**REGIONAL AIR NAVIGATION PLAN UPDATE**

(Presented by the Secretariat)

**SUMMARY**

This paper presents an update on the electronic Air Navigation Plan (eANP) for Asia/Pacific (APAC) Region, which replaces ICAO Doc 9673. States/Administrations are invited to review the data affecting their administration and provide feedback to ICAO on the data's accuracy.

**1. INTRODUCTION**

1.1 State letters ref.: T 11/2.1 – AP034/16 and T 11/2.1 – AP051/16, adopted a common, new Air Navigation Plan (ANP) template, which was approved by the ICAO Council for use by all ICAO Regions. The ANP Volumes I, II and III are available on the ICAO APAC Office website at: <https://www.icao.int/APAC/apac-air-navigation-plan-anp>.

1.2 **DISCLAIMER:** *The presentation of material in this paper does not imply the expression of any opinion whatsoever on the part of ICAO, APANPIRG or the ATM Sub-Group of APANPIRG concerning the legal status of any country, territory, city or area of its authorities, or concerning the delimitation of its frontiers or boundaries.*

**2. DISCUSSION**

Background

2.1 The development of the new APAC ANP, replacing *Asia and Pacific Regions Regional Air Navigation Plan* (ICAO Doc 9673), has been discussed since 2017. Proposals for Amendment (PfAs) for Flight Information Regions (FIRs) and Search and Rescue Regions (SRRs) data in ANP Volume I require approval of the Council of ICAO. States should note that ICAO Doc 9673 did not provide a legal description of the FIRs in the first place, it is very important for States to understand that this process of checking, alignment and validation is crucial if they would like a formal basis for their FIRs. Furthermore, the PfA for SRR data would enable the establishment by States of SRRs under the provisions of ICAO Annex 12.

2.2 To facilitate the PfA process, ICAO urged States to urgently review the FIR/SRR data of those FIRs and SRRs related to their administration that were not included in the APAC ANP Volume I Table ATM I-1; and Table SAR I-1 and provide feedback to the ICAO APAC Office on the data's accuracy.

2.3 As FIRs were considerably more difficult to establish than SRRs, with issues such as air navigation charges and the establishment of Special Use Airspace (SUA) being factors for States, the review of FIRs was being conducted first. In addition, many SRRs were of similar dimensions as their associated FIRs, so this would be an easier task if the FIR dimensions were already established.

2.4 Four State letters have been issued on this matter and the response to the State letters are shown in **Appendix A**. In the event of anomalies, States were urged to confirm the correctness of the data. The intention was to clarify any anomalies, so they could be then compared to the ICAO data (**Appendix B** – FIRs and **Appendix C** – SRRs).

2.5 In order to complete the establishment of FIR/SRR tables, the information presented in the CHART ATS 1 and CHART SAR 1 from ICAO Doc 9673 as agreed by the council, could be used as the baseline to populate APAC ANP Volume I. Subsequently, after the FIR and/or SRR tables have been incorporated with the published coordinates in the APAC ANP Volume I, States would need to file a PfA for any changes to the information in the ANP.

2.6 The exercise to review the ANP with FIR and SSR coordinates should be based on ICAO historical records and not new proposals for changes. Some States had submitted major amendments to their FIRs during the review process. These will only be considered if it was a change that only affected the national airspace and not the neighbouring airspace, or if all parties agreed with the change proposal before submission to ICAO.

#### PfA Process

2.7 The PfA process for FIR and SRR is the same process of approval in APAC ANP Volume I (approval of the Council). The flow diagram detailing the verifications steps before entry into the ANP can be found in **Appendix D**. A PfA template is provided on the ICAO APAC Office website (<https://www.icao.int/APAC/apac-air-navigation-plan-anp>).

2.8 States should note that PfAs for either the ANP or the *Regional Supplementary Procedures* (ICAO Doc 7030) should include a list of all the States of Registry of any airspace or airport or facility user that may be affected by the items that were proposed for amendment.

2.9 **Figure 1** and **Figure 2** shows the status of FIR and SRR verification respectively.
