Long queues @ airport

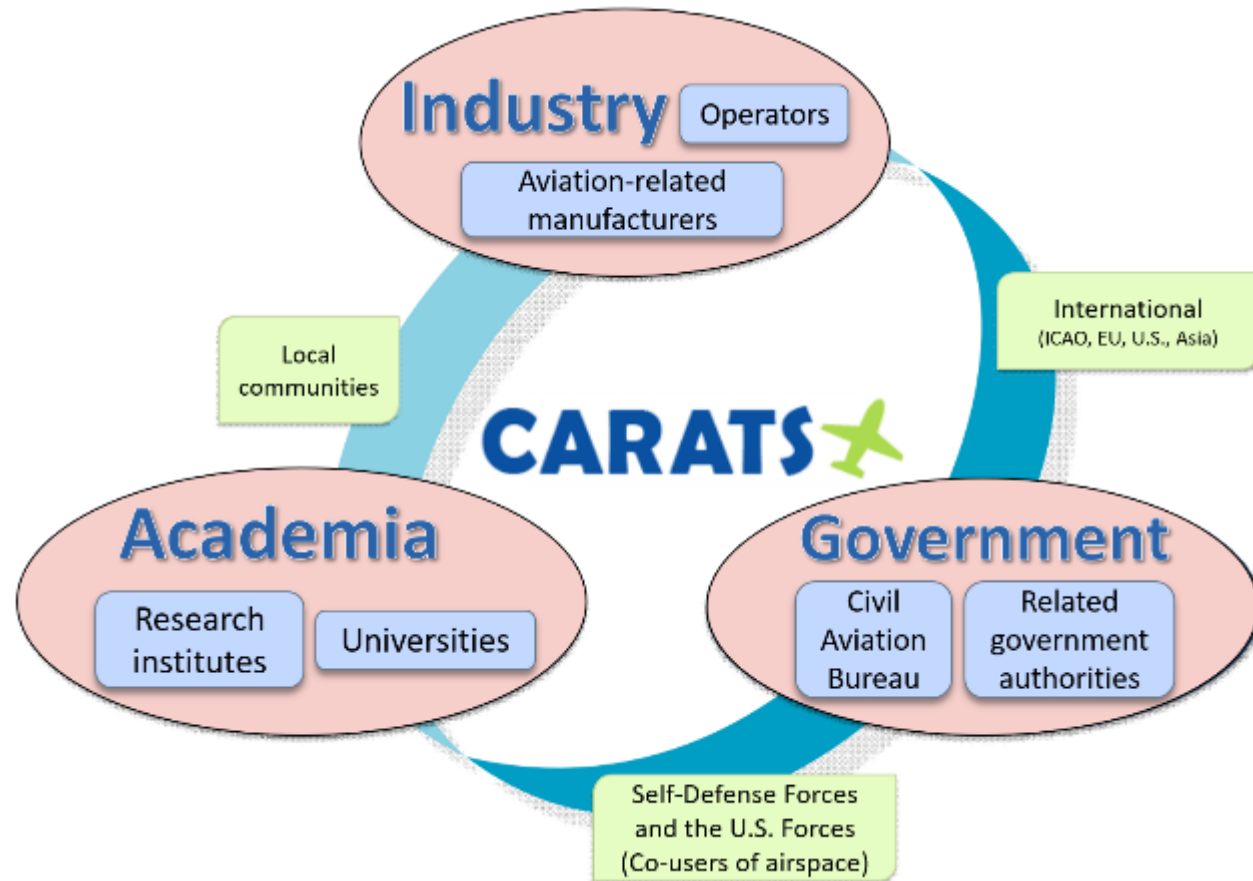

Airspace complexity

Safety & Efficiency

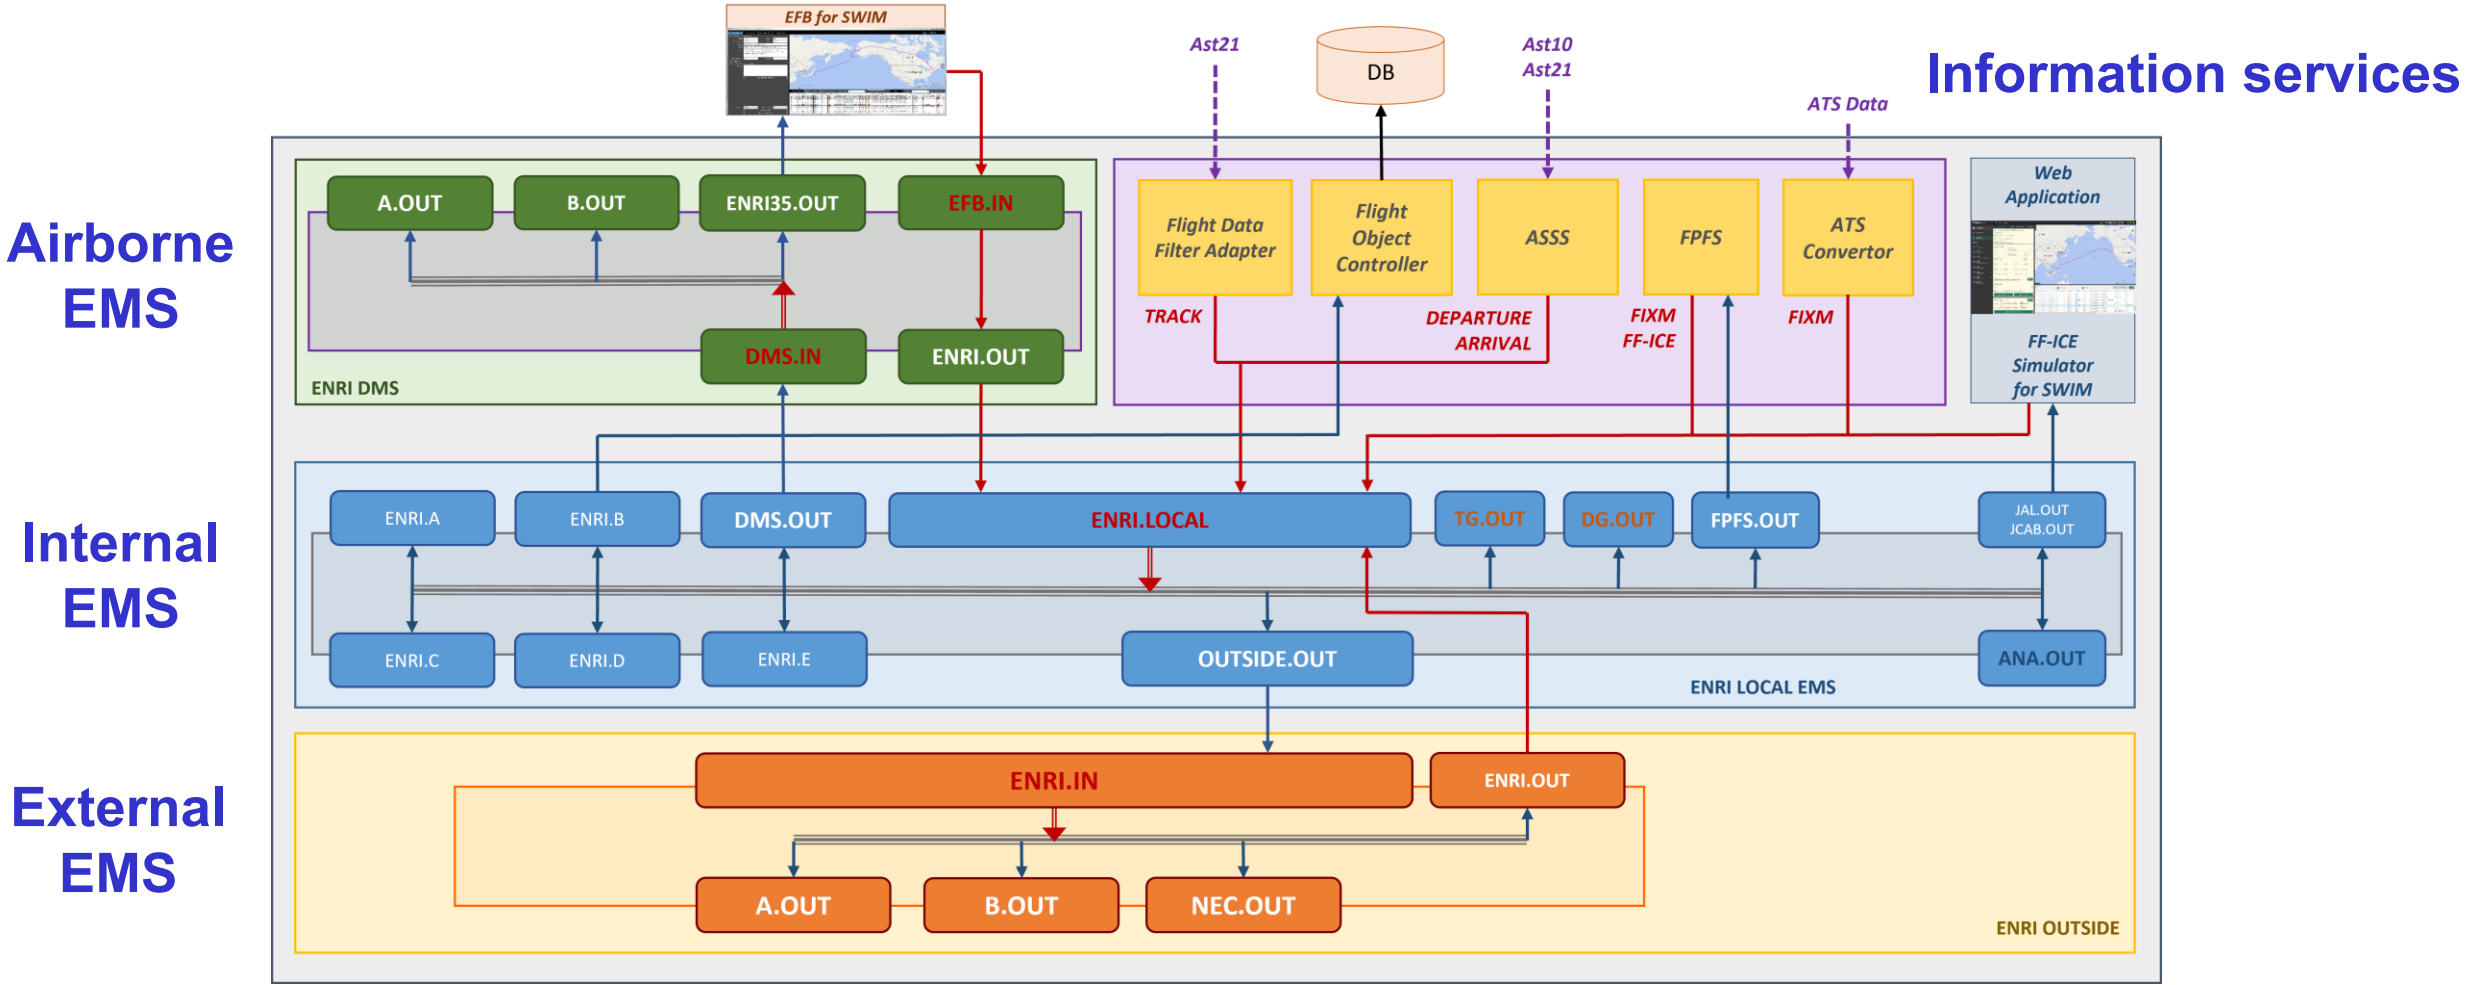

1. **MOTIVATION** AND RESEARCH ~ CARATS

In developing the future air traffic system, there are expectations of meeting global challenges such as **climate change** as well as contributing to the Japanese **economic growth** policy by achieving **efficient air services** that fulfill diversifying operators' and users' needs and growing air traffic demands.

