CERTIFICATIONS

ISAGO
IATA Safety Audit for Ground Operations

Alyzia was one of the first ground handling companies to obtain the ISAGO certification in 2012 in both Parisian airport platforms (Roissy CDG and Orly), renewed in 2021 and more recently at its provincial platforms.

In September 2013 we obtained the Quality, Safety and Environment certification (ISO 9001 - 14001 - 45001) which was renewed in 2021 and acknowledges Alyzia's investment in steady improvements.

Recently, Groupe3S Alyzia was awarded the Gold Medal by ECOVADIS for its CSR performance, placing it among the highest ranked companies.

These certificates have allowed Alyzia to put the greatest value on the quality, safety and environment to increase client satisfaction, to optimize human resources management, to preserve airport safety, health and safety at work and to control the impact of our company's activity on the environment.

Our business approach provides an excellent management tool allowing Alyzia to offer an outstanding efficiency, professionalism and competitive pricing to all of our clients and partners.

The helicopter is now an integral part of the aeronautical landscape. These machines are becoming more sophisticated and special measures are integrated to ensure the safety of pilots and passengers. The ARFFS must be trained to these measures to be in capacity to intervene of the best conditions of safety..

Our new simulator is equipped with 5 fire points and a smoke generator. Exercises may focus on extinguishing or removing pilots and passengers
