

ICAO

International Civil Aviation Organization

Twenty-First Meeting of the ICAO Aeronautical Information Services – Aeronautical Information Management Implementation Task Force (AAITF/21)

Bangkok, Thailand, 19 – 22 May 2026

Agenda Item 4: AIS-AIM Updates

ASIA/PACIFIC REGION ICARD STATUS AND 5LNC DUPLICATE RESOLUTION

(Presented by the Secretariat)

SUMMARY

This paper presents Asia/Pacific Administrations of the ICAO International Codes and Route Designators (ICARD) application, the requirement to utilize it as the sole source of 5-letter name codes (5LNCs) used to mark waypoints, and the global project to eliminate duplicated 5LNCs, and outlines current ICARD usage and challenges.

1. INTRODUCTION

1.1 Annex 11 – Air Traffic Services defines a *significant point* as a *specified geographical location used in defining an ATS route or the flight path of an aircraft and for other navigation and ATS purposes*. It goes on to state that significant points shall be established and identified in accordance with the principles set forth in Annex 11, Appendix 2.

1.2 Annex 11, Appendix 2 states:

3.1 *Where a significant point is required at a position not marked by the site of a radio navigation aid, and is used for ATC purposes, it shall be designated by a unique five-letter pronounceable name-code. This name-code designator then serves as the name as well as the coded designator of the significant point.*

3.2 *The name-code designator shall be selected so as to avoid any difficulties in pronunciation by pilots or ATS personnel when speaking in the language used in ATS communications.*

3.3 *The name-code designator shall be easily recognizable in voice communications and shall be free of ambiguity with those used for other significant points in the same general area.*

3.4 *The unique five-letter pronounceable name-code designator assigned to a significant point shall not be assigned to any other significant point. When there is a need to relocate a significant point, a new name-code designator shall be chosen. In cases when a State wishes to keep the allocation of specific name-codes for reuse at a different location, such name-codes shall not be used until after a period of at least six months.*

3.5 *States' requirements for unique five-letter pronounceable name-code designators shall be notified to the Regional Offices of ICAO for coordination.*

1.3 In October 1995, EUROCONTROL and the ICAO EUR/NAT Regional Office developed a common database of facilities and services required for international air navigation within the EUR/NAT region. In February 1998, the first internet application on the EUROCONTROL website was developed to support the allocation process of five-letter name codes used for the identification of significant points (for ATS routes) not marked by the site of a radio navigation aid and designators for ATS Routes. This application was named the *International Codes and Routes Designators* (ICARD) application. The application gradually extended to other ICAO regions, achieving global coverage in 2009. In 2010 the management of the ICARD database was transferred from EUROCONTROL to ICAO Headquarters.

1.4 ICARD is the sole repository of 5LNCs ensuring global uniqueness and is the only means by which the requirements of Annex 11 Appendix 2 paragraph 3.5 may be met. The Annex 11 standard requiring that 5LNCs be globally unique has been applicable since 1997.

2. DISCUSSION

Asia/Pacific Region ICARD Usage

2.1 All Administrations responsible for or involved in the design, implementation and/or regulation of ATS routes and instrument flight procedures must have suitable employees registered in ICARD. In all cases where any personnel of a State Regulator or Air Navigation Service Provider are responsible for the allocation of 5LNC for ATS routes, Standard Instrument Arrivals (STARs) or Instrument Approach and Landing (IAL, including RNAV/RNP approaches), at least one person, and preferably two, must be registered as an ICARD_5LNC_PLANNER to ensure compliance with Annex 11 requirements. The number of ICARD Planners per Asia/Pacific Administration is provided in **Attachment A**. A list of the names of currently registered ICARD Planners will be circulated to AAITF/21 participants separately by email. Participants are requested to inform the ICAO Regional Office of any discrepancies.

2.2 Several Asia/Pacific Region Administrations do not currently have any registered ICARD_5LNC_PLANNER. If these Administrations allocate 5LNC outside the ICARD system, they are not compliant with the requirements of Annex 11. The following Asia/Pacific Administrations have not yet nominated ICARD_5LNC_PLANNER:

Macao China, Mariana Islands, Marshall Island, Micronesia, Palau and Tuvalu

5LNC Duplication Resolution

2.3 ICAO HQ, in a collaborative effort with States/Administration, compiled a comprehensive list of global 5LNC duplication in 2018. The list revealed a total of **3905** duplicated 5LNCs worldwide, with a significant number of **2733** in the APAC region. It is crucial for ICAO and the respective States/Administrations to continue working together to resolve this issue on a case-by-case basis.

