

EUR.SPT.0095*	Counter-UAS measures and UAS incident management at aerodromes
----------------------	---

States should support the aerodrome operators, ATS providers and aircraft operators in preventing and managing incidents of unauthorised UAS operations in the vicinity of aerodromes, while at the same time keeping operational disruptions at a minimum.

EASA is acting as the European coordinator of the Counter Drones (C-UAS) Action Plan, with the five objectives to deliver safety promotion and guidance material to educate the public and raise awareness to reduce the misuse of UAS around the aerodromes, to prepare the aerodromes to mitigate such risks, to assess the safety risks and ensure that the C-UAS measures are swiftly considered from a global safety perspective and to ensure an adequate occurrence reporting.

The following material has been already delivered:
