WORKING PAPER (WP/26)
**ASIA AND PACIFIC (APAC) TWENTY-FOURTH
MEETING OF THE METEOROLOGICAL
INFORMATION EXCHANGE WORKING
GROUP (MET/IE WG/24)**

Nadi, Fiji, 21 to 24 April 2026

Agenda Item 3: Quality Control, Monitoring, and Management of Meteorological Information Exchange
ASIA/PACIFIC PERFORMANCE INDICES

(Presented by Thailand)

SUMMARY

This paper discusses the results of OPMET monitoring, both TAC and IWXXM of 5 RODBs: Bangkok, Brisbane, Nadi, Singapore and Tokyo. The data covers the period from 1-30 November 2025. The results of the report are prepared by RODB Bangkok.

1. INTRODUCTION

1.1 At the MET/IE meeting, it was agreed that the Asia-Pacific monitoring would be conducted annually in November.

1.2 OPMET Statistics Web Application is used to calculate the OPMET performance index in both TAC and IWXXM formats. OPMET data are obtained from 5 RODBs during 1-30 November 2025.

1.3 The dataset is based on ROBEX Handbook nineteenth Edition February 2026. The number of aerodromes METAR(SA)/TAF(FT) of TAC as table below.

No. of aerodromes listed in Appendix A – Collection and Dissemination of METAR (SA) bulletins, Table A: METAR	347
No. of aerodromes listed in Appendix B – Collection and Dissemination of TAF (FT) bulletins, Table B: TAF	344

2. DISCUSSION

2.1 Calculation of Performance Indices

- The Timeliness calculation method refers to the MET/SG 28-WP07 ROBEX Handbook updates in accordance with the review of the performance indices (PIs) used in APAC OPMET Monitoring.

- METAR Timeliness = on average 95% ANP required and available METAR observation reports (excluding SPECI; no NIL, no AMD observations; including COR observations) is received within 5 minutes before observation time and maximum 10 minutes after the observation time (MM observation time(s) from the YYGGgg-Group in the bulletin Abbreviated Header = DDHHMM based on monitoring): $HH:(MM - 5') \leq RX-Time \leq HH:(MM + 10')$.

- TAF Timeliness = on average 95% ANP required and available TAF (excluding NIL and TAF reports with BBB = AMD; inclusive BBB = COR reports) is received within 60 minutes before the start period of validity of TAF (TAF validity period = GGGG based on monitoring): $(GGGG - 60') \leq RX-Time \leq (GGGG + 0')$.

2.2 The **Appendix A Tables A and B** show the Asia/Pacific Performance indices measured per aerodrome for TAC and IWXXM respectively.

Technical Note on Performance Indicators:

Regarding the performance metrics for November 2025, it is important to clarify that while the IWXXM 2025-2 Availability Index and Specific Statistics were successfully processed using uploaded data, the Timeliness Index for this specific schema version remained pending during that period.

The calculation of Timeliness relies on the System Timestamp (Received Time) within the live OPMET Operational System. Since the Bangkok ROC was in the process of finalizing the integration to support the direct ingestion of IWXXM 2025-2 (i.e., METAR version 3.2.0 and TAF version 3.0.2) at that time, the real-time metadata required for the Timeliness Index was not yet available (indicated as “N/A” in tables in Appendices). This differs from the Availability Index and other IWXXM Statistics, where post-processing of uploaded files is applicable.

2.3 The **Appendix A Tables C and D** are subsets of Appendix A Table A and show the aerodromes with TAC Performance Indices of 0 (zero) at all RODBs, indicating nil report for METAR (SA) and TAF (FT) respectively.

2.4 The **Appendix A Tables E and F** are subsets of Appendix A Table B and show the aerodromes with IWXXM Performance Indices of 0 (zero) at both RODBs, indicating nil report for METAR (LA) and TAF (LT) respectively.

2.5 The **Appendix B Tables A and B** show the Asia/Pacific Performance indices measured per the State Performance Indices for TAC and IWXXM respectively.

2.6 The **Appendix C Tables A, B, C and D** show the IWXXM Performance indices at RODB Bangkok during 1-30 November 2025 for METAR/TAF, SPECI, SIGMET/AIRMET and Advisories respectively.

3. ACTION BY THE MEETING

3.1 The meeting is invited to discuss the following:

- a) note the information contained in this paper;
- b) use the result tables to improve the OPMET data exchange in general; and
- c) investigate unavailable data from the aerodromes.
