**The Third Meeting of the ATS Route Network Review Task Force
(ARNR/TF/3)**

Bangkok, Thailand, 2 – 3 May 2005

Agenda Item 6: Development of the ATS route master database

ESTABLISHMENT OF ATS ROUTE MASTER DATABASE

(Presented by the Secretariat)

SUMMARY

This paper provides completed ATS routes master database prepared by the ICAO Asia and Pacific Regional Office. The States which have not submitted the data are still encouraged do so as soon as possible.

Action by the ARNR/TF/2 is at paragraph 3.

1. INTRODUCTION

1.1 APANPIRG/15 tasked ARNR/TF to thoroughly review and update the ATS routes in the *Basic Air Navigation Plan* (Doc 9673), prepare the master database of the routes that had been implemented, update the five-letter name-codes and co-ordinates that had been assigned to the significant points on the ATS routes, and undertake a study of future route requirements.

2. DISCUSSION

2.1 At the First Meeting of the ARNR/TF (Bangkok, 6-10 September 2004), the participating States were requested to submit the data on ATS routes and significant points in their FIR. A diskette containing the ATS route master database was distributed to the States, and the States were requested to update the data as necessary and return it the Secretariat.

2.2 ARNR/TF/2 was advised by the Secretariat that only ten States had submitted the data. ARNR/TF/2 urged States to provide the data, which was essential to ensure that the BANP entries and Route Catalogue details accurately recorded the routes implemented by States.

2.3 States which have not submitted the data are urged to submit them to the Secretariat. In addition, as the data collection is ongoing process, States which have submitted the data are requested to update the data periodically.

3. ACTION BY THE MEETING

3.1 The meeting is invited to:

- a) note that the ATS route master database has been set up;

- b) urge States to submit their data on ATS routes in use to the regional Office as soon as practicable; and
- c) request States who have already submitted data to continue to up date the database periodically (at least once per year not later than end of April) of any changes and submit this information to the Regional Office.
