

REGIONAL GREEN AIRPORTS SEMINAR

Hosted by the Ministry of Transport of the Republic of
Uzbekistan

Airport Carbon Accreditation

Alexandre de Joybert

Director of Sustainability at ACI EUROPE

&

Spyros Morisaïos

Director of Operations at Environmental Minds

Tashkent, 8 October 2026

Airport Carbon Accreditation

The only institutionally endorsed global carbon management certification programme for airports

Provides a framework for airports to set emission reduction targets

Aligned to *Greenhouse Gas Protocol & ISO*

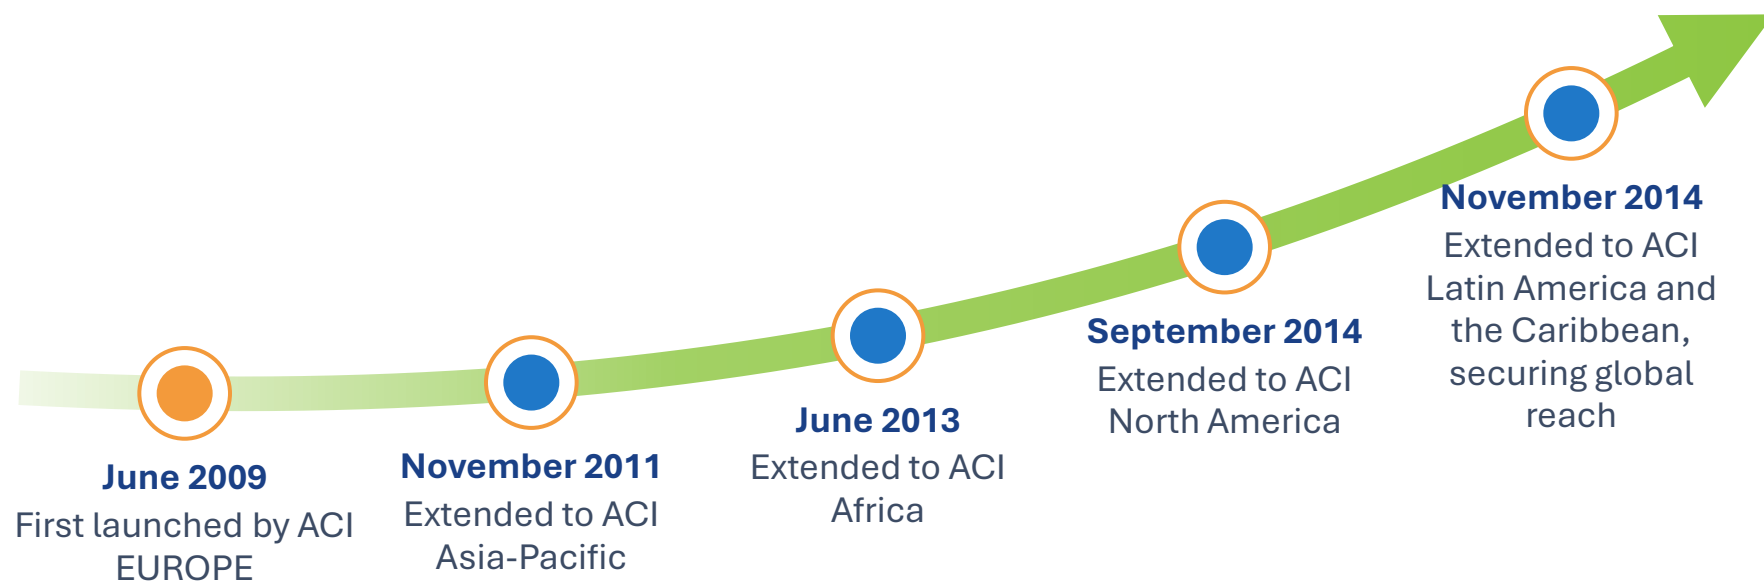

Assess and recognise airports' efforts to manage and reduce their carbon emissions

