An Agency of the European Union 

An evolving aviation risk landscape

- New safety landscape created by the pandemic
- Conflict zones
- Drones
- Digital aviation increases cybersecurity risks
- Health safety
- ...

GNSS
jamming

An evolving aviation risk landscape

- **Integrated Risk Management** of any risks that might impact the integrity of a flight
- Challenging to implement
- Different cultures and constraints to integrate in the different safety domains but also from different fields (conflict zones, environment, health...)
- Importance of a data driven approach based on information and data sharing

CZIB Publications

EASA Information Notes

Ethiopia (Tigray region), Kingdom of Saudi Arabia, Armenian/Azeri and more recently Afghanistan

European Information Sharing and Cooperation Platform on Conflict Zones

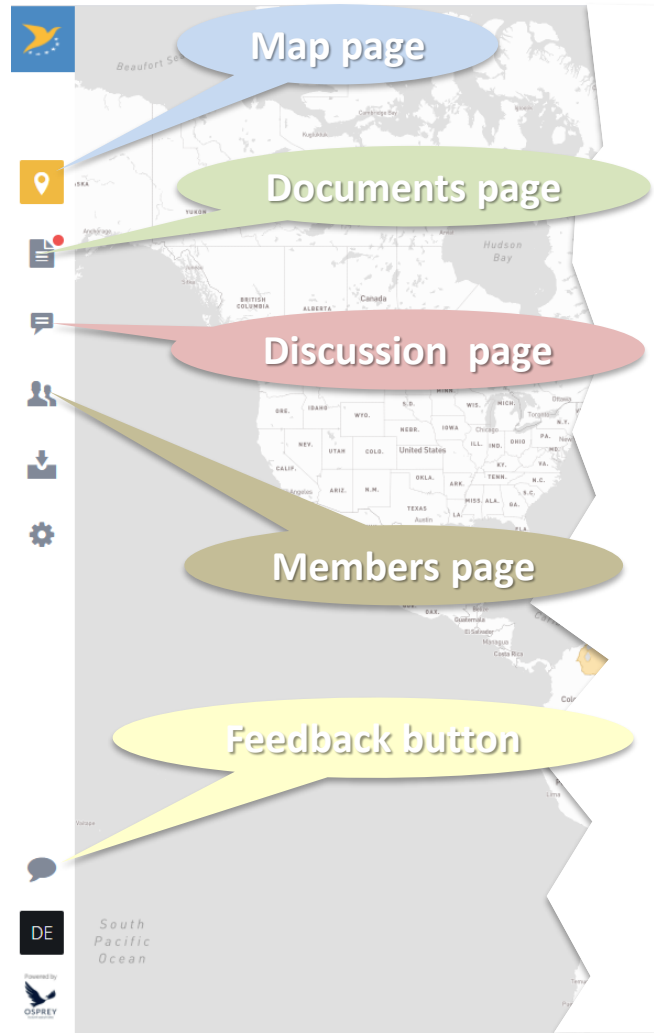

■ Objectives:

- support to the existing EU Conflict Zone Alerting System and particularly the 'Integrated EU Aviation Security Risk Assessment Group'
- improve the availability and swiftness of relevant information exchange
- support EU Institutions, Member States and air carriers in conducting their own risk assessments

■ Membership:

- European Union Institutions and Agencies
- Member States
- Commercial Aviation Operators (AOC issued by EASA, EASA Member States or the United Kingdom)

EASA CZ Platform functionalities

- Reporting on risk and threats on CZ worldwide:
 - *Updated – dynamic - comprehensive & consistent*
- Information sharing:
 - *Regulatory (aeronautical publications issued by Member States) - advisory (alerts)*
- Collaborative platform:
 - Comments – discussions – sharing further information

Conclusions

- New emerging risks are already a reality
- Integrated Risk Management becoming a necessity
- Data capture, information sharing and capacity to analyse as a basis to address emerging risks and future crises events

Safe and secure air travel in Europe and all over the World
