

FACILITATION PANEL (FALP)

FOURTEENTH MEETING

Montréal, 20 to 24 April 2026

Agenda Item 4: Reports of the Facilitation Panel's Working Groups

REPORT OF THE WORKING GROUP ON ACCESSIBILITY IN INTERNATIONAL CIVIL AVIATION (WGAA)

(Presented by the Rapporteur of WGAA)

REVISION NO. 1

SUMMARY

This paper presents the report of the Working Group on Accessibility in International Civil Aviation (WGAA) in line with its mandate to develop a Strategy on Accessibility in Aviation for Persons with Disabilities and Reduced Mobility. The paper proposes a draft Strategy, establishing a holistic, rights-based approach aligned with the United Nations Convention on the Rights of Persons with Disabilities. It also proposes a draft Compendium of national regulations, statutes, and policies based on States' responses to an online survey mirroring relevant Annex 9 – *Facilitation Standards and Recommended Practices (SARPs)*.

Action by the FAL Panel:

The FAL Panel is invited to consider the proposals presented in paragraph 3 of this working paper.

1. INTRODUCTION

1.1 Persons with disabilities make up a significant and growing percentage of the world's population and constitute the world's largest minority. The World Health Organization (WHO) reports that this number is increasing through population growth, medical advances, and the ageing process. Aviation, like all other transport modes, needs to recognise and accommodate this growing passenger segment. Persons with disabilities have the same international rights as other citizens, such as accessibility, and full and effective participation and inclusion in society, including freedom of movement and freedom of choice (United Nations Convention on the Rights of Persons with Disabilities (CPRD), articles 3.c and 3.f). Persons with disabilities should have equivalent access to air travel. In this context, it is important to render accessibility in aviation for all passengers worldwide, particularly those most vulnerable, such as those with disabilities. However, there are barriers that prevent persons with disabilities and reduced mobility from utilizing international air transportation services to their full potential.

1.2 The Air Transport Committee during its 230th Session, on recommendation of the Facilitation Panel (FALP), approved the Terms of Reference (ToR) establishing the Working Group on Accessibility in International Civil Aviation (WGAA), led by the FALP Member from Canada. The WGAA is mandated to undertake tasks in line with relevant provisions in Annex 9 — *Facilitation*, and ICAO Assembly Resolution A41-15, *Accessibility in international civil aviation*, which include inter alia, developing a Compendium of regulations, statutes, and policies relating to accessibility in aviation, and a Strategy on accessibility for passengers with disabilities and reduced mobility in order to reach for a disability-inclusive air transport system, in cooperation with all stakeholders.

1.3 The Doha Declaration on Facilitation of International Air Transport adopted by the High-level Ministerial Segment of the Facilitation Conference held in Doha, Qatar, in April 2025, urges States, ICAO, international and regional organizations and other stakeholders to prioritize the inclusion and accessibility of air transport services to persons with visible and non-visible disabilities and reduced mobility by ensuring their involvement in decision-making processes, fostering data collection and sharing, and advancing personnel training, among other efforts to achieve a disability-inclusive air transport system.

2. DISCUSSION

2.1 Pursuant to its mandate and work programme, the WGAA has advanced its mandate through a series of virtual meetings, most recently in January 2026, resulting in the development of a draft Strategy on accessibility in aviation, and a draft Compendium of regulations, statutes and policies relating to accessibility in aviation. The WGAA also discussed during its meetings, a review of progress on proposed amendments to relevant Annex 9 Standards and Recommended Practices (SARPs), a work programme for ongoing and potential new tasks, including improving tracking of deliverables and deadlines, and coordination with other ICAO expert groups and relevant international organizations.

2.2 The WGAA following deliberations at a series of meetings has agreed on a draft ICAO Strategy on Accessibility in Aviation for Persons with Disabilities and Reduced Mobility (Appendix A refers). The draft Strategy establishes a holistic vision for global accessibility across all ICAO activities related to passenger travel, aligned with the Convention on the Rights of Persons Disabilities (CRPD). It identifies key elements such as prioritizing accessibility in ICAO's strategic work, ensuring dignified travel, strengthening international cooperation and capacity building, integrating technological innovation, and embedding the participation of persons with disabilities in all decision making, as appropriate.

2.3 The Strategy further identifies focus areas to assist ICAO to meet the Mission of the Strategy, including the need for regulatory enhancements and awareness and training, including capacity building, and identifies areas of responsibility for ICAO, Member States, Industry (including aircraft manufacturers) and international groups representing persons with disabilities, who must be included in the decision and policy making process, fully respecting the principle of "nothing about us, without us".

2.4 In line with the Facilitation Panel's mandate to continue to advance accessibility in aviation for persons with disabilities and to develop a Compendium on States' regulations, statutes and policies related to accessibility in aviation, the WGAA with the support of the Secretariat conducted an online survey that mirrored relevant Annex 9 SARPs in order to collect relevant information to develop the Compendium. The results of the survey were used to develop the proposed draft Compendium of regulations, statutes and policies relating to accessibility in international civil aviation (Appendix B refers). While a total of 85 surveys (electronic and hard copy) were received, the current compendium encompasses data from the 68 that were submitted electronically. The WGAA will prioritize the update of the Compendium to include the data from the hard copy surveys.

2.5 The draft Compendium reflects States' responses to the survey questions and provides information regarding the respective Member States' provisions relating to accessibility in aviation. It also provides summaries to existing regulations or best practices that exist in different Member States, and identifies common trends that will provide ICAO with baseline information on existing best practices or identified gaps. Considering the evolving aviation environment and the potential impact on the transport of persons with disabilities and reduced mobility, the information contained in the draft Compendium, must be continuously reviewed and updated, accordingly, to ensure it remains current and relevant.

2.6 The WGAA will examine the development of a new Survey and Compendium template for more simplified information gathering and sharing. The WGAA and the ICAO Secretariat will investigate the possibility of creating a web-based portal for efficient information gathering and sharing.

3. **RECOMMENDATIONS**

3.1 The FAL Panel is invited to:

- a) encourage their respective States to continue to participate in and support the work of the WGAA;
- b) review the proposed draft ICAO Strategy on Accessibility in Aviation for Persons with Disabilities and Reduced Mobility at Appendix A and recommend the Secretariat process internally, for approval, as appropriate;
- c) review the proposed draft Compendium of regulations, statutes and policies relating to accessibility in aviation at Appendix B, and recommend the Secretariat process internally, for approval, as appropriate; and
- d) approve that the WGAA include in its work programme, to continue to update the Compendium as necessary, with the support of the ICAO Secretariat to ensure it remains current and relevant.

A VISION FOR GLOBAL ACCESSIBILITY	3
Mission.....	5
Key Elements	5
Focus Areas	9
Roles and responsibilities for implementation.....	11
Assistance with Implementation.....	12

A VISION FOR GLOBAL ACCESSIBILITY

Persons with disabilities and reduced mobility represent an important segment of air travel demand and a growing proportion of the world's population. This has contributed to increased diversification in the travel products and services offered by the aviation sector. The World Health Organization (WHO) estimates that over 1.3 billion individuals live with some form of disability, representing around 16% of the global population. Additionally, as the population ages, the percentage of people with disabilities is expected to increase.

Disabilities include any impediments that are permanent, temporary or episodic and could include physical, mental, intellectual, cognitive, learning, communication or sensory impairment, whether evident or not, that in interaction with various barriers may hinder a person's full and equal participation in society. Persons with disabilities may decide not to travel by air, or travel less, due to the barriers they might face during the course of their journeys.

Both Member States and industry have demonstrated a strong commitment to improving accessible air transport for persons with disabilities. While Annex 9 establishes a global facilitation framework, accessibility-related regulations are primarily implemented through individual jurisdictions. Achieving significant progress will require strengthened alignment and coordination across Member States through that global framework.