2.4 Due to limited notification, the previous duplicate resolution list is difficult to maintain properly and does not, therefore, provide up-to-date, accurate information. Moreover, the complexity of the duplicate resolution list may lead to poor actions for duplicate resolution and limited notification by APAC States/Administration. In 2020, the Regional office created a separate list of duplicated 5LNC for each APAC State/Administrations, which was updated in 2026 (**Attachment B**). The APAC 5LNC Status contains the following information for each Administration:

- a) Total number of duplicated 5LNCs;
- b) 5LNCs for which priority is allocated;
- c) 5LNCs for which priority is allocated to other Administrations;

- d) 5LNCs for which priority to be determined by duplicate resolution rules;
- e) 5LNCs which are in the process of being resolved; and
- f) the number of completely resolved 5LNCs.

2.5 As mentioned before, due to limited means of notification of duplicate resolution, ‘APAC 5LNC Status’ was a snapshot of information at the time it was compiled and does not contain the most current information, particularly where duplicated 5LNCs have been replaced.

2.6 In 2022, the Tenth Meeting of the Air Traffic Management Sub-Group (ATM/SG/10) of the Asia Pacific Air Navigation Planning and Implementation Regional Group (APANPIRG) adopted the **Conclusion ATM/SG/10-10: State Reports of 5LNC Status**, that, *States are urged to provide an annual update on the status of duplicated 5LNCs in ATM/SG/10 WP/44 Attachment 3 to the ICAO APAC Regional Office by not later than 28 February each year.* In 2023, duplicated 5LNC status updates were provided by APAC Administrations in different formats. A revised, simplified 5LNC Data Collection Spreadsheet has been published on the ICAO eDocument webpage (ATM Section). In 2026, 19 Administrations provided an updated status of duplicated 5LNCs.

Australia, Bangladesh, Bhutan, China, Hong Kong China, Fiji, India, Indonesia, Japan, Malaysia, Mongolia, Nepal, New Zealand, Papua New Guinea, Philippines, Singapore, Sri Lanka, Thailand, United States

2.7 States and Administrations are encouraged to provide a complete list of 5LNCs currently published in their AIPs. This will enable the Regional Office to accurately identify any outstanding duplications and provide dedicated support to States in the resolution process. The indulgence and understanding of States and Administrations are respectfully requested throughout the resolution process, as ensuring the equitable and accurate allocation of priority necessitates rigorous analysis and extensive multilateral coordination.

Process for 5LNC Requests

2.8 ICARD shall be used as the central system for reservation and allocation of 5LNCs. It is mandatory for Administrations to await the approval/refusal from ICARD Regional Manager before proceeding to publication in AIP.

2.9 The ICARD Planner and Regional Manager expend considerable effort and time processing 5LNC requests. Each 5LNC goes through a complex process of checking with a commercially available source for any existing publication in another State’s AIP; a supplementary check in the State AIP, if available, or by email to the State when an existing publication of the 5LNC is detected, or if a duplicate exists; and a sound-like proximity check in ICARD before approving.

2.10 Some 5LNCs take considerable time to process due to multiple reference checks with the reliable database and State’s AIP, as well as coordination and communication with States and other Regions. Moreover, multiple communications with the State of multiple requests to clear up anomalies, including wrong coordinates, or duplication resolution, should be taken into account.

2.11 The following notes are emphasized for special attention:

➤ **Notes for new 5LNC request**

- In all cases, the coordinates of the requested new 5LNC must be within the territory of, or within a FIR administered by the requesting Administration. If this is not the case, the request will be refused.

- Proximate ‘sound-like’ checking shall be conducted before submission. 250NM shall be used for Terminal Airspace, 500NM shall be used for Enroute airspace and Flight Information Region (FIR) boundary points.
- States are requested to utilize the comment section to specify operational application of the 5LNC. Essential details include the associated aerodrome and its specific classification, such as an SID, STAR, IAF, FAF. Additionally, this field may be used to document any supplementary aeronautical information the State wishes to record in ICARD.
- For 5LNCs on FIR boundaries, the requesting Administration is responsible for coordination with all Administrations concerned before the new 5LNCs are requested in ICARD and provide support evidence to the Regional Office.
- After the submission of new 5LNC requests, the user requests are successfully recorded in the ICARD application, BUT NOT YET APPROVED by the ICARD Regional Data Manager. Administrations must wait for approval of the requested 5LNC/s by the ICARD Regional Data Manager before proceeding to publication in AIP. If requests are urgent, ICARD Users should inform the ICARD Regional Data Manager by e-mail to expedite processing.
- 5LNCs shall be implemented and published in relevant AIPs, in accordance with the AIRAC cycle and prior notification requirement of Annex 15 after approval in ICARD.