For this purpose, **the current air traffic system needs drastic change** and accordingly, a committee composed of stakeholders from **industry**, **government** and **academia** has been established, resulting in the development of CARATS (Collaborative Actions for Renovation of Air Traffic Systems) through **consideration of international trends and various perspectives**.

2.SWIM

After a report on one SWIM demo...

My boss (at the time)

I think I understand
a little bit about the
benefits of SWIM,
BUT...

I don't think we can fully
understand the people
involved until we actually
start something.

2. SWIM ~ Preparation to “start something” (1)

SG Agreements:

- ✓ First, the scope should be limited to **the domestic (Local) SWIM** and then expanded to the regional and global in turn.
- ✓ Establish an **information service** to free ATM stakeholders from information sharing through a point-to-point connection with the JCAB system.
- ✓ Initial Information Service Candidate

Decisions:

- ✓ “20” Initial **Information Services**
 - Upgrade existing JCAB system to be able to generate Information Services
- ✓ “MASS” (Messaging-system for ATM as Swim Service)
 - **SWIM TI**
 - On-premise (rather than cloud-based)
 - Procurement by JCAB
- ✓ Content that “does not” go into the implementation

2. SWIM ~ Preparation to “start something” (2)

Governance Framework

a) defining roles, responsibilities and accountabilities of the various system-wide information management stakeholders including, but not limited to, originator, information service provider, information service consumer and regulator;

b) identifying, if necessary, the appropriate governance bodies responsible for coordinating the implementation within a State or region;

c) identifying and documenting the relevant standards and any additional standardization requirements; and

d) developing and maintaining policies, processes and guidance in support of system-wide information management implementation.