The United Nations (UN) Convention on the Rights of Persons with Disabilities (CRPD) requires its parties to take appropriate measures so that persons with disabilities have access, on an equal basis with others, to the physical environment, to transportation, to information and communication including information technologies and systems, and other facilities and services open or provided to the public both in urban and rural areas. The CRPD has also identified the need for international cooperation to create a legislative framework with a concrete, enforceable and time-bound benchmark for monitoring the gradual implementation of accessibility for all.

With the aim to adhere to the CRPD and create consistency in the application of policy, standards products and processes, ICAO General Assembly Resolution A42-14 has mandated the ICAO Council to develop an effective strategy and work program on accessibility for passengers with disabilities. Additionally, the ICAO Strategic Plan 2026-2050 has identified the strategic goal of: Aviation Delivers Seamless, Accessible and Reliable Mobility for All. This strategic framework should be aligned with other ICAO and UN accessibility initiatives, such as the CRPD with the objective of protecting and ensuring the full and equal enjoyment of all human rights and fundamental freedoms for all persons with disabilities, including freedom of movement and freedom of choice.

Recognizing the multi-faceted and multi-disciplinary nature of advancing accessibility in the air transportation system, and its impact on the passenger travel experience, it is imperative for ICAO to develop a common vision and define a global Strategy on Accessibility. ICAO's vision for global accessibility would support the civil aviation sector in facilitating access to air travel for persons with disabilities.

This can be achieved through:

- Member States recognizing their obligations under the Convention on International Civil Aviation (Chicago Convention) to ensure the provision of an accessible air transportation system;
- All civil aviation stakeholders committing to further develop a seamless transportation system;
- A commitment to prioritize a holistic approach to accessibility in all parts of ICAO's mandate, aligned with UN accessibility initiatives, such as the CRPD, Assembly Resolution, the ICAO Strategic Plan 2026-2050 and the Doha Declaration; and
- The participation and contributions of persons with disabilities in the development of policies intended to address their access needs.

Mission

Facilitate the adoption and implementation of international standards and recommended practices (SARPs), procedures, policies, tools and services that ensure accessibility in aviation, promote the rights of persons with disabilities, and foster a culture of inclusion across the global aviation industry, in close collaboration with persons with disabilities, industry and with other organizations to carry out this mission.

Key Elements

This strategy aligns with other ICAO and UN initiatives to protect and ensure the full and equal enjoyment of all human rights and fundamental freedoms by all persons with disabilities, including freedom of movement and freedom of choice. The strategy will be achieved through a series of actions contained in a framework built on ensuring that:

1. ICAO identifies accessibility as a strategic priority across all aspects of its mandate, including safety;
2. Dignified travel for all persons is facilitated throughout the travel journey;
3. International cooperation and participation exists, including capacity building for training and outreach, to ensure that no country is left behind;
4. Technological advances are considered including for infrastructure and design ; and
5. The involvement of persons with disabilities is a prerequisite for decision making.

1. Accessibility as an ICAO Strategic Priority:

- i. In order to ensure the freedom of movement by all people, ICAO recognizes accessibility as a strategic priority.
- ii. ICAO recognizes that accessibility matters be considered holistically for all issues under ICAO's mandate related to passenger travel, including when reviewing matters related to, but not limited to, safety and security.

- iii. The aviation industry's long-standing safety culture—built over decades through close collaboration between airlines, regulators, and industry partners—is the cornerstone of all operational and regulatory decisions.
- iv. Enhancing accessibility for passengers with disabilities is an essential objective; and must be pursued in a manner that fully preserves the safety of operations. The industry's exemplary safety record is a critical element of passenger protection, including for passengers with disabilities.
- v. Regulations and standards establishing the rights of passengers with disabilities should uphold and reinforce the industry's high safety standards, ensuring that accessibility and safety remain mutually supportive priorities.

2. Facilitating dignified travel for all persons:

- i. The need to provide equal access to air transportation for all passengers, including by using new technologies to support an accessible air travel system.
- ii. Accessibility should be integrated in the design, development and then implementation of a policy, program, service or procurement as far as it is feasible.
- iii. Ensure that services and infrastructure are available to all, regardless of a person's disability-related needs.
- iv. The aviation sector must be capable of safely transporting mobility aids, supported by clear, consistent standards that address safety considerations and ensure that any operational constraints are transparently communicated to passengers and service providers in advance of travel.
- v. Enhancing accessibility or accommodating disability-related needs should not result in financial barriers for persons with disabilities. All aspects of the travel journey, from booking to completion of travel should be considered.

- vi. Airports and airlines require guidance from regulators, standards bodies, and other relevant stakeholders to support the consistent application of accessibility best practices and application of safety principles.
- vii. Accessible aircraft and airport design and infrastructure must be considered when developing best practices.
- viii. Ensure that mandatory training for aerodromes and airline personnel is tailored to their specific functions and includes accessibility-related topics such as infrastructure and services availability, the care and safe and secure handling of mobility aids, safe transfer and loading techniques, effective communication, boarding assistance, and sensitivity training for all personnel involved, including decision makers and service developers.

3. International cooperation and capacity building:

- i. Striving for a seamless air transportation system across borders, there is a need for consistent application in air transport accessibility regulations, standards and procedures, to the greatest extent practicable. ICAO is the appropriate global forum to engage Member States.
- ii. There are effective SARPs and guidance materials that reflect current and new best practices.
- iii. Member States must ensure that appropriate legislation and regulations are developed and applied in accordance with ICAO provisions.
- iv. ICAO to facilitate and promote events to serve as a platform for knowledge exchange between Member States, stakeholders and representatives of persons with disabilities and other relevant stakeholders.
- v. ICAO should encourage Member States to develop programs to assist other Member States in developing their capacity to advance accessibility.
- vi. Mandatory training must be developed to ensure all service providers including aerodromes are aware of the needs of travellers and how to provide appropriate assistance to meet their needs.

- vii. Advice and support should be provided to Member States to facilitate their adoption of SARPs.

4. Adoption of technological advances:

- i. Adoption of advanced or emergency technologies could contribute to better experiences for the travel journey of persons with disabilities. A few examples could include autonomous wheelchairs, beacons, assistive devices and virtual reality tours of airports.
- ii. Need to recognize and mitigate the potential that increasing reliance on digital solutions, such as mobile phones and biometric processes, may create a “digital divide”, where travel is simplified for many but harder for others.
- iii. Development and implementation of technology should consider the universal design principles to ensure that no unintended barriers are created by removing others.
- iv. Accessibility must be designed from the start. Future strategies must embed universal design principles in aircraft and airport infrastructure planning and ensure that airframers and aerodrome designers are fully engaged, as their role is essential to delivering an accessible end-to-end journey.

5. Participation of groups representative of persons with disabilities:

- i. It is essential that ICAO, Member States, aircraft manufacturers, aerodromes and airlines work closely with groups of representatives of persons with disabilities and other relevant stakeholders.
- ii. The inclusion and participation of such groups in the decision and policy making process, fully respects the principle of "nothing about us, without us", and ensures that decisions being made reflect the needs of the travellers.

Focus Areas

In order to meet the Mission of this strategy, ICAO will address the following focus areas:

Focus Area 1: Enhance Regulatory Framework

Finalize compendium of accessibility regulations and best practices.

Complete a holistic review of all existing ICAO SARPs and guidance materials that impact the transportation of persons with disabilities, including:

Review and update ICAO Annex 9 SARPs to reflect current best practices in accessibility.

Review and update the ICAO Manual on Access to Air Transport by Persons with Disabilities (DOC9984) and any other guidance materials that may impact accessibility.

