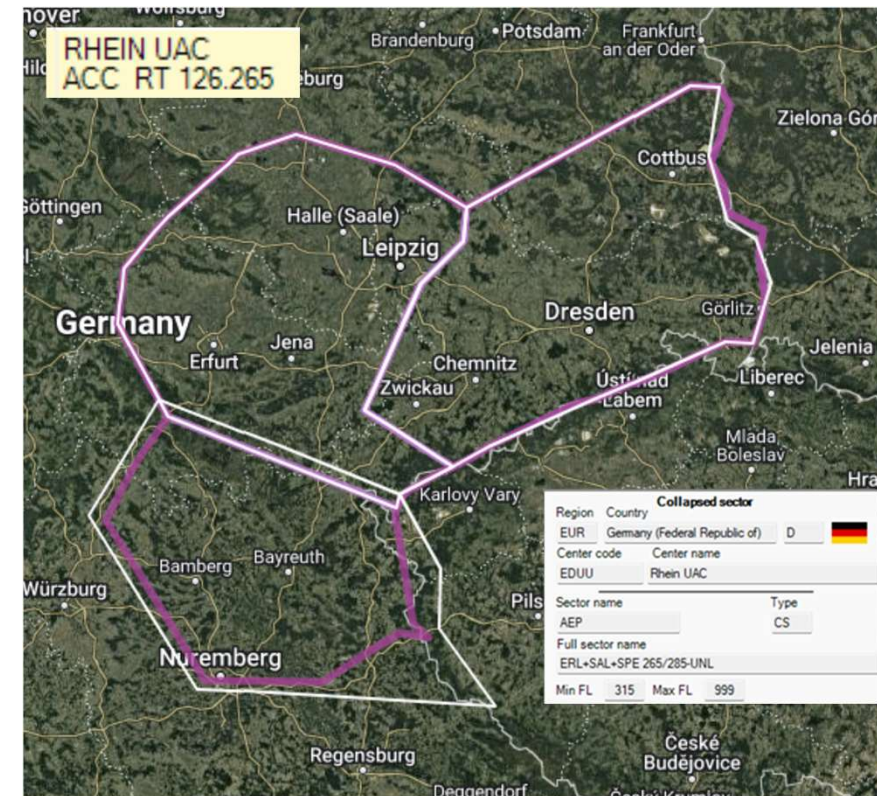

The screenshot displays the SAFIRE software interface. The top section shows a table of airspace configurations. The bottom section shows a map view with various airspace boundaries and frequencies.

Country	Center	CenterName	Area	AreaType	OrigName	FLMin	FLMax	Opened	Level1Elementary	Level1Collapsed	O Scheme	Blocks	Elementary	Colla

Germany (Federal Republic of)	EDYY	Maastricht UAC	H	UTA	6.4	245	999	6	HSCL:HSML:HSRL:HSLL	HSEH:HSWH	N	22	12	3
Germany (Federal Republic of)	EDYY	Maastricht UAC	H	UTA	7.3	245	999	7	HSCL:HSML:HSRL:HSLL	HSEH:HSWH	N	22	12	4
Germany (Federal Republic of)	EDYY	Maastricht UAC	H	UTA	4.2	245	999	4	HSCL:HSML:HSRL:HSLL	HSEH:HSWH	N	22	12	2
Germany (Federal Republic of)	EDYY	Maastricht UAC	H	UTA	5.12	245	999	5	HSCL:HSML:HSRL:HSLL	HSEH:HSWH	N	22	12	3
Germany (Federal Republic of)	EDYY	Maastricht UAC	H	UTA	5.3	245	999	5	HSCL:HSML:HSRL:HSLL	HSEH:HSWH	N	22	12	3
Germany (Federal Republic of)	EDYY	Maastricht UAC	H	UTA	5.7	245	999	5	HSCL:HSML:HSRL:HSLL	HSEH:HSWH	N	22	12	3
Germany (Federal Republic of)	EDYY	Maastricht UAC	H	UTA	6.12	245	999	6	HSCL:HSML:HSRL:HSLL	HSEH:HSWH	N	22	12	4
Germany (Federal Republic of)	EDYY	Maastricht UAC	H	UTA	6.15	245	999	6	HSCL:HSML:HSRL:HSLL	HSEH:HSWH	N	22	12	4
Germany (Federal Republic of)	EDYY	Maastricht UAC	H	UTA	6.9	245	999	6	HSCL:HSML:HSRL:HSLL	HSEH:HSWH	N	22	12	4

# Frequency assignment Vs Operational Data

- Comparison
  - Number of Runways Vs Number of TWR frequencies
  - Number of sectors Vs Number of ACC frequencies
  - Number of ATIS per airport
  - Number of backup frequencies
  - ....
- DOC Vs ATC sectors usage

## Audit tool – MANIF AFM

- 57 States, 20,000+ frequency assignments (COM and NAV), thousands of AIP documents...
- Such audits cannot be done manually!
- Our frequency management tool MANIF-AFM automates the process:
  - AIP module
  - Airspace module
  - Automatic audit report generation
- Short demo

## The Different Roles

- **Freq. Users** : ANSP, Airports, Militaries, state authorities, General aviation, ....etc...
- **National Frequency Manager:** State representative CAAs or Telecom authority
- EUR Region : 57 states

## Conclusion

- Each audit corrects or deletes hundreds of assignments
- The process is largely automated, keeping audit effort and cost low
- We maintain high data quality
- Fewer surprises and less interference
- Most EUR States recognize the shared interest and fully participate

## Discussion, Questions ...