SWIM Steering Committee

SWIM Steering Committee

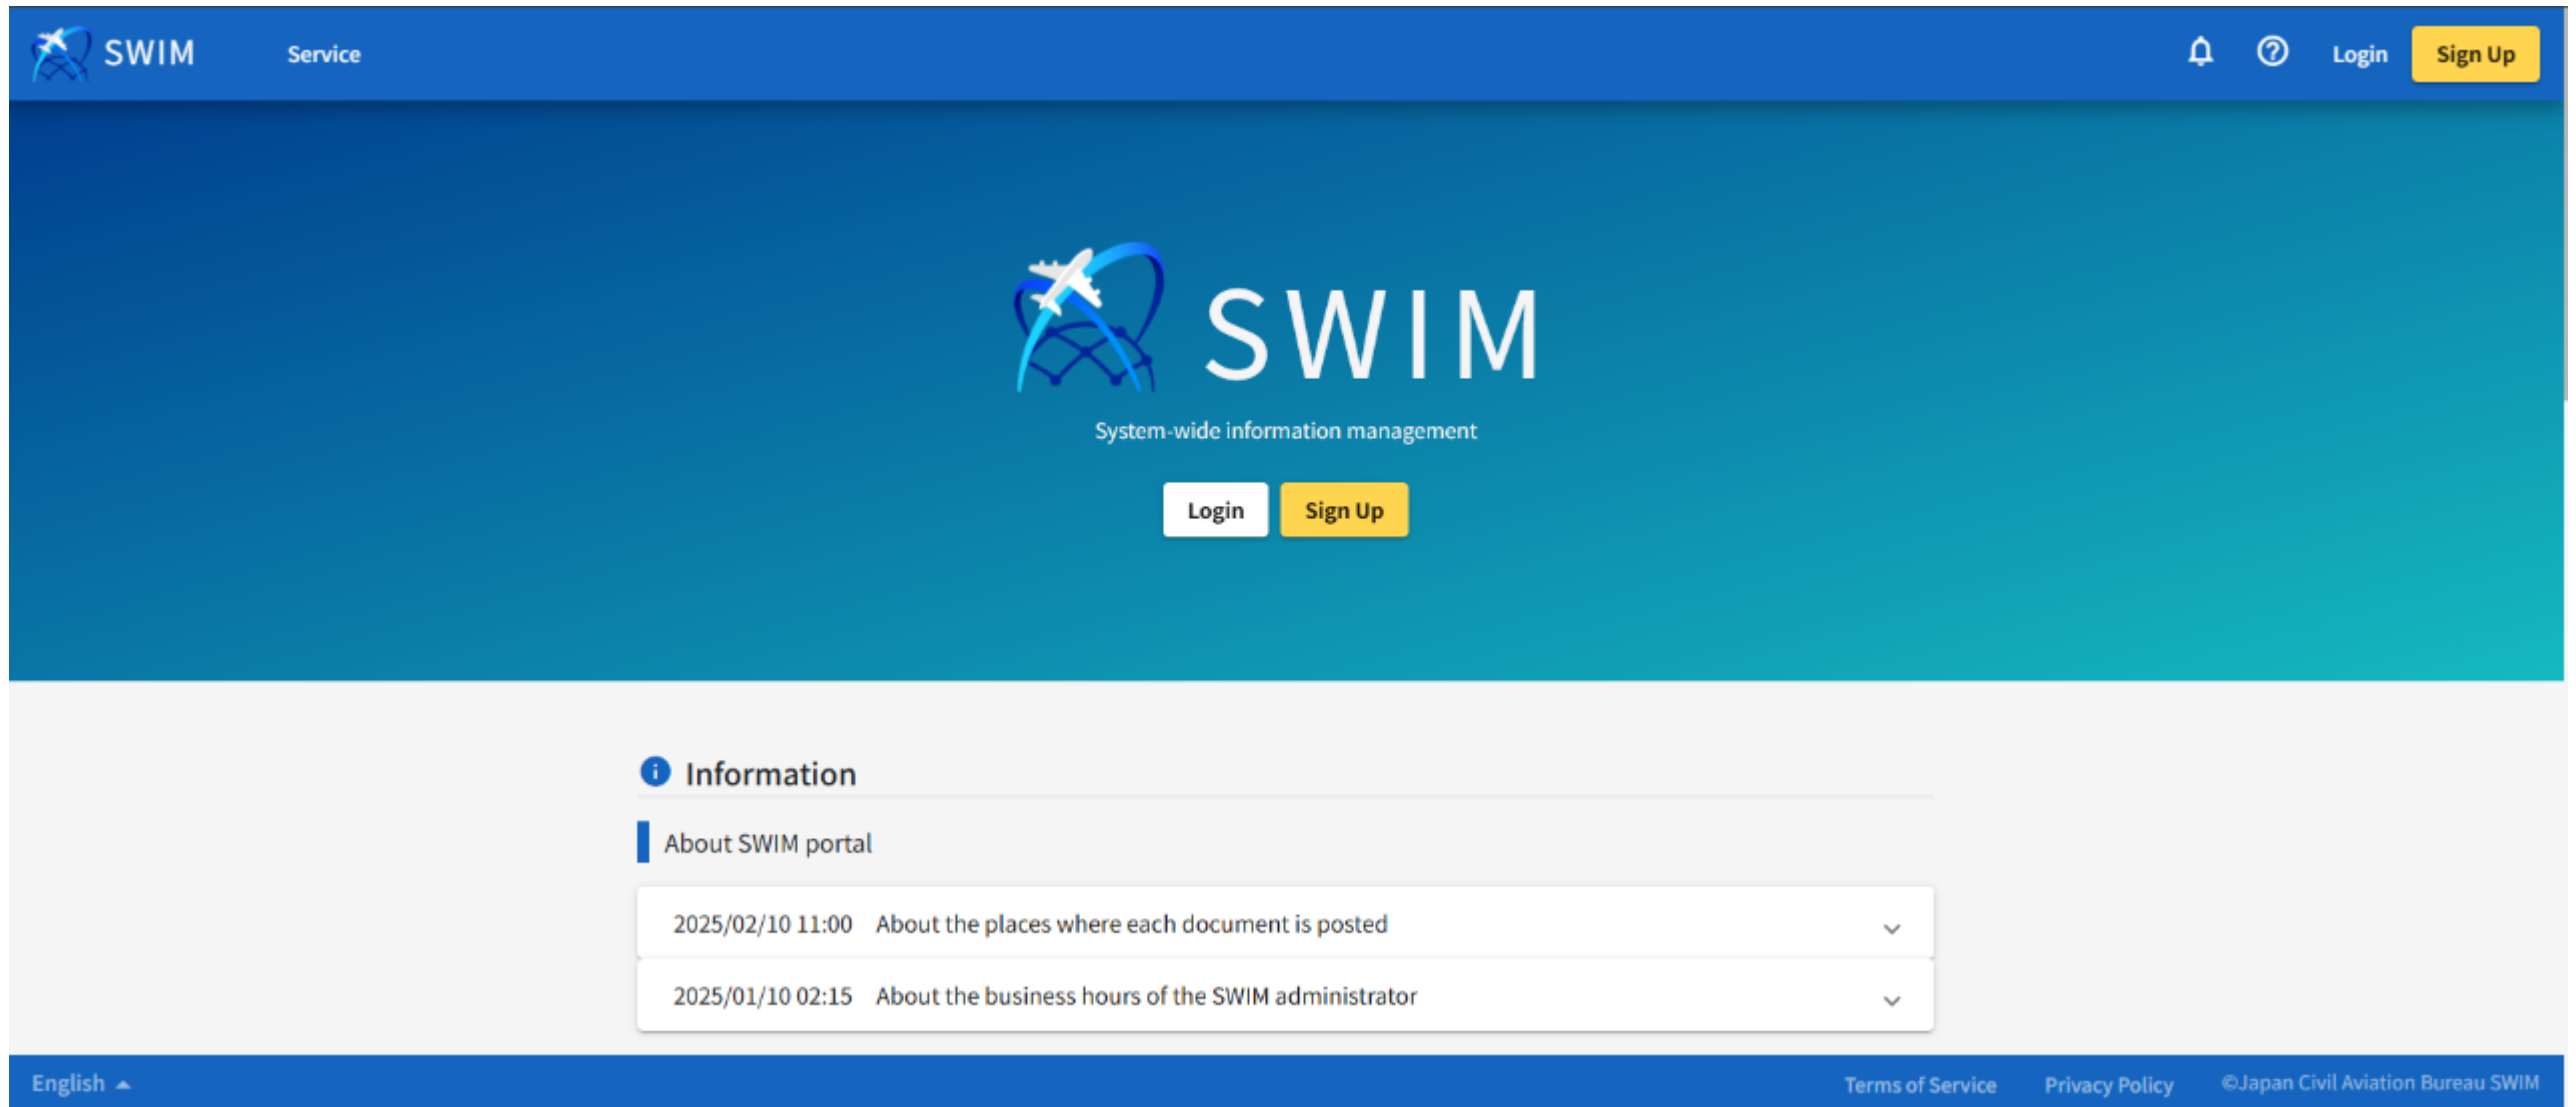

SWIM Operating Rules

First edition

December 26, 2024

2. SWIM ~ Current status (Launch of SWIM Portal site)

<https://top.swim.mlit.go.jp/swim>

2. SWIM ~ Current status (Information Services)

The screenshot displays the SWIM Service portal interface. At the top, a blue header bar contains the SWIM logo, the word "Service", and navigation links for "Login" and "Sign Up". Below the header, a search bar with the placeholder text "Search by service name" and a magnifying glass icon is present. The main content area is organized into sections under the heading "Messaging Services".