Promote the adoption of ICAO SARPs related to accessibility.

Focus Area 2: Foster Collaboration and Partnerships

Strengthen collaboration within ICAO, international organizations, NGOs, and industry stakeholders to promote accessibility.

Establish partnerships with organizations representing persons with disabilities to ensure their perspectives are included in policymaking.

Encourage the sharing of best practices and innovative technologies among Member States and industry partners.

Engage with aviation regulatory bodies of Member States to foster consistent application of accessibility standards globally.

Ensure that existing accessibility features incorporated into aircraft and equipment are consistently and effectively utilized by operators.

Explore and adopt assistive technologies (e.g., mobile apps for navigation, communications devices) to enhance accessibility at airports and during flights.

Ensure accessible communication methods for passengers with disabilities to request assistance and provide feedback and offer consistency across the travel journey with multiple modes of communication, including compatibility with assistive technologies.

Focus Area 3: Enhance Awareness and Training

Adopt existing best practices and strengthen accessibility across the passenger journey by developing and implementing targeted training programs for all aviation personnel on accessibility needs and industry best practices.

Launch awareness campaigns to educate the public and industry stakeholders about the importance of accessibility in aviation.

Promote the inclusion of accessibility modules in aviation training curriculums worldwide.

Focus Area 4: Monitor and Evaluate Progress

Develop metrics and indicators to assess the progress of accessibility initiatives.

Establish a reporting mechanism for Member States to share their progress and challenges in implementing accessibility standards and measures.

Conduct regular reviews and updates of ICAO accessibility policies based on passenger feedback and emerging needs.

Roles and responsibilities for implementation

Implementation of this strategy will take place in phases, with a view to gradually layering on to the international aviation system iterative changes that will advance accessibility for persons with disabilities. An implementation plan will be developed in-line with the identified focus areas of this strategy.

The following highlights relevant areas of shared responsibilities and engagement by different participants in the global system.

ICAO: As the recognized international organization of Member States for international civil aviation, ICAO develops policies and standards related to facilitation and accessibility, undertakes compliance audits, performs studies and analyses, develops recommended practices, provides assistance and builds aviation capacity through many other activities and the cooperation of its Member States and stakeholders.

Member States: Commit to prioritize accessibility and recognize their obligations under the Convention on International Civil Aviation (Chicago Convention) to ensure the provision of an accessible air transportation system. They participate in ICAO decision making on accessibility, implement ICAO SARPs, enforce regulatory frameworks in their jurisdictions, and support ICAO and other Member States in their efforts to improve accessibility.

Industry: International air sector associations provide international leadership and coordination of industry efforts to improve accessibility and bring industry expertise on air operations to the work of ICAO. Transportation service providers will prioritize universal accessibility and barrier-free design, and implement accessibility when developing and implementing travel solutions from the outset, rather than adapting and modifying later.

Aircraft manufacturers: Prioritize research and development efforts to expand airplane capabilities and expand industry knowledge. Incorporate inclusive systems engineering principles by embedding subject users in design, testing and validation of engineering solutions. Promote a balance between certification requirements, cabin innovation, industry standardization and operator choice to advance barrier-free air travel. Multiply the value of accessibility solutions to bring benefits to a broader range of passengers beyond those with disabilities contributing to more efficient and inclusive designs.

International groups representing persons with disabilities: Bring the voice and lived experience of persons with disabilities to the work of ICAO on accessibility. Organizations representing persons with disabilities will be engaged and participate during all steps and provide feedback on priorities, actions and impact.

Assistance with Implementation

ICAO will establish a mechanism to provide advice and support to those Member States seeking assistance with the above, including in the development of appropriate training and capacity building to ensure that a consistent level of compliance, service and infrastructure exists to facilitate the travel of persons with disabilities. Member States and stakeholders will be encouraged to support ICAO activities with resources, both financial and in-kind, to ensure a successful implementation of agreed measures to support air transport of persons with disabilities and reduced mobility.

APPENDIX B

**ADVANCING ACCESSIBILITY IN AVIATION
COMPENDIUM**

Advancing Accessibility in Aviation
Compendium

Table of contents

Introduction	4
Questions' details.....	4
Q 1. Does your State have policies, regulations, or statutes giving persons with disabilities equivalent access to air transportation?	4
Q 2. Please indicate whether your policies, regulations, or statutes include the following, as set out in the recommended practices outlined in Annex 9:.....	5
a) Provisions requiring new or refurbished aircraft to conform, where aircraft type, size, and configuration permit, to standards of accessibility with respect to on-board equipment (including movable armrests, onboard wheelchairs, accessible washrooms, and suitable lighting and signs).	5
b) Provisions requiring the transportation of disability aids needed by persons with disabilities at no additional charge.	6
c) Provisions requiring the transportation of service animals needed by persons with disabilities, in the cabin of the aircraft on the floor at the person's feet, at no additional charge.	7
d) Provisions allowing persons with disabilities to travel without providing medical clearance/ a medical certificate.....	8
e) Provisions allowing assistants required by persons with disabilities to travel with them at a discounted price.	9
Q 3. Does your State have a program for validating compliance by airlines and/or airports related to accessibility in aviation?	10
Q 4. Does your State have any policies, regulations, or statutes related to the following issues?	12
a) That airlines and/or airports provide special assistance to ensure passengers with disabilities receive information and services customarily available to the general public. Examples include but are not limited: to safety briefings; accessible inflight entertainment; accessible wayfinding information; and/or accessible kiosks.....	12
b) That airlines and/or airports establish and publish minimum standards of accessibility for persons with disabilities.....	13
c) That airlines and/or airports ensure that persons with disabilities are given the information they need, in communication formats accessible to those with cognitive or sensory disabilities.	14
d) That airlines and/or airports implement training programs to ensure that trained personnel are available to assist persons with disabilities.	16
Q 5. Does your State require airports, airlines, or other entities to provide the following facilities or services?	17

a) Lifting devices, ramps, or other means of assisting persons with disabilities to board and disembark the aircraft when level entry is not available?	17
b) Flight service related information in an accessible communication format for the vision and hearing impaired?.....	19
c) Designated pick-up and drop-off points for persons with disabilities close to the entrances and exits of the terminal building?	20
d) Accessible ground transportation services for persons with disabilities (where access to public transport services is limited)?	21
e) Adequate parking facilities for persons with disabilities?	22
Q 6. Have any service challenges for persons with disabilities, especially in any of the following categories been identified?	23
a) Accessibility of travel related information.	23
b) The transportation of service animals.	24
c) Wheelchair service requests.	25
d) Aircraft accessibility.....	27
e) The transportation of disability aids.....	29
f) Airport accessibility	30
g) Emerging trends.....	31
Q 7. Does your State collect any other data or statistics not covered in question 6 that would be beneficial to this study?	32
Q 8. What other challenges do you face implementing ICAO standards and recommended practices in the area of accessibility in aviation? Please provide a brief summary of any implementation challenges.....	33
Q 9. When developing policies, regulations, statutes, training programs, plans, or reports on accessible aviation, does your State consult any of the following?	34
a) Stakeholders from the community of persons with disabilities.....	34
b) Airports.....	34
c) Airlines.....	34
d) Other	34
If yes, please identify how these consultations are carried out.	34
Q 10. Does your State promote any best practices regarding accessibility in civil aviation?	35
If yes, please provide a description and any available supporting data.	35
Q 11. What measures would be useful to assist States in developing programs for enhancing accessibility, building capacity, and/or in collecting statistical data on accessible aviation?	36

Introduction

During the twelfth Facilitation Panel (FALP/12, 13-23 July 2021) the Panel corroborated the need to continue to advance accessibility in aviation for persons with disabilities.

