

EUR Doc 028 (ATN NSAP addresses) changes log

Version1, 05/09/2023

This log provides information on the changes introduced between successive versions of the published ATN NSAP address registry document. It identifies the Ground Facility Designator codes for the centres for which a change has occurred. The full address information is provided in the appropriate row in the tables of Appendix A of the ATN NSAP Registry, Doc EUR 028.

The information covers, for each new version of EUR Doc 028 (starting from version 6.0 published in 2016), the list of the GFD codes of the ground centres for which the ATN NSAP address was:

- introduced (or confirmed) for the first time
- removed, or
- modified

The provided information also identifies in which part of the EUR Doc 028 Appendix A, the change has occurred (i.e. A1, A2-1, ...). This information is provided to support industry and operators in facilitating the analysis and identifying any need for updates on the available and/or loaded avionics databases of ATN NSAP addresses.