➤ **Notes for 5LNC amendment**

- There are many types of amendments requested by ICARD users, e.g., changes of coordinates, comments, purpose, addition or deletion of coordinating States, etc. Explanatory information should be provided in the “comment box”;
- If the request is the change of coordinates for a 5LNC *not yet published in AIP*, the request may be approved after proximity checks have been completed;
- 5LNC already published in AIP shall not be relocated. For an implemented waypoint to be relocated, its associated 5LNC must be replaced with a new one drawn from ICARD (Annex 11 Appendix 2 paragraph 3.4); and
- For 5LNCs on FIR boundaries, the Administration requesting the amendment must coordinate with the other Administrations(s) concerned before the submission of the amendment request.

➤ **Notes for 5LNC deletion**

- 5LNC deletion requests shall only be submitted in ICARD after the applicability date of the AIP amendment removing the 5LNC;
- Any 5LNC deletion request will remain in a pending state if cross-referencing reveals the code is still published in the corresponding AIP. The request will only be executed upon confirmation of the code's complete operational removal.
- For the 5LNCs located on a FIR boundary, make sure it has been coordinated between all Administrations concerned and removed from all AIPs involved before the code deletion request is submitted; and
- Once a 5LNC is deleted, it will be temporarily frozen for a period of 6 months. After this period, it will automatically return to the reserve list of the ICARD database of the same Region, ensuring a clear and predictable process.

Current Usage of ICARD and Challenges

2.12 Since AAITF/20, reserved block codes have been systematically released back into the available APAC available 5LNCs. The Regional Office notes with appreciation that, through the commendable cooperation of States in auditing unused 5LNCs and resolving existing duplications, a total of **833** 5LNCs have been returned to the system, ensuring an adequate inventory for future use.

2.13 ICAO APAC has detected recently that some States published new 5LNC waypoints/published existing 5LNCs with new coordinates in the AIP before submitting registration/amendment request in ICARD. Additionally, some States published 5LNCs that already listed in the duplicated list. This is not compliant with Annex 11 requirements and would not be accepted in the ICARD system. Consequently, States shall change the published 5LNC with appropriate ones available in ICARD. States are respectfully reminded to utilize the ICARD User Guidelines as the primary reference for 5LNC management. Should an Administration require an electronic copy, it may be obtained by contacting the ICAO APAC Regional Office.

2.14 The duplicate resolution process demands significant time, thorough evaluation, and multilateral coordination before precedence can be assigned to a State/Administration to retain or substitute a 5LNC. Recognizing that replacing a 5LNC introduces extensive administrative amendments within a State's AIP, it is highly recommended that States and Administrations proactively submit substantiating evidence to support the retention of critical codes, thereby facilitating a more efficient resolution process.

2.15 The primary reasons for 5LNC rejections and associated operational challenges include:

- a) 5LNC currently published in the AIP of another State, but not registered in ICARD;
- b) Selected 5LNC appears in the list of duplicated 5LNCs;
- c) sound-like proximity issues detected in ICARD, and ICARD's sound like proximity check does not dynamically screen pending submissions against each other, therefore the submitter has to check manually within their own list of submission;
- d) 5LNCs starting with the letter "X" or "Q" as it may pose pronounceability confusion for all airspace users and Air Traffic Control; and
- e) Available 5LNC in ICARD that may pose pronounceability issues, for example: "NMBIN" "SRONO", "TMANG".
- f) Some States have removed 5LNC from AIP; however, they did not submit a deletion (DEL) request in ICARD.

2.16 Proposed Actions

- a) States/Administrations are strongly encouraged to submit the completed 5LNC Data Collection Spreadsheet to the Regional Office to facilitate comprehensive regional data compilation, support the proactive identification of new duplications, and verify the consistency of promulgated codes with the status in the ICARD system.
- b) States and Administrations are strongly encouraged to review their allocated 5LNCs within ICARD and submit deletion (DEL) requests for any unused codes, thereby maximizing the availability of designators within the APAC regional pool; and
- c) States/Administrations are requested to proactively submit substantiating operational evidence to support the retention of duplicated 5LNCs they wish to maintain without modification, thereby facilitating an efficient and equitable cross-regional resolution process.

3. ACTION BY THE MEETING

3.1 The meeting is invited to:

- a) Note the information in this paper;
- b) adhere to the process for 5LNC requests in compliance with Annex 11 requirements;
- c) discuss any relevant matters as appropriate.