An online survey was developed, mirroring the relevant Annex 9 SARPs, in order to make Member States provide information to ICAO to support the development of a compendium of regulation, statutes, and policies relating to accessibility in aviation.

The results of the survey - completed on 21 June 2021 - has been used to develop the proposed compendium.

66 States responded to the online survey: Albania, Algeria, Argentina, Armenia, Australia, Belarus, Benin, Bosnia and Herzegovina, Bulgaria, Burundi, Cambodia, Canada, China, Cuba, Cyprus, Czechia, Denmark, Ecuador, Egypt, El Salvador, Eswatini, Finland, France, Gabon, Georgia, Germany, Guatemala, Guinea, Guyana, Hungary, Iceland, Iraq, Ireland, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Macao SAR, China, Malaysia, Mauritius, Mongolia, Netherlands (Aruba), Netherlands (St. Maarten), New Zealand, Nicaragua, Nigeria, Pakistan, Paraguay, , Philippines, Poland, Portugal, Republic of Korea, Republic of Moldova, Russian Federation, Sao Tome and Principe, Serbia, Singapore, Slovenia, Somalia, Sweden, Switzerland, Turkmenistan, Ukraine, United Kingdom, United Republic of Tanzania, Uruguay, Venezuela (Bolivarian Republic of), Viet Nam.

17 States responded to the hard copy survey: Angola, Austria, Azerbaijan, Brazil, Cabo Verde, Chile, Dominican Republic, Italy, Japan, Netherlands, North Macedonia, Norway, Romania, Sudan, Thailand, Türkiye and the United States.

Questions' details

This section presents a summary of the responses received from responding countries to the online survey, organized by question. For additional information regarding each country, please consult Annex A.

Q 1. Does your State have policies, regulations, or statutes giving persons with disabilities equivalent access to air transportation?

Yes: 54 Member States (Algeria, Argentina, Armenia, Australia, Belarus, Bosnia and Herzegovina, Bulgaria, Cambodia, Canada, China, Cuba, Cyprus, Czechia, Denmark, Ecuador, Egypt, Finland, France, Gabon, Georgia, Germany, Guinea, Guyana, Hungary, Iceland, Iraq, Ireland, Kazakhstan, Kyrgyzstan, Latvia, Macao SAR, China, Malaysia, Mongolia, Nicaragua, Nigeria, Pakistan, Paraguay, Philippines, Poland, Portugal, Republic of Korea, Republic of Moldova, Russian Federation, Serbia, Singapore, Slovenia, Somalia, Sweden, Switzerland, Turkmenistan, Ukraine, United Kingdom , Uruguay, Venezuela (Bolivarian Republic of), Viet Nam)

No: 9 Members States (Benin, Burundi, El Salvador, Eswatini, Guatemala, Lithuania, Mauritius, Netherlands (Aruba), Netherlands (St. Maarten), Sao Tome and Principe, United Republic of Tanzania)

N/A: 2 Members States (Albania, New Zealand)

Q 2. Please indicate whether your policies, regulations, or statutes include the following, as set out in the recommended practices outlined in Annex 9:

a) Provisions requiring new or refurbished aircraft to conform, where aircraft type, size, and configuration permit, to standards of accessibility with respect to on-board equipment (including movable armrests, onboard wheelchairs, accessible washrooms, and suitable lighting and signs).

Yes: 33 (Algeria, Armenia, Australia, Bosnia and Herzegovina, Bulgaria, Cambodia, Canada, Czechia, Denmark, France, Gabon, Guinea, Guyana, Hungary, Latvia, Malaysia, Mongolia, New Zealand, Nicaragua, Pakistan, Philippines, Poland, Republic of Korea, Republic of Moldova, Russian Federation, Serbia, Singapore, Slovenia, Sweden, Turkmenistan, Ukraine, United Kingdom, Venezuela (Bolivarian Republic of))

No: 17 (Argentina, Belarus, China, Cuba, Cyprus, Egypt, Finland, Iceland, Iraq, Ireland, Kazakhstan, Kyrgyzstan, Macao SAR, China, Paraguay, Portugal, Switzerland, Uruguay, Viet Nam)

N/A: 15 (Albania, Benin, Burundi, Ecuador, El Salvador, Eswatini, Georgia, Germany, Guatemala, Lithuania, Mauritius, Netherlands (Aruba), Netherlands (St. Maarten), Nigeria, Sao Tome and Principe, Somalia, United Republic of Tanzania)

The landscape of global aviation is increasingly shaped by a concerted effort to ensure accessibility for individuals with disabilities. A review of national policies and regulations reveals a strong emphasis on this crucial aspect, with many countries adopting comprehensive frameworks to guarantee the rights and enhance the travel experience of persons with reduced mobility. While the provided information focuses broadly on accessibility, it primarily highlights provisions for air travel and airport facilities, rather than detailed aircraft design specifications.

European Union Member states implemented Regulation (EC) No 1107/2006, which addresses the rights of persons with disability and reduced mobility when traveling by air. It serves as a basis also in the United Kingdom, fostering a remarkable degree of regional harmonization in accessibility mandates.

Numerous countries have embedded accessibility principles within their national laws and decrees on disability rights, such as Algeria's Executive Decree No. 06-455, Mongolia's Law on the Rights of Persons with Disabilities, and the Philippines' Implementing Rules and Regulations of Batas Pambansa Bilang 344, ensure that the commitment to inclusivity extends across various sectors, including transportation.

Furthermore, a significant number of states have developed dedicated aviation regulations or national facilitation programs specifically addressing disability access. Examples include Belarus's Aviation Regulations on Operator Certification and Airport Activities, Bosnia and Herzegovina's Aviation Law, Canada's Accessible Transportation for Persons with Disabilities Regulations, Egypt's National Facilitation Program, Gabon's Gabonese Aviation Regulation RAG-2 Facilitation, Kazakhstan's Order No. 189, Moldova's National Air Transport Facilitation Program, Turkmenistan's Programme for the Continuous Monitoring of Civil Aviation Operators and Organizations, and Ukraine's Air Code. These frameworks emphasise a tailored approach to addressing the challenges and requirements of air travel accessibility.

A vital aspect of these regulatory landscapes is the oversight and monitoring conducted by civil aviation authorities or equivalent bodies. These designated agencies, such as the Australian Human Rights Commission, Canada's Canadian Transportation Agency, France's DGCA, Ireland's Commission for Aviation Regulation, Singapore's CAAS, Switzerland's FOCA, and the UK Civil Aviation Authority, play a critical role in enforcing compliance and ensuring the effective implementation of accessibility provisions. This is often reinforced through regular audits and inspections, as practiced by Hungary, Latvia, Portugal, Switzerland, and the UK, demonstrating a proactive approach to maintaining high standards of accessibility.

Moreover, many countries have established guidelines and standards specifically for airport facilities, recognizing them as crucial public spaces. New Zealand's Building Act and the Singapore Code on Accessibility in the Built Environment 2019 are exemplary in detailing requirements for accessible infrastructure within airport premises.

The provided responses show that national efforts to enhance accessibility in air travel are primarily focused on airport infrastructure, ground handling, and the rights of passengers with reduced mobility. There is less explicit detail concerning specific regulations or statutes that directly mandate new or refurbished aircraft to conform to particular design specifications based on their type, size, and configuration, as might be outlined in broader international aviation standards like Annex 9. Although some mentions, such as Finland's reference to "Commission Regulation (EU) No 965/2012," or Singapore's guidelines for restraint devices, might indirectly touch upon operational aspects that influence aircraft interior, detailed aircraft design requirements for disability access are not a prominent feature of this dataset. Nonetheless, the overarching theme is a global, growing commitment to creating a more inclusive and accessible air travel experience.

b) Provisions requiring the transportation of disability aids needed by persons with disabilities at no additional charge.

