Agenda Item 4a: Review of Current ATFM Operations and Problem Areas

REGIONAL ATFM IMPLEMENTATION STATUS

(Presented by Secretariat)

SUMMARY

This paper presents the current reported ATFM implementation status of Asia/Pacific Administrations, reported against the performance objectives of the Regional Framework for Collaborative ATFM.

1. INTRODUCTION

1.1 As noted in conclusions *ATM/SG/10-1: Revised Reporting Date for ATM Regional Plans' Implementation Status Monitoring* and *ATM/SG/10-6: Regional ATFM Implementation Status Reporting*, States and Administrations are expected to report their implementation status of the performance expectations of the regional plan, i.e., *Regional Framework for Collaborative ATFM*, by not later than 28 February each year.

1.2 The ATFM Implementation Status Report form provides for two tiers of status reporting:

A: Administrations that are expected, or intend, to implement and distribute cross-border ATFM measures under the terms of the Performance Improvement Plan of the Asia/Pacific Regional Framework for Collaborative ATFM; and

B: Administrations that are not expected to implement and distribute cross-border ATFM measures as described in A.

Note: Administrations that are not expected to implement and distribute cross-border ATFM measures are expected to implement a number of other elements of the Regional Framework for Collaborative ATFM in order to support regional cross-border ATFM.

1.3 Administrations reporting against Tier B implementation should note the Regional Framework for Collaborative ATFM and Asia/Pacific Seamless ATM Plan elements referring to ATFM Program Airports, High Density Airports and High-Density FIRs, and commence reporting against Tier A elements where any of their aerodromes or FIRs meet these criteria.

1.4 In alignment with the methodology applied to assessment of implementation status in several significant ATM technical fields in the APAC Region, implementation status of each Administration is assessed as Robust (90 – 100% implementation), Marginal (70 – 89%) or Incomplete (0 – 69%).

1.5 As Phase IIIB Regional ATFM capabilities are expected to be implemented by November 2025, these capabilities are incorporated into the overall assessment of implementation status beginning in 2026. Consequently, despite some States/Administrations submitted inputs identical to those provided previously, the overall percentage of implementation has changed to reflect the inclusion of Phase IIIB requirements.

2. DISCUSSION
