

EUR.RMT.0082	Development of requirements for groundhandling and promoting safety management
---------------------	---------------------------------------------------------------------------------------

Develop a regulatory framework and guidance for the safety of ground handling.

This shall consider operational requirements, organisational requirements and authority requirements, as deemed necessary.

Promote safety management in groundhandling, e.g. on the basis of Industry standards, by providing guidance and best practice.

Encourage collaborative safety management among all parties involved in aerodrome operations

Status	<i>ongoing</i>