Yes: 43 (Algeria, Australia, Belarus, Bosnia and Herzegovina, Bulgaria, Cambodia, Canada, China, Cuba, Czechia, Denmark, Egypt, Finland, France, Gabon, Georgia, Germany, Guinea, Guyana, Hungary, Iceland, Ireland, Kazakhstan, Kyrgyzstan, Latvia, Mongolia, New Zealand, Nicaragua, Pakistan, Poland, Portugal, Republic of Korea, Republic of Moldova, Russian Federation, Serbia, Slovenia, Sweden, Switzerland, Turkmenistan, Ukraine, United Kingdom, Venezuela (Bolivarian Republic of), Viet Nam)

No: 9 (Argentina, Armenia, Iraq, Macao SAR, China, Malaysia, Paraguay, Philippines, Singapore, Uruguay)

N/A: 14 (Albania, Benin, Burundi, Cyprus, Ecuador, El Salvador, Eswatini, Guatemala, Lithuania, Mauritius, Netherlands (Aruba), Netherlands (St. Maarten), Nigeria, Sao Tome and Principe, Somalia, United Republic of Tanzania)

National strategies vary. For instance, Algeria's Law 02-09 grants persons with a disability card free transport for mobility aids, Canada's regulations require carriers to accept disability aids free of charge and as priority baggage, the Bolivarian Republic of Venezuela's legislation explicitly guarantees free transport of wheelchairs, walkers, and other aids, prohibiting refusal and specifying carriage in cabin or as priority baggage, Turkmenistan's program also includes provisions for facilitating PRMs travel.

The trend in Europe is adherence for European Member states to EU Regulation 1107/2006, mandating free carriage of disability aids. Outside Europe, many countries have similar laws ensuring persons with disabilities can travel with their essential aids without extra charges. A consistent thread is the legal commitment to enable accessible travel and the free carriage of disability-related equipment.

c) Provisions requiring the transportation of service animals needed by persons with disabilities, in the cabin of the aircraft on the floor at the person's feet, at no additional charge.

Yes: 43 (Algeria, Argentina, Armenia, Australia, Belarus, Bosnia and Herzegovina, Bulgaria, Cambodia, Canada, China, Cuba, Czechia, Denmark, Egypt, Finland, France, Gabon, Georgia, Germany, Guinea, Guyana, Hungary, Iceland, Ireland, Kazakhstan, Kyrgyzstan, Latvia, Mongolia, New Zealand, Nicaragua, Poland, Portugal, Republic of Korea, Republic of Moldova, Russian Federation, Serbia, Slovenia, Sweden, Switzerland, Turkmenistan, Ukraine, United Kingdom, Venezuela (Bolivarian Republic of))

No: 9 (Iraq, Macao SAR, China, Malaysia, Pakistan, Paraguay, Philippines, Singapore, Uruguay, Viet Nam)

N/A: 14 (Albania, Benin, Burundi, Cyprus, Ecuador, El Salvador, Eswatini, Guatemala, Lithuania, Mauritius, Netherlands (Aruba), Netherlands (St. Maarten), Nigeria, Sao Tome and Principe, Somalia, United Republic of Tanzania)

When examining the global landscape of regulations concerning the in-cabin transport of service animals for persons with disabilities, several overarching themes and distinct national approaches emerge. The fundamental principle across many nations is to facilitate travel for individuals requiring assistance, ensuring their service animals can accompany them free of charge in the aircraft cabin, typically at their feet.

European Union Regulation (EC) No 1107/2006, implemented in European Union Member states, serves as a unifying framework, mandating the complimentary carriage of recognized service dogs.

While the core principle is consistent, some countries, like France and Switzerland, also emphasize that national regulations might further define the specifics of this provision.

Beyond the EU framework, many countries have established their own national aviation regulations, acts, or decrees to address this matter. Argentina, for instance, relies on "Act 26.858," which specifically covers persons with disabilities accompanied by a guide dog. Similarly, Armenia, Belarus, Kazakhstan, Kyrgyzstan, and Ukraine have distinct aviation rules or decrees that govern the transport of passengers, baggage, and service requirements, often with explicit paragraphs or articles dedicated to service animals. Canada's Accessible Transportation for Persons with Disabilities Regulations requires the transportation of service dogs free of charge, and also requires that airlines provide sufficient floor space for the dog including if that requires an additional seat.

Another prevalent approach involves national air transport facilitation policies or programs. These documents, like those in Cambodia, Gabon, Guinea, Nicaragua, the Republic of Moldova, and Turkmenistan, underscore a broader commitment to easing travel for individuals with special needs, with specific provisions for service animals being an integral part.

In some cases, airline-specific policies and manuals also play a crucial role. Cuba, for example, refers to both its Cuban Aeronautical Regulation and the international passenger manual of its national airline, Cubana de Aviación, along with the airline's special assistance policy. Egypt's national carrier, EgyptAir, similarly provides guidelines on its website.

Furthermore, countries often cite official legal publications or online government portals as the authoritative source of these regulations. Australia, Bosnia and Herzegovina, Mongolia, and Venezuela (Bolivarian Republic of), among others, direct interested parties to their respective legislative websites or official gazettes where the detailed provisions can be found.

While these common threads exist, individual countries also present unique distinctions. Hungary, for instance, clarifies that its interpretation of "service animals" under the EU regulation is specifically limited to assistance dogs. Switzerland highlights that despite adhering to the EU regulation, it lacks a specific legal definition for "assistance dog" or regulated training standards. New Zealand provides a comprehensive approach by directing users to both a general disability information portal and specific airline policies, ensuring multiple avenues for information. Meanwhile, China has its own "Administrative Measures for Air Transport of Persons with Disabilities."

In conclusion, the global landscape reflects a clear commitment to accommodating persons with disabilities traveling with service animals. This commitment is realized through a blend of international harmonization, national legal frameworks, and practical airline-specific guidelines, all aiming to ensure dignity, accessibility, and freedom of movement for these passengers.

[d\) Provisions allowing persons with disabilities to travel without providing medical clearance/ a medical certificate.](#)

Yes: 35 (Belarus, Bosnia and Herzegovina, Bulgaria, Cambodia, Canada, China, Cuba, Czechia, Denmark, France, Gabon, Germany, Guinea, Guyana, Hungary, Iceland, Ireland, Kazakhstan, Kyrgyzstan, Latvia, Malaysia, Mongolia, New Zealand, Nicaragua, Pakistan, Poland, Portugal, Republic of Moldova, Russian Federation, Serbia, Sweden, Switzerland, Turkmenistan, Ukraine, United Kingdom)

No: 15 (Algeria, Argentina, Armenia, Australia, Finland, Georgia, Korea, Macao SAR, China, Paraguay, Philippines, Singapore, Slovenia, Uruguay, Venezuela (Bolivarian Republic of), Viet Nam)

N/A: 16 (Albania, Benin, Burundi, Cyprus, Ecuador, Egypt, El Salvador, Eswatini, Guatemala, Iraq, Lithuania, Mauritius, Netherlands (Aruba), Netherlands (St. Maarten), Nigeria, Sao Tome and Principe, Somalia, United Republic of Tanzania)

Global aviation policies largely favour facilitating travel for persons with disabilities without requiring medical certificates, with safety-specific exceptions.

Canada limits when medical data may be requested to only when it is reasonably necessary to permit the carrier to assess the person's request. Cuba only requires certificates if health issues genuinely impair travel safety. China largely waives medical certificates, with exceptions for oxygen needs and safety concerns. Ukraine enforces stricter health certificate requirements in certain cases, while Mongolia focus on declaration needs or health impacts on the passengers themselves or other passengers.