- Digital NOTAM**
 - Digital NOTAM Distribution Service: Status buttons for "inspection" and "pre operation" with a dropdown arrow.
- AIP**
 - AIP Data Distribution Service(Initial): Status buttons for "inspection" and "pre operation" with a dropdown arrow.
 - AIP Data Distribution Service(Update): Status buttons for "inspection" and "pre operation" with a dropdown arrow.
- ATIS**
 - ATIS Information Distribution Service: Status buttons for "inspection" and "pre operation" with a dropdown arrow.

The bottom of the page features a blue footer bar with the text "English" and a left-pointing arrow, followed by links for "Terms of Service", "Privacy Policy", and "©Japan Civil Aviation Bureau SWIM".

2. SWIM ~ Current status (Communication with stakeholders)

“SWIMEE”

SWIM **E**ducation and **E**nhancement team

SWIMEE 1ST meeting, 7th March 2024@MLTIT
(Attendees - F2F: 37 , Online: 273)

SWIMEE consists by ;

- ✓ Airspace User / Airport Operator
- ✓ ATM Support Industries
- ✓ Academia & Institute
- ✓ Government, etc

SWIMEE aims to ;

- ✓ deepen understanding of the SWIM
- ✓ promote the use of SWIM
- ✓ contribute to the realization of value for SWIM stakeholders through the coordination and collaboration and,
- ✓ continuously improve the SWIM

2. SWIM ~ Lessons learned & Next steps

Lessons learned ;

1. A comparison of the information provided by the SWIM with the existing information provided should identify areas that need to be changed/unchanged.
2. Ongoing educational activities are needed.
3. Early team formation and involvement
ex: Management, Service design, Technical Infrastructure, Governance, Education
4. What is lacking is supplemented from other sources.
5. Working in parallel, healthy growth of SWIM

Next steps ;

- ✓ Full QMS implementation
- ✓ Improvement of information services
- ✓ Reinforcement of backup system

- ✓ Compliance with APAC SWIM
 - APAC SWIM COMMON INFORMATION SERVICES (incl. FF-ICE services)
 - Introduction of EMS
 - Interconnected SWIM Registry
 - APAC SWIM Governance

2.FF-ICE

2. FF-ICE ~ Keys to the cessation of the 2012 FPL

Recommendation 3.2/2 – Transition to flight and flow – information for a collaborative environment services and cessation of ICAO 2012 flight plan by 2034

That States:

- a) in support of the 2034 global cessation of the ICAO 2012 flight plan, commence the development of a national plan to transition to flight and flow – information for a collaborative environment services along with industry stakeholders;
- b) include plans for the implementation of both minimum and optional flight and flow – information for a collaborative environment services in the national air navigation plans;
- c) share experience and resources for the implementation of flight and flow – information for a collaborative environment services;
- d) and planning and implementation regional groups, consider establishing regional focus groups for coordinating the planning and implementation of flight and flow – information for a collaborative environment services and providing necessary support throughout the transition period; and
- e) support and contribute to the work of their respective planning and implementation regional group and their sub-groups to develop a regional plan to transition to flight and flow – information for a collaborative environment services on the basis of the 2034 global cessation of the ICAO 2012 flight plan;

that ICAO:

- f) amend relevant ICAO provisions and guidance material to enable the 2034 global cessation of the ICAO flight plan and associated air traffic services messages;
- g) through planning and implementation regional groups, provide guidance and support for the development of regional plans to transition to flight and flow – information for a collaborative environment to enable the 2034 global cessation of the ICAO 2012 flight plan;
- h) support inter-regional collaboration for a harmonized implementation of and transition to flight and flow – information for a collaborative environment services;
- i) monitor and support the progress of flight and flow – information for a collaborative environment services implementation and transition plan developments of States; and
- j) conduct a periodic assessment and report on the readiness of the global air traffic management community for the 2034 global cessation of the ICAO 2012 flight plan.

