## WORKING PAPER (WP/27)

ICAO ASIA AND PACIFIC (APAC)  
THIRTIETH MEETING OF THE METEOROLOGY  
SUB-GROUP (MET SG/30)

Bangkok, Thailand, 20 - 24 July 2026

**Agenda Item 2: Review Outcomes from Previous Meetings****PROGRESS ON ADDING THE WORLD AREA FORECAST SYSTEM (WAFS) INTERNET  
FILE SERVICE (WIFS) DATA TO THE ANNUAL SIGMET TEST**

(Presented by Presented by the United States of America)

**SUMMARY**

This paper provides the progress of adding WIFS data to the yearly SIGMET testing.

**1. INTRODUCTION**

1.1 During last year's MET SG/29 meeting, the US agreed to include WIFS data content to the annual SIGMET testing. Reference Report of MET SG/28, (para. 2.8) and Report of MET SG/29, (para. 2.6). This paper provides the group an update.

**2. DISCUSSION**

2.1 The data collected for all three tests in November 2025 can be seen in **Appendices A, B and C** (separate documents). This information was not available to the testers in early 2026 but will be addressed for 2027. In addition, the WIFS SIGMET availability is dependent upon the Washington Inter-Regional OPMET Gateway (IROG)/Reginal OPMET Data Bank (RODB). The IROG is the data collection point, which immediately forwards SIGMETs to WIFS.

- WIFS can be found at this link: [WIFS](#)

2.2 ICAO member states can check their State's date availability at [Aviationweather.gov](#), which serves as a proxy for everything on WIFS. For example, if a State does not see its [SIGMETs](#) on the site, they can click on the icon that resembles an envelope (Contact Us) in the upper right of the website above to submit an inquiry.

2.3 The contents of the ticket should include an example of the product with a full header that includes the WMO ID.

**3. ACTION BY THE MEETING**

3.1 The meeting is invited to:  
a. note the information in this paper, and

b. agree that the inclusion of the WIFS to the annual SIGMET testing meets the request from the MET SG/29

-----