According to Regulation (EC) No 1107/2006 implemented by European Members states, there is no obligation for passengers with disability to provide medical proof, a principle applied by the UK as well. Many non-EU nations also align with this approach.

However, blanket non-requirement is not absolute. Authorities retain the right to request medical information or clearance when safety concerns arise - such as uncertain ability to fly, potential health deterioration, or safety risks to others - maintaining a careful safety balance.

In summary, the industry is moving toward more inclusive policies, reducing dependence on medical clearance, driven by anti-discrimination rules. Yet, safety remains paramount, allowing medical assessments only when genuine safety risks are identified.

e) Provisions allowing assistants required by persons with disabilities to travel with them at a discounted price.

Yes: 16 (Algeria, Bulgaria, Canada, Egypt, Guinea, Kyrgyzstan, Mongolia, Nicaragua, Pakistan, Republic of Korea, Republic of Moldova, Russian Federation, Sweden, Ukraine, Venezuela (Bolivarian Republic of), Viet Nam)

No: 33 (Argentina, Armenia, Australia, Belarus, Bosnia and Herzegovina, Cambodia, China, Cuba, Czechia, Finland, France, Gabon, Georgia, Germany, Guyana, Hungary, Iceland, Ireland, Latvia, Macao SAR, China, Malaysia, New Zealand, Paraguay, Philippines, Poland, Portugal, Serbia, Singapore, Slovenia, Switzerland, Turkmenistan, United Kingdom, Uruguay)

N/A: 17 (Albania, Benin, Burundi, Cyprus, Denmark, Ecuador, El Salvador, Eswatini, Guatemala, Iraq, Kazakhstan, Lithuania, Mauritius, Netherlands (Aruba), Netherlands (St. Maarten), Nigeria, Sao Tome and Principe, Somalia, United Republic of Tanzania)

Globally, provisions for assistants traveling with persons with disabilities at a discounted price vary, favouring encouragement over mandates, with the exception of Canada whose regulations require carriers to transport support persons that provide certain types of assistance to persons with a disability free of charge on domestic flights.

Many countries embed this within broader air transport or aviation policies, which aim to improve accessibility but do not always explicitly guarantee discounts for assistants. Instead, they often authorize or recommend airlines to offer benefits at their discretion. Countries like Bulgaria, Guinea, Kyrgyzstan, Nicaragua, Pakistan, Republic of Moldova and Sweden reference facilitation documents that detail such policies.

A common trend is the suggestion or allowance of discounts rather than strict obligation, giving airlines flexibility while promoting accessibility. Government subsidies in some nations support these initiatives.

For example, Algeria's laws and decrees broadly cover reduced or free transport for persons with disabilities, potentially including assistants. Specifically, Algerian Executive Decree No. 06-144 provides for reduced fares and free transportation for people with disabilities. This is part of a broader effort by the Algerian government to integrate people with disabilities into society by addressing their specific needs and challenges.

Russia's Ministry of Transport decree on federal subsidies emphasizes ensuring accessibility, implying support for discounted travel. Ukraine states airlines may offer discounts, while the Bolivarian Republic of Venezuela's authorities request operators to do so "to the extent possible." Viet Nam references a Decree guiding its law on persons with disabilities, possibly including travel benefits.

In conclusion, no uniform global mandate exists, but many countries actively promote accessible air travel through policies encouraging or enabling discounts, fostering a more inclusive environment for persons with disabilities and their companions.

Q 3. Does your State have a program for validating compliance by airlines and/or airports related to accessibility in aviation?

Yes: 38 (Algeria, Australia, Belarus, Bosnia and Herzegovina, Bulgaria, Cambodia, Canada, China, Cuba, Czechia, Denmark, Egypt, Finland, France, Gabon, Georgia, Hungary, Iceland, Ireland, Kazakhstan, Latvia, Mongolia, New Zealand, Philippines, Poland, Portugal, Republic of Korea, Republic of Moldova, Russian Federation, Serbia, Singapore, Sweden, Switzerland, Turkmenistan, Ukraine, United Kingdom, Venezuela (Bolivarian Republic of), Viet Nam)

No: 13 (Argentina, Armenia, Cyprus, Guinea, Guyana, Kyrgyzstan, Macao SAR, China, Malaysia, Nicaragua, Pakistan, Paraguay, Slovenia, Uruguay)

N/A: 15 (Albania, Benin, Burundi, Ecuador, El Salvador, Eswatini, Germany, Guatemala, Iraq, Lithuania, Mauritius, Netherlands (Aruba), Netherlands (St. Maarten), Nigeria, Sao Tome and Principe, Somalia, United Republic of Tanzania)

Many nations demonstrate commitment to accessible aviation through programs verifying airline and airport compliance. Common strategies include legal frameworks, oversight bodies, and systematic monitoring. European Member states apply Regulation (EC) No 1107/2006, and the UK uses it as a key compliance tool. These countries conduct regular audits and inspections - often by designated enforcement agencies - to ensure airport and airline adherence to rights for persons with reduced mobility.

Many countries have dedicated national bodies or commissions responsible for monitoring and enforcing accessibility standards. Australia, for instance, has the Australian Human Rights Commission to handle complaints and the Aviation Access Forum to advise on policy and develop Disability Access Facilitation Plans. Canada's Canadian Transportation Agency is responsible for monitoring compliance with accessibility requirements. Cuba has established a National Commission for follow-up and monitoring the application of disability rights, involving various state bodies, Canada points to its compliance monitoring and enforcement policy from the Canadian Transportation Agency. Korea references laws promoting mobility convenience for transportation vulnerable individuals. Russia mentions a Federal Act on the Protection of Competition, which might indirectly influence accessibility provisions.

Another common thread is the implementation of comprehensive supervision plans, programs, or inspection checklists that apply to both airlines and airports. Belarus has Aviation Regulations on Operator Certification and Airport Activities. Bosnia and Herzegovina outline a supervision plan and program for both airlines and airports within its Aviation Law. China explicitly states that civil aviation inspectors conduct inspections on airlines and airports based on specific administrative measures and technical standards for accessible facilities. Turkmenistan adopts an annual program for continuous monitoring of civil aviation operators and organizations through periodic audits. Ukraine's Air Code mandates that services for people with restricted mobility be subject to audit and checks by the civil aviation authority, with financial penalties for violations.

Several countries emphasize that compliance is part of their broader National Air Transport Facilitation Policies (NATFP) or general aviation laws. This includes Algeria, Cambodia, Egypt, Gabon, Republic of Moldova, and Venezuela (Bolivarian Republic of), indicating that accessibility validation is integrated into overall aviation operations and regulations.

Specific points relating to airports and airlines often appear in these compliance frameworks:

- **Airports:** New Zealand, while not specifying a direct aviation compliance program, details regulations under its Building Act that ensure public buildings, including airports, provide reasonable and adequate access, parking, and sanitary facilities for persons with disabilities. Philippines, similarly, focuses on minimum requirements for buildings, facilities, and utilities for public use to be accessible, applying to airport infrastructure. Singapore specifically mentions its Building and Construction Authority auditing the airport for compliance with the Singapore Code on Accessibility in the Built Environment. Georgia mentions using a "Checklist for airport operators."
- **Airlines:** Singapore highlights that its Civil Aviation Authority (CAAS) audits Singapore carriers' compliance with guidelines for restraint devices and the carriage of service animals in the passenger cabin. The UK Civil Aviation Authority (CAA) has introduced a comprehensive accessibility performance framework specifically for UK airports, monitoring

their performance and publishing findings annually, underpinned by EU regulations and ECAC recommendations.

