

EUR.RMT.0020* Oversight capabilities/focus areas

To further strengthen the oversight capabilities, CAA should address the following systemic focus areas:

(a) Availability of adequate personnel in CAAs

States to ensure that adequate personnel is available to discharge their safety oversight responsibilities;

(b) Cooperative oversight in all sectors

States to ensure cooperation where the oversight of an organisation involves more than one State, to ensure that those activities are adequately overseen, either with or without an agreed transfer of oversight tasks.

(c) Organisations' (safety) management system in all sectors

States to foster the ability of CAAs to assess and oversee the organisations' (safety) management system in all sectors. This will focus in particular on safety culture, the governance structure of the organisation, the interaction between the risk identification/assessment process and the organisation's monitoring process, the use of inspection findings and safety information such as occurrences, incidents, and accidents. This should lead CAAs to adaptation and improvement of their oversight system.
