Super Terminal Expo (STE) 2026 is the definitive event for passenger and cargo terminal design, development, and innovation in the Asia-Pacific region. Taking place from 3–5 November, 2026, at AsiaWorld-Expo, Hong Kong, this three-day event will unite global leaders in aviation, logistics, technology, and infrastructure to redefine the future of smart airports, sustainable terminal innovations, and advanced air mobility solutions.

STE is the gateway to discovering cutting-edge solutions that will transform terminal operations and enhance passenger and cargo experiences. Whether you are an airport authority, regulator, technology provider, airline executive or logistics specialist, this event offers unparalleled opportunities to explore the latest trends in cargo automation, passenger experience technologies and sustainable infrastructure development.

Quintus AGL Maintenance Service Ltd is an affiliate of Quintus Advanced Products, the sole distributor of ADB Safegate, a leading manufacturer of Airfield Ground Lighting (AGL) systems, in Thailand for over 35 years. Quintus Advanced Products is responsible for the design, supply, installation, maintenance, and training of AGL systems, holding approximately 85% of the Thai market share. The company also supports ADB Safegate's operations across several countries, including Sri Lanka, Brunei, Laos, Cambodia, Myanmar, Mongolia, and Papua New Guinea.

With the continuous growth of the aviation industry and rapid technological innovation, Quintus AGL Maintenance Service Ltd was established to enhance and manage maintenance services. The company is driving the digital transformation of airport AGL maintenance – transitioning from traditional paper-based checklists to digital systems in full compliance with ICAO Annex 14 and Annex 15.

As the aviation industry embraces digitalization, automation, and data integration across the entire value chain, Quintus AGL Maintenance Service Ltd is at the forefront of developing and implementing the AGL Data Center project for the Asia-Pacific region, supporting smarter, safer, and more efficient airfield operations.
