

INTERNATIONAL CIVIL AVIATION ORGANISATION

EUROPEAN AIR NAVIGATION PLAN

Volume II, PART III – CNS

SUPPLEMENT

TABLE AFS-3

ATM GROUND VOICE NETWORK DATABASE (AGVN)

Issued by Eurocontrol – December 2024

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of ICAO concerning the legal status of any country, territory, city or area of its authorities, or concerning the delimitation of its frontiers or boundaries.

NOT TO BE USED
FOR OPERATIONAL PURPOSES

1. GENERAL

1.1 Table AFS-3 is a Supplement to the European Region Air Navigation Plan, Volume II, Part III - CNS (ICAO Doc 7754).

1.2 The Table depicts existing and planned international connectivity in support of ATS direct speech communications.

1.3 The above information is collected in the frame of the EUROCONTROL AGVN database and regularly updated by States.

2. EXPLANATION OF THE TABLE

Column Heading	Explanation
Local ATS Unit	Local ATS Unit Location Indicator (ICAO Doc 7910 refers)
Remote ATS Unit	Remote ATS Unit Location Indicator (ICAO Doc 7910 refers)
Type of Circuit	L – Landline M – Multiplexer N – Network R – Radio S – Satellite
Type of Connection	ATS – QSIG ATS – QSIG E1 LB MCF – R2 VoIP Other (in this case the type shall be described in the remarks field).
No. of Connections	The total number of connections that serve the particular ATS units (main & back up, of the same type).
Status of Implementation	I - Implemented, for circuits that already operate. P - Planned, for circuits that are planned to operate in the near future. If the implementation date is known, shall be indicated in brackets in the Remarks field.
Remarks	Free Text. (e.g. description of a type of connection other than those specified, implementation date of a planned connection, or any other comments that might be useful.

3. ABBREVIATIONS

ATS	Air Traffic Service
AGVN	ATM Ground Voice Network
LB	Local Battery
MFC-R2	Multi Frequency Coding using the R2 signaling system
QSIG	Signaling at the “Q” reference point (also known as private signaling system number 1)
VoIP	Voice over IP