Programme Evolution

Going Global

Benefits of Accreditation

Provides a framework for airports to identify and manage emission sources

Enables measurable emissions reductions and strategic carbon management

Inspires ambitious carbon reduction initiatives aligned to a common goal

Promotes collaboration and knowledge sharing with stakeholders and other airports

Enhances reputation, credibility, and employee engagement

Improves access to green finance and connects airports to a global sustainability effort

Key Principles

Performance: emissions reductions to be demonstrated as of Level 2

Reductions before offsetting

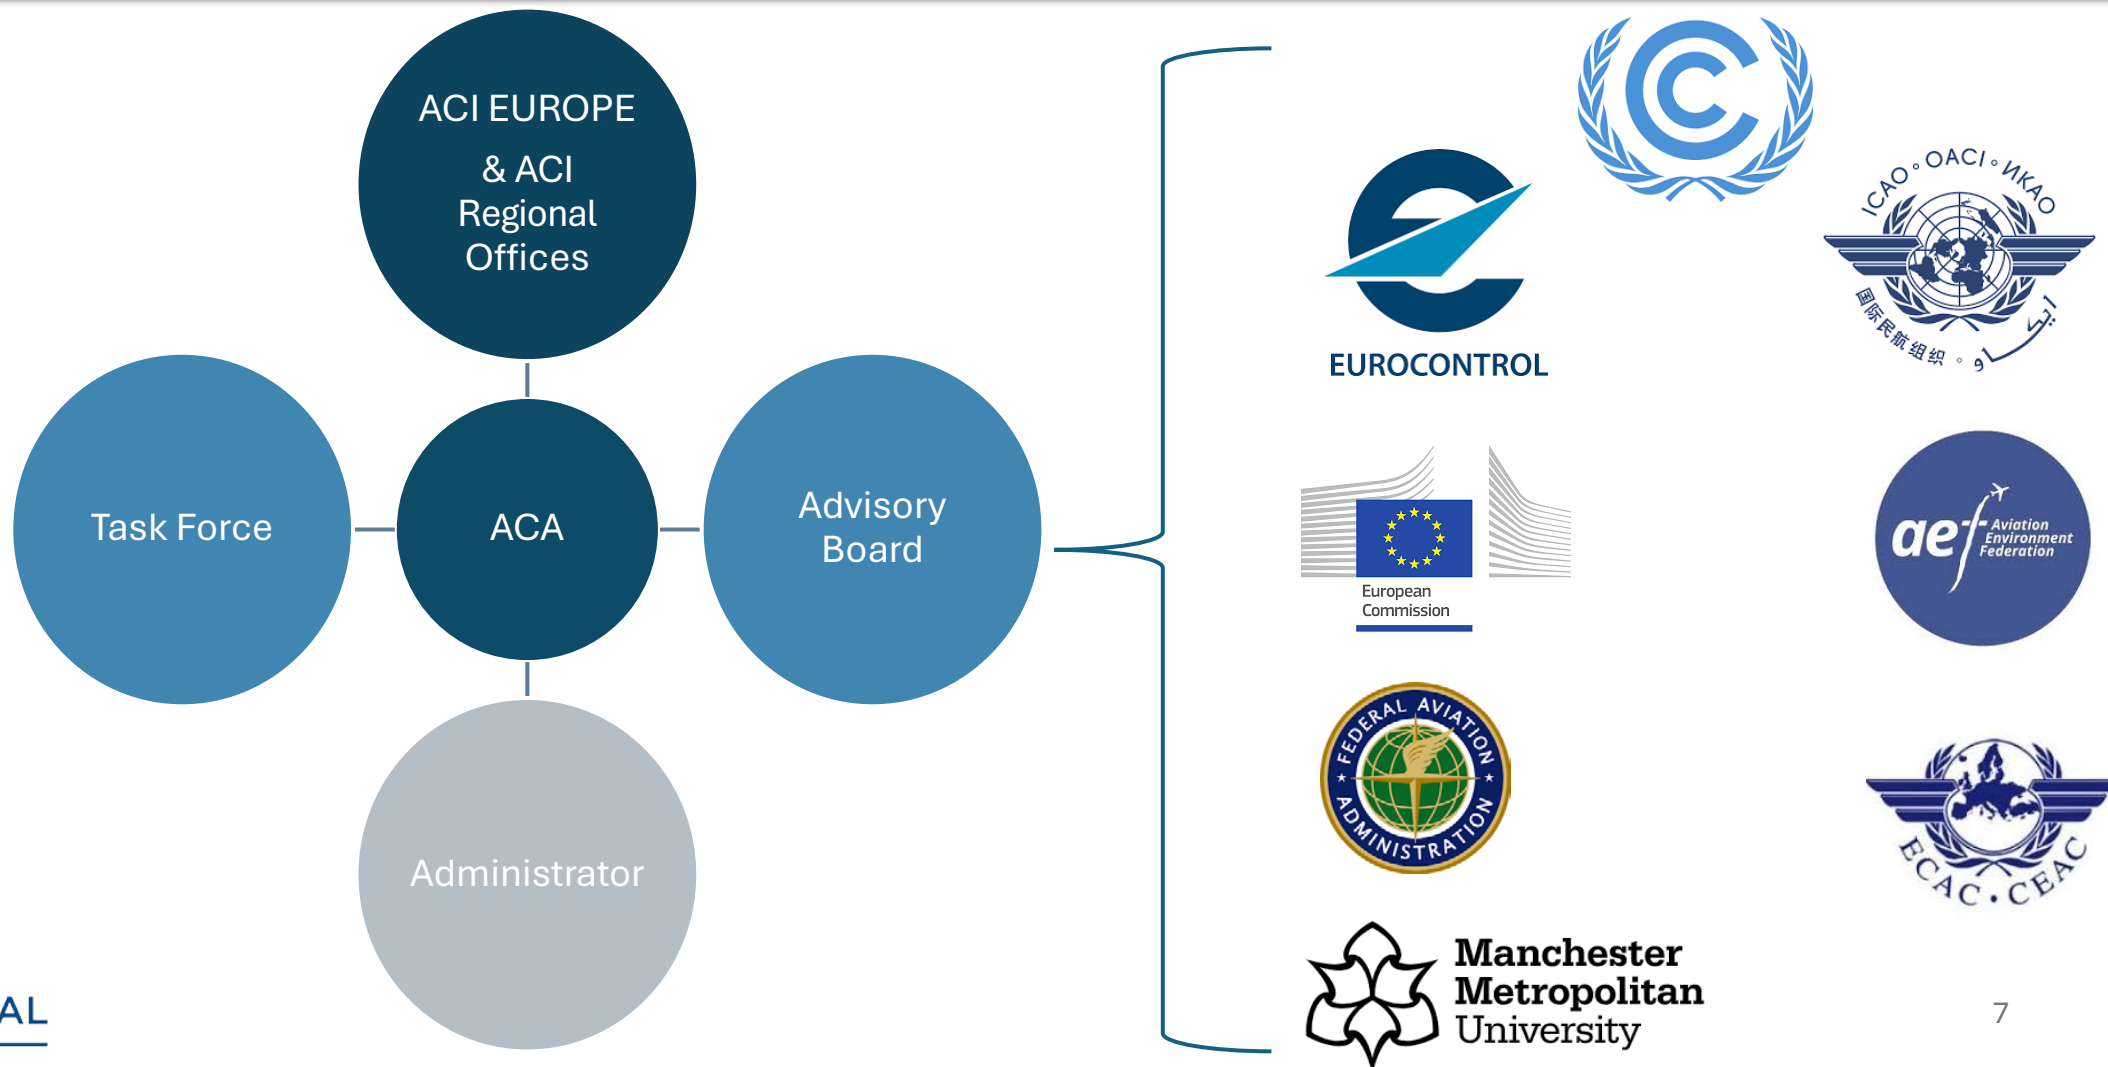

Continuous improvement: yearly/three-yearly accreditation renewals

Extensive assessment of applications: by independent third-party verifiers programme and final review by the the Administrator Environmental Minds

