Detection Processing | Export

1. Plan

2. Fly

3. Process & Share

Mission 1 - Alpine Rescue Service of the Italian Finance Police - Chiavenna Valley, IT (15-16th July)

When traditional search efforts yielded nothing, WingtraSAR.ai identified areas of interest — giving teams a clear focus as time was running out.

Mission 2 - Guardia Civil - Ordesa y Monte Perdido National Park, ES (18-19th July)

Across a vast stretch of the Pyrenees, WingtraSAR.ai carried out the wide-area search in place of a helicopter — freeing that critical resource for other urgent tasks.

WingtraSAR.ai

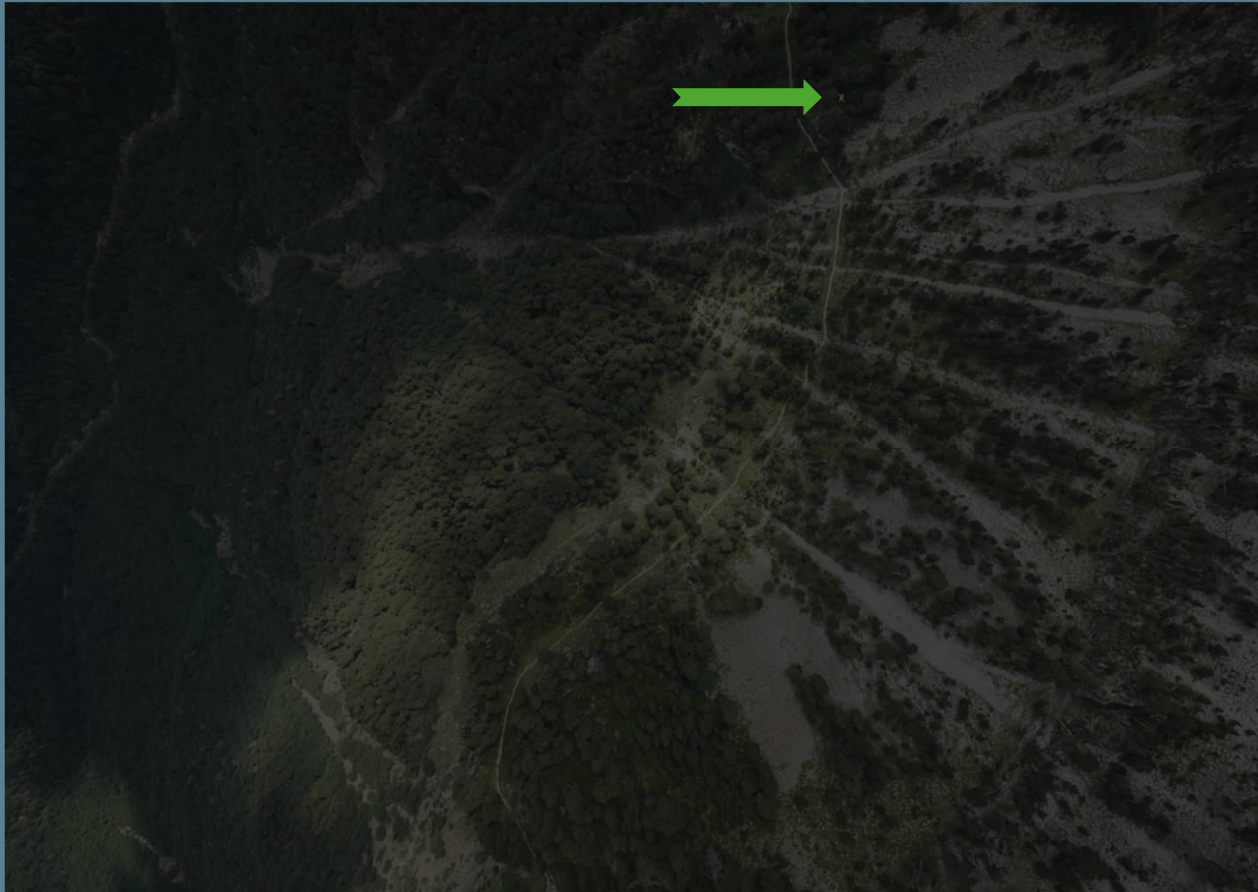

Search Smarter. Rescue

In minutes, SAR.ai scans hundreds of hectares — covering terrain faster and more completely than helicopters or ground crews.

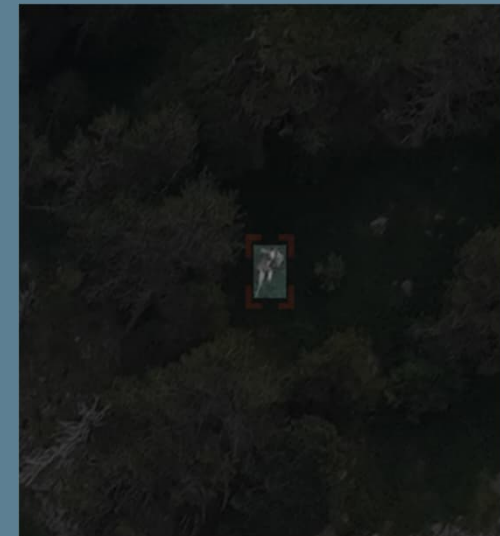

WingtraSAR.ai

Search Smarter. Rescue

**WingtraSAR.ai
pinpoints subjects
hidden from human
view — even in
shadows, foliage, or
complex terrain.**