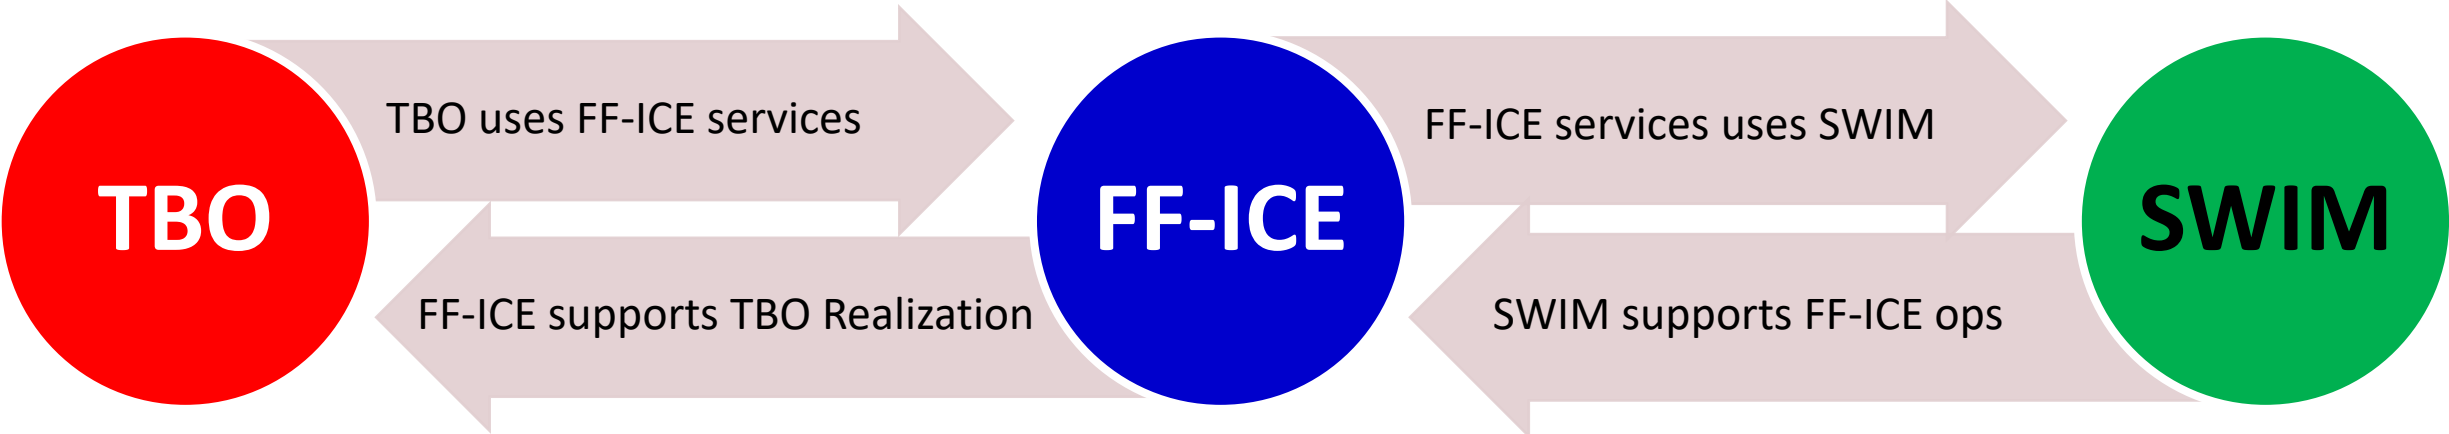

Still 9 years left !

2. FF-ICE ~ JCAB status

- ✓ We are committed and progressing harmonizing with APAC Seamless ANS Plan.
 - Discussing within APAC FF-ICE ad-hoc group
 - Demonstrating within APAC TBO Pathfinder project
- ✓ We are also planning to upgrade our information service to implement initial FF-ICE/R1 mandatory service (Filing service and Flight data request service) by 2028.