Programme Governance

Administrator: Environmental Minds

Established
2021

Location
Athens, Greece

Focus
Aviation and sustainability projects

Key Project
Administration of *Airport Carbon Accreditation*

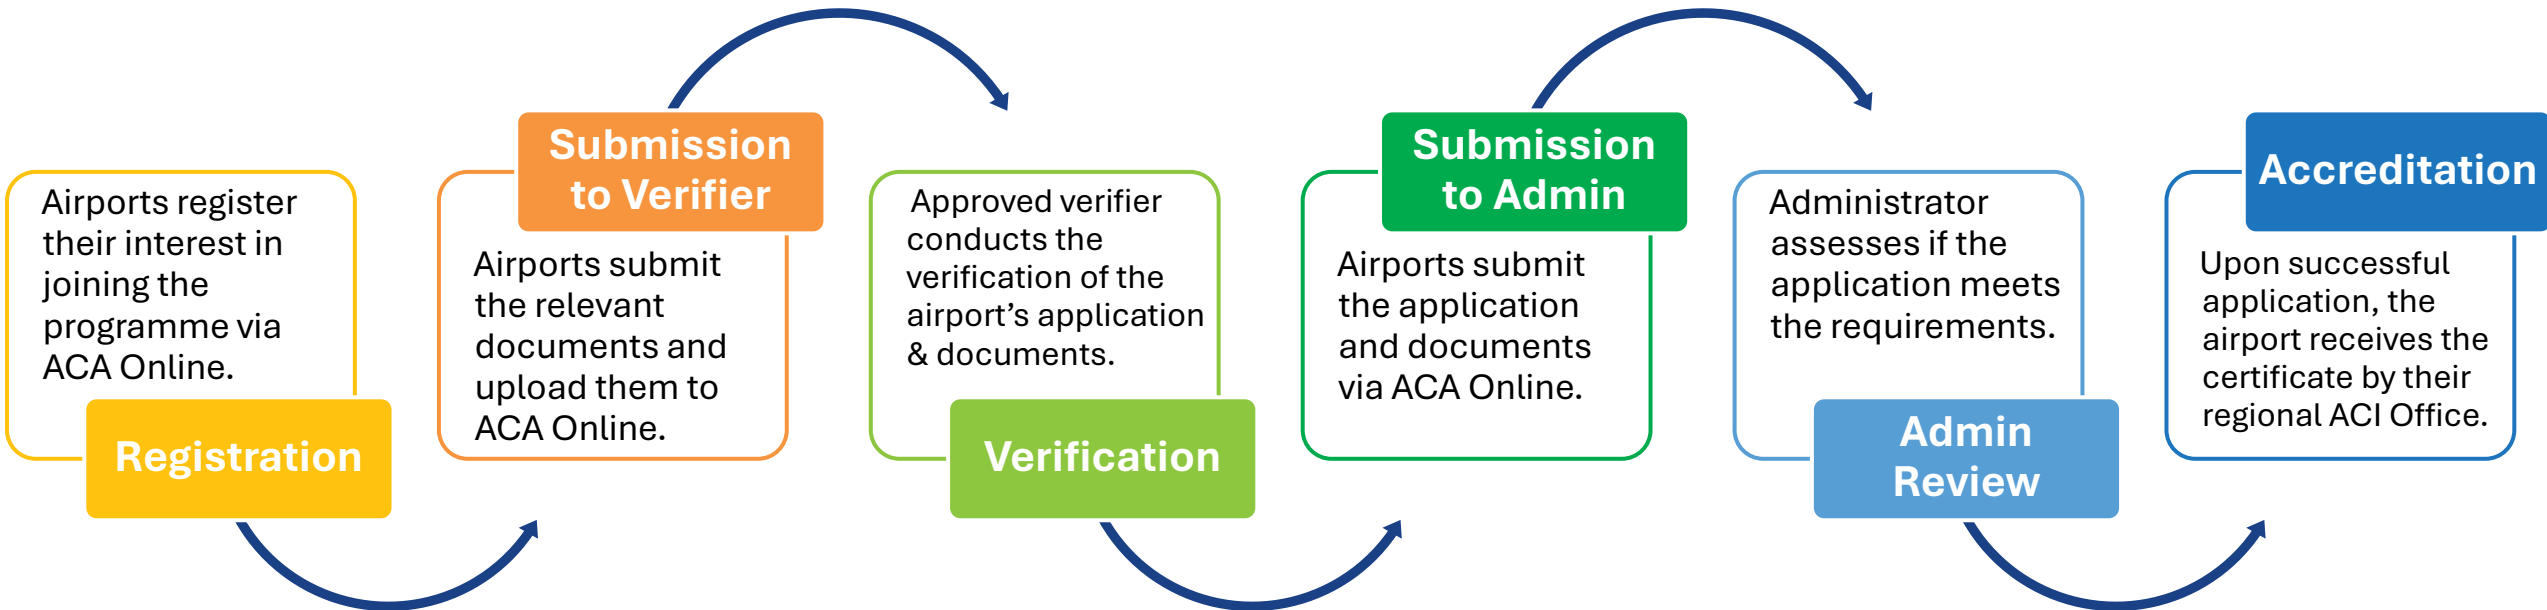

Portfolio

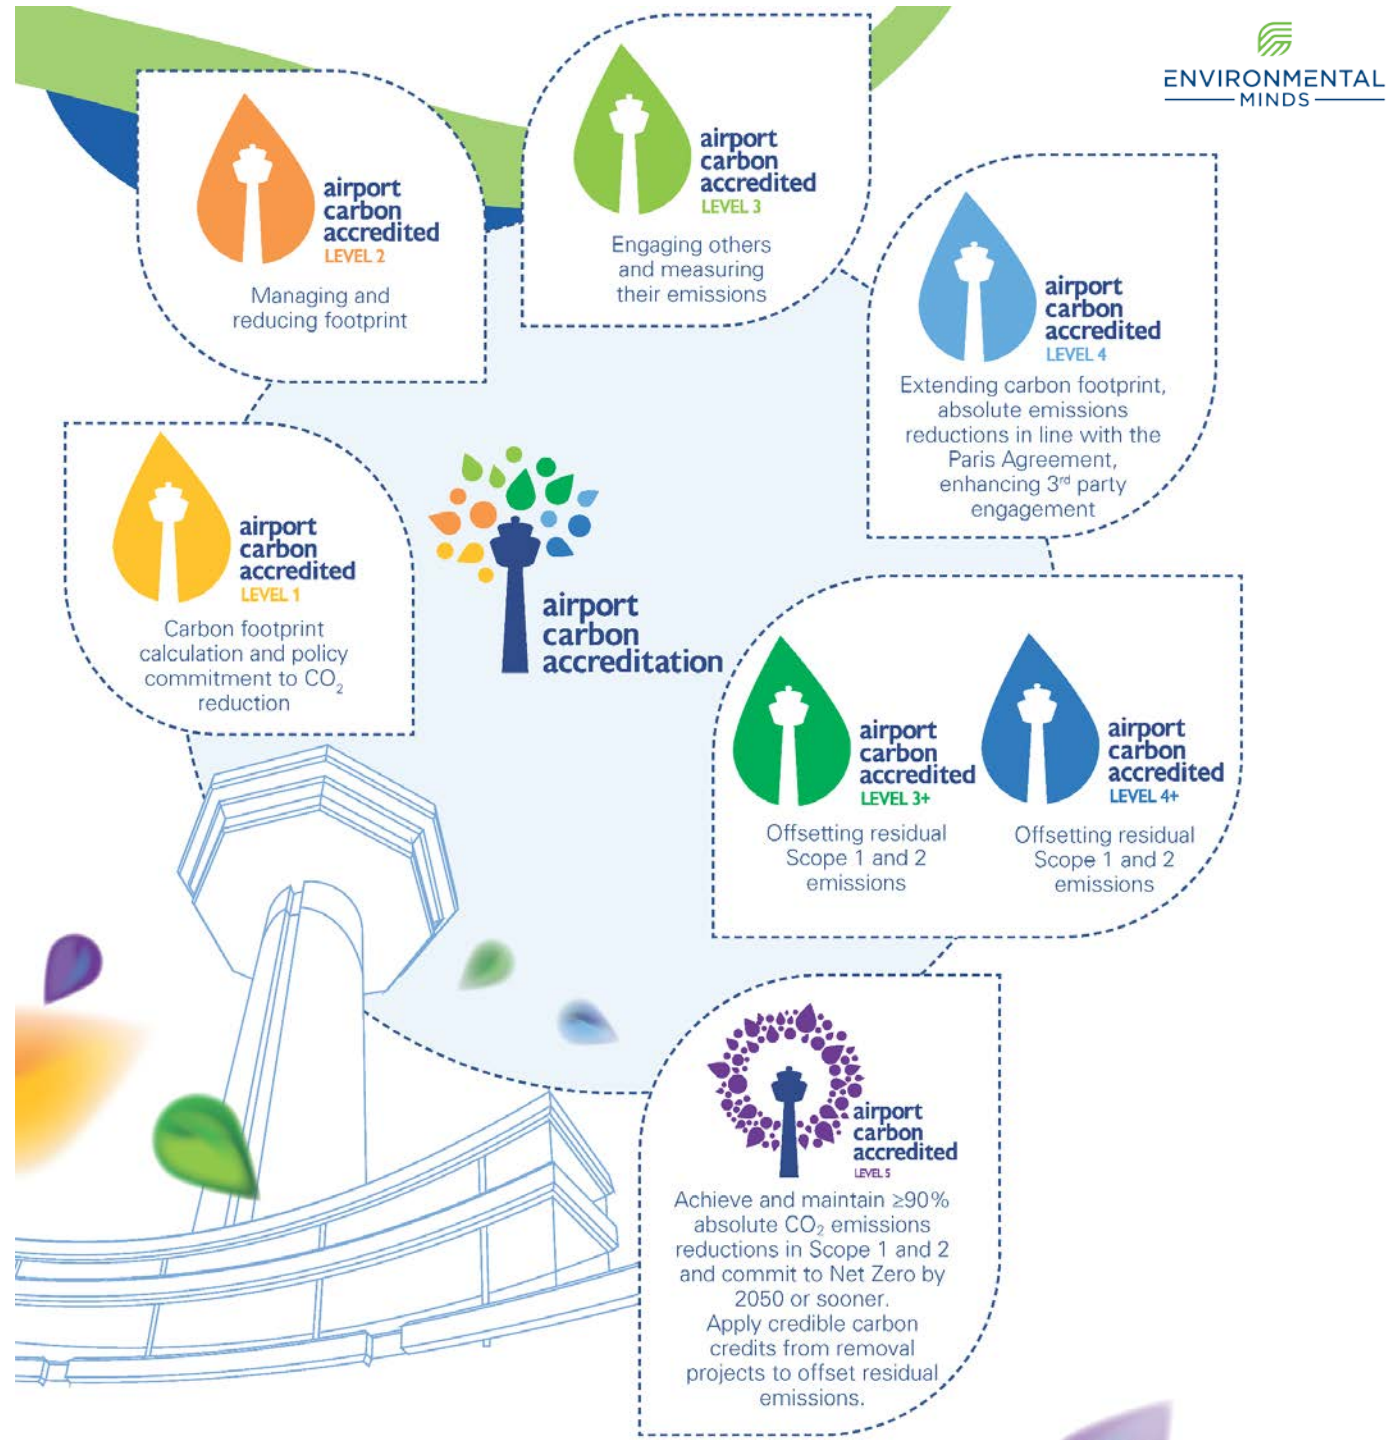

مطار الملك سلمان الدولي
King Salman International Airport

Airport Partner Carbon Recognition

- *Airport Partner Carbon Recognition* is a voluntary programme under *Airport Carbon Accreditation*.
- Designed for *Airport Service Providers* (ASPs) to be recognised for their efforts in managing and reducing their GHG emissions.
- Aims at strengthening the relationship between airports and their ASPs, particularly in reducing the airport's Scope 3 emissions and the ASPs Scope 1 and 2 emissions.
- Offers three levels, Bronze, Silver and Gold, each with its own requirements and operating on a three-year cycle.

Thank You