Despite variations in mechanisms and legal tools, there is a global consensus on the need for strong programs to validate aviation accessibility compliance. These programs usually involve national regulators, audits, and inspections to ensure airlines and airports deliver non-discriminatory, accessible services for all passengers.

Q 4. Does your State have any policies, regulations, or statutes related to the following issues?

a) That airlines and/or airports provide special assistance to ensure passengers with disabilities receive information and services customarily available to the general public. Examples include but are not limited to: safety briefings; accessible inflight entertainment; accessible wayfinding information; and/or accessible kiosks.

Yes: 45 (Algeria, Argentina, Armenia, Australia, Belarus, Bosnia and Herzegovina, China, Bulgaria, Cambodia, Canada, Cuba, Czechia, Denmark, Egypt, Finland, France, Gabon, Georgia, Guinea, Guyana, Hungary, Iceland, Kazakhstan, Latvia, Macao SAR, China, Malaysia, Mongolia, New Zealand, Nicaragua, Pakistan, Paraguay, Philippines, Poland, Portugal, Republic of Korea, Republic of Moldova, Serbia, Singapore, Slovenia, Sweden, Switzerland, Turkmenistan, Ukraine, United Kingdom, Venezuela (Bolivarian Republic of), Viet Nam)

No: 3 (Cyprus, Kyrgyzstan, Uruguay)

N/A: 17 (Albania, Benin, Burundi, Ecuador, El Salvador, Eswatini, Germany, Guatemala, Iraq, Ireland, Lithuania, Mauritius, Netherlands (Aruba), Netherlands (St. Maarten), Nigeria, Russian Federation, Sao Tome and Principe, Somalia, United Republic of Tanzania)

Every country surveyed is committed to ensuring that air travel is inclusive, providing special assistance and accessible information to passengers with disabilities on par with the general public.

The European Union's Regulation (EC) No 1107/2006 stands out as a leading framework, heavily influencing policy across its member states and beyond. This regulation is clear: assistance for disabled passengers at airports and on board must be free of charge, and crucial information, including safety briefings, must be provided in accessible formats. It also assigns clear responsibilities, often making the airport managing body accountable for ground assistance. The continued relevance of ECAC Doc 30, Part I, Section 5, a code of good conduct, further emphasizes a common European approach to ground handling. Similarly, Canada's Accessible Transportation for Persons with Disabilities Regulations establishes clear responsibilities, requires assistance for passengers' with disabilities to be provided free of charge, information must be available in accessible formats, and websites, mobile websites and applications must meet the requirements for a Level AA conformance of the Web Content Accessibility Guidelines. Additionally, Canada's regulations requires automated self-service kiosks and onboard entertainment to be accessible.

Countries like Gabon, Guinea, Kazakhstan, Ukraine, and Venezuela (Bolivarian Republic of) have established their own national aviation regulations. While distinct, these often mirror the EU's core principles, focusing on non-discrimination and the provision of necessary services. Some nations,

such as South Korea, the Philippines, and Singapore, integrate air travel accessibility within broader national disability or building accessibility laws, ensuring a consistent standard across various public services.

Across the board, a key focus is on accessible information. This extends from pre-flight details and safety briefings to real-time flight updates, ensuring passengers with disabilities are always well-informed. Airports are specifically tasked with providing accessible facilities, including designated service counters and mobility equipment like wheelchairs and specialized vehicles. Airlines, in turn, are responsible for in-flight assistance, ensuring comfort and safety, and managing the carriage of personal mobility aids and service animals.

A growing area of attention is assistance for passengers with hidden disabilities. The UK, for example, has developed specific guidance for both airports and airlines, promoting better understanding and support for those with non-visible conditions, often facilitated by initiatives like the "Sunflower Lanyard."

In essence, while the specific legal instruments may vary, the global aviation sector is moving towards a unified goal: making air travel truly accessible and dignified for every passenger.

b) That airlines and/or airports establish and publish minimum standards of accessibility for persons with disabilities.

Yes: 41 (Armenia, Australia, Belarus, Bosnia and Herzegovina, Bulgaria, Cambodia, Canada, China, Cyprus, Czechia, Denmark, Egypt, Finland, France, Gabon, Hungary, Iceland, Kazakhstan, Kyrgyzstan, Latvia, Malaysia, Mongolia, New Zealand, Nicaragua, Pakistan, Paraguay, Philippines, Poland, Portugal, Republic of Korea, Republic of Moldova, Serbia, Singapore, Slovenia, Sweden, Switzerland, Turkmenistan, Ukraine, United Kingdom, Venezuela (Bolivarian Republic of), Viet Nam)

No: 7 (Algeria, Argentina, Cuba, Guinea, Guyana, Macao SAR, China, Uruguay)

N/A: 18 (Albania, Benin, Burundi, Ecuador, El Salvador, Eswatini, Georgia, Germany, Guatemala, Iraq, Ireland, Lithuania, Mauritius, Netherlands (Aruba), Netherlands (St. Maarten), Nigeria, Russian Federation, Sao Tome and Principe, Somalia, United Republic of Tanzania)

Countries globally share a commitment to establishing minimum accessibility standards for persons with disabilities in air transport, aiming to ensure ease and dignity in travel. This is broadly achieved through national legislation, disability rights acts, or aviation regulations.

Canada's Accessible Transportation for Persons with Disabilities Regulations provide a set of clear, consistent, specific and legally binding accessibility requirements and cover many parts of the travel experience: services, equipment, facilities, communications, training, and security and border screening.

In the European Union, the EU Regulation (EC) No 1107/2006 directly impacts laws in all the EU Member States. Beyond the EU, the ECAC Doc 30, Part I - Facilitation, serves as a key reference for some countries like Turkmenistan, promoting shared best practices. A crucial commonality is the mandate for airlines and airports to publish their accessibility standards and services, enhancing transparency for passengers.

However, implementation varies significantly. Countries differ in their legal instruments, with some relying on National Air Transport Facilitation Programs (e.g., Armenia), while others integrate accessibility into broader disability legislation (e.g., France, Venezuela (Bolivarian Republic of)). The level of detail in national regulations also ranges from broad internal standards (e.g., Belarus) to highly prescriptive guidelines on infrastructure and equipment (e.g., China).

Airports show differences in their approach to planning (e.g., Australia's collaborative DAFPs) and how publication requirements are tiered by passenger volume (e.g., Hungary, Switzerland). The emphasis on specific facilities also varies, from general accessibility features to specialized internal transfer systems (e.g., Venezuela). For airlines, distinctions often lie in the specifics of operational policies, such as detailed guidelines on restraint devices and service animals (e.g., Singapore), and requirements for multilingual information and consideration of aircraft capabilities (e.g., Ukraine).

Ultimately, while accessible air travel is a universal goal, its implementation relies on international guidance and diverse national frameworks shaped by legal traditions, infrastructure, and population needs.

c) That airlines and/or airports ensure that persons with disabilities are given the information they need, in communication formats accessible to those with cognitive or sensory disabilities.

Yes: 42 (Algeria, Armenia, Australia, Belarus, Bosnia and Herzegovina, Bulgaria, Cambodia, Canada, China, Cyprus, Czechia, Denmark, Egypt, Finland, France, Gabon, Guinea, Guyana, Hungary, Iceland, Kazakhstan, Kyrgyzstan, Latvia, Mongolia, New Zealand, Nicaragua, Pakistan, Philippines, Poland, Portugal, Republic of Korea, Republic of Moldova, Serbia, Singapore, Slovenia, Sweden, Switzerland, Turkmenistan, Ukraine, United Kingdom, Venezuela (Bolivarian Republic of), Viet Nam)

No: 6 (Argentina, Cuba, Macao SAR, China, Malaysia, Paraguay, Uruguay)

N/A: 18 (Albania, Benin, Burundi, Ecuador, El Salvador, Eswatini, Georgia, Germany, Guatemala, Iraq, Ireland, Lithuania, Mauritius, Netherlands (Aruba), Netherlands St. Maarten), Nigeria, Russian Federation, Sao Tome and Principe, Somalia, United Republic of Tanzania)

Governments and regulatory bodies worldwide have increasingly focused on ensuring that individuals with disabilities receive necessary information in accessible formats when traveling by air. While specific regulations vary by jurisdiction, there are consistent approaches and distinct responsibilities assigned to both airports and airlines.

