

Annexes 2 and 3 not available in soft copy. They can be obtained from Mr. C. van Belleghem

APPENDIX H

ANNEXES 2 AND 3 TO THE SADIS USER GUIDE

Introduction

The SADIS User Guide (SUG) Annexes 2 and 3 derived from the MOTNEG BMG OPMET Catalogue, version 20/5/99. The tables have been created from this catalogue by a selection on a number of fields containing the SADIS related information:

- The column User Requirements (SA_Urq, FC_Urq and FT_Urq) is derived from the actual SADIS SUG Annex 1.
- The column SADIS (SA_Sds, FC_Sds and FT_Sds) should contain the actual program that is currently broadcast on SADIS. This field was initially filled with the actual SADIS SUG Annex 3 but due to a number of discrepancies this information has been replaced by the European distribution and by the Interregional distribution program which was a more accurate definition of the actual SADIS broadcast.

This definition could now be further refined by the inclusion of the actual SADIS Uplink Routing table and a SADIS Broadcast Monitoring analysis that shortly will be carried out.

Legend of the report oriented table

Station	Aerodrome ICAO Location Indicator
Description	Name of the Station - automatically derived from an electronic version of ICAO Doc 7910 — <i>Location Indicators</i> (January 1999)
Iata	Aerodrome IATA Location Indicator
SA_Urq	Y indicates the User Requirement (SUG Annex 1) for the SA-Report of the concerned station
SA_Sds	Y indicates That the SA-Report of the concerned station belongs to the SADIS broadcast.
FC_Urq	Y indicates the User Requirement (SUG Annex 1) for the FC-Report of the concerned station
FC_Sds	Y indicates That the FC-Report of the concerned station belongs to the SADIS broadcast
FT_Urq	Y indicates the User Requirement (SUG Annex 1) for the FT-Report of the concerned station

FT_Sds	Y indicates That the FT-Report of the concerned station belongs to the SADIS broadcast
SA-FC- FT-Bulletins	The bulletin headers in which the concerned reports is contained.
