

EUR.RMT.0072	Technical requirements and operating procedures for airspace design, including flight procedure design
---------------------	---

Development of the necessary organisational and technical requirements on airspace design. Basically, the scope of the task is to establish the requirements for the design of flight procedures and ATS routes, to support the implementation of PBN operations and evaluate the need for extension to other airspace structures and flight procedure design. This will include an analysis of the need to include procedures for airspace design in the ATM/ANS certification scheme.

Status	<i>ongoing</i>
