

Day 2 Recap

Amornrat Jirattigalachote, PhD
Expert (Director Level), AEROTHAI

ICAO APAC SWIM Training cum Workshop, 25 - 27 August 2026

Day 2 Recap

- APAC SWIM TI and FF-ICE/R1 services
 - Interoperability between SWIM implementations : Service Bindings, Infrastructure Bindings, Network Bindings
 - Implementation planning: From AMHS to SWIM
 - eFPL submission over SWIM operations with regional SWIM TI
- Use case development, leveraging APAC Common SWIM Information Services
 - Operational needs ➡ SWIM solutions
 - Core elements : Who, Why, What
 - Start from operational problem, keep use case simple

Day 2 Recap

- SIPG introduction
 - Regional SWIM TI prototype architecture
 - Routing mechanisms for different MEPs
 - Interoperable registry model : SWIM Discovery Service
- SWIM Sandbox overview
- MET SWIM services
 - Requirements for MET information services over SWIM : Amd. 81 to Annex 3
 - Challenges : Much larger data volumes, visualization of MET data, investment, regulatory changes
 - WAFS, QVA : Current MET information services

Day 2 Recap

- Regional SWIM TI architecture
 - Governance
 - Use cases testing to cover all major information domains
 - GEMS providers : Who / Decision Criteria
- Examples of national SWIM TI architecture
- AMHS sunseting : System lifecycle, information type required
- AMHS leapfrogging : New information exchanges transitioning directly to SWIM
- SWIM tenders : Performance-based / Outcome-based requirements
