WORKING PAPER

DGP-WG/05-WP/44
12/4/05

DANGEROUS GOODS PANEL (DGP)

MEETING OF THE WORKING GROUP OF THE WHOLE

Montreal, 18 to 22 April 2005

Agenda Item 2: Development of recommendations for amendments to the *Technical Instructions* for incorporation in the 2007/2008 edition
2.3: Part 3 — Dangerous Goods List and Limited Quantities Exceptions

PROPOSED AMENDMENT TO SPECIAL PROVISION A66

(Presented by R. Richard)

1. INTRODUCTION

1.1 During the packing instruction revision exercise it was noted that a discrepancy exists between special provision A66 in the TI and SP 236 in the UN Model regulations. The special provisions currently read as follows:

A66 The organic peroxide included in a Polyester Resin Kit must be one of those listed in Table 3-1 as permitted for transport.

236 Polyester resin kits consist of two components: a base material (Class 3, packing group II or III) and an activator (organic peroxide). The organic peroxide shall be type D, E or F, not requiring temperature control. Packing group shall be II or III, according to the criteria for Class 3, applied to the base material. The quantity limit shown in Column 7 of the Dangerous Goods List applies to the base material.

2. PROPOSAL

2.1 To enhance consistency between the ICAO TI and the UN Model Regulations it is proposed that A66 be amended as follows:

A66 Polyester resin kits consist of two components: a base material (Class 3, packing group II or III) and an activator (organic peroxide). Only organic peroxides that are authorized for transport on passenger aircraft are permitted in the kits. Those requiring temperature control are forbidden. Packing group PG II or III is assigned according to the criteria for Class 3, applied to the base material.