A foundational principle across all regulatory frameworks is the prohibition of discrimination based on disability and the right to equal access to air travel services. This includes ensuring that essential information is readily available to all passengers. Consequently, airlines and airports are generally required to provide information regarding services, aircraft capabilities, any limitations, and available accessibility features.

A significant emphasis is placed on delivering information in accessible formats. For persons who are blind or who have low vision, this involves providing materials in large print, Braille (where feasible), and audio descriptions. Digital platforms, including websites and mobile applications, must

be compatible with screen readers and offer adjustable font sizes and colour contrasts. For individuals with hearing disabilities, regulations often mandate captions for safety videos and announcements, and staff are typically trained in alternative communication methods such as written notes. Addressing the needs of individuals with cognitive or developmental disabilities often involves using clear, simplified language and, in some cases, offering pre-visit familiarization options for airport environments.

Staff training is a common requirement, ensuring personnel are proficient in disability awareness, appropriate assistance techniques, various communication methods, and knowledge of accessible features and services. Many regulations encourage passengers to provide advance notice, typically 48 hours, to facilitate timely service delivery.

The accessibility of digital platforms is a growing focus, with requirements for websites and online booking systems to comply with accessibility standards (e.g., for screen readers and keyboard navigation), allowing all passengers to access booking details and flight updates. Furthermore, jurisdictions typically establish complaint resolution mechanisms for passengers to address service deficiencies, often through national enforcement bodies. Effective coordination between airlines and airport operators is also widely recognized as essential for ensuring seamless service consistency across all travel touchpoints.

While both airports and airlines contribute to an accessible travel experience, their specific obligations differ.

Airports are primarily responsible for the physical infrastructure accessibility of their facilities. This includes providing ramps, elevators with tactile and audible features, accessible restrooms, clear wayfinding systems (including tactile paths and audible signals), and accessible parking and drop-off areas. Many regulations also require real-time information displays to be customizable, presenting updates in various formats to accommodate diverse sensory needs. Self-service kiosks for check-in and bag drop are increasingly expected to be accessible, featuring audio guidance, tactile keypads, and adjustable screens. Airports typically manage the provision of special assistance for passengers with reduced mobility, including wheelchair assistance from check-in to the gate and for connections. Additionally, certain countries, such as Canada and the United States, mandate designated service animal relief areas within airport premises.

Airlines have specific obligations related to in-flight accessibility. This encompasses features within the aircraft, such as movable aisle armrests, priority stowage for personal wheelchairs, accessible lavatories on larger aircraft, and onboard wheelchairs. Airlines are often required to provide individual safety briefings to passengers with sensory disabilities, explaining procedures and exit locations. During flights, cabin crew are expected to keep passengers updated on announcements and assist with in-flight entertainment where applicable. Airlines generally must provide seating accommodations that meet disability-related needs, such as accessible aisle seats with movable armrests. While airlines provide assistance with boarding, deplaning, and stowing carry-on items, their policies often outline limitations on providing extensive personal care (e.g., assistance in lavatories, with eating, or administering medication), potentially requiring a safety assistant in such cases. A critical responsibility for airlines is the handling of assistive devices. They must accept battery-powered wheelchairs and other assistive devices, adhering to specific regulations for battery packaging and ensuring priority for in-cabin or baggage compartment storage. Airlines also maintain policies for compensation or replacement in the event of damaged or lost equipment. Some countries

are exploring initiatives like requiring airlines to offer passenger assistance profiles, allowing individuals to store their accessibility requirements for future bookings.

In summary, these regulations are intended to promote accessible air travel by reducing information barriers for individuals with cognitive or sensory disabilities and ensuring that the physical environment and support services are suitable for their various needs.

d) That airlines and/or airports implement training programs to ensure that trained personnel are available to assist persons with disabilities.

Yes: 39 (Armenia, Australia, Belarus, Bosnia and Herzegovina, Bulgaria, Cambodia, Canada, China, Czechia, Denmark, Egypt, Finland, France, Gabon, Georgia, Guinea, Hungary, Iceland, Kazakhstan, Latvia, Mongolia, Nicaragua, Pakistan, Paraguay, Philippines, Poland, Portugal, Republic of Korea, Republic of Moldova, Serbia, Singapore, Slovenia, Sweden, Switzerland, Turkmenistan, Ukraine, United Kingdom, Venezuela (Bolivarian Republic of), Viet Nam)

No: 9 (Algeria, Argentina, Cuba, Guyana, Kyrgyzstan, Macao SAR, China, Malaysia, New Zealand, Uruguay)

N/A: 18 (Albania, Benin, Burundi, Cyprus, Ecuador, El Salvador, Eswatini, Germany, Guatemala, Iraq, Ireland, Lithuania, Mauritius, Netherlands (Aruba), Netherlands (St. Maarten), Nigeria, Russian Federation, Sao Tome and Principe, Somalia, United Republic of Tanzania)

Around the world, there is a general consensus on the importance of providing appropriate assistance to individuals with disabilities during air travel. This understanding emphasizes that properly trained personnel are essential for delivering respectful and effective support. Although the methods of training may differ between countries, certain key approaches are commonly recognized.

A legal or regulatory framework supports these initiatives. Many countries, especially in Europe, reference EU Regulation 1107/2006 as the foundation for their training standards. This regulation mandates that airline and airport personnel interacting with the public, including those employed by subcontractors, undertake appropriate training. Canada's Accessible Transportation of Persons with Disabilities Regulations requires that personnel who may be required to interact with the public or to participate in making decisions or in developing policies or procedures in relation to accessibility be trained in the principles of accessibility; the different types of barriers that may hinder equal access to transportation services for persons with disabilities; the various types of assistance that may be needed by persons with disabilities; communication with persons with disabilities; as well as in handling mobility aids and special equipment. Countries such as Armenia, Cambodia, and Republic of Moldova utilize their National Air Transport Facilitation Programs or similar aviation regulations to establish these requirements. In some cases, like in Bosnia and Herzegovina, disability assistance training is integrated into broader airport and airline security protocols, reflecting a comprehensive approach to passenger support.

The scope of training programs tends to be consistent across jurisdictions. These programs aim to develop awareness and understanding of the diverse needs of passengers with disabilities. Practical skills are also prioritized, with countries like Canada and China specifying training in providing physical assistance, managing mobility aids, and using specialized equipment appropriately.

Additionally, staff training frequently includes familiarization with relevant procedures and regulations governing air travel for persons with disabilities to ensure comprehensive readiness.

It is generally agreed that all personnel who have direct contact with passengers or provide assistance for individuals with disabilities should receive this training. This requirement typically encompasses employees of subcontracted staff as well, to maintain a consistent level of service. The obligation for training is usually ongoing, with many countries - including Canada, Switzerland, and Turkmenistan - requiring recurrent or refresher courses to ensure staff remain informed about best practices and updated procedures.

While the core principles remain consistent, implementation details can differ based on national contexts and priorities. There is an emphasis on shared responsibility between airlines and airports, with regulations generally assigning duties to both parties to ensure the availability of trained personnel.

For instance, Australia adopts a collaborative approach, allowing airports and airlines to develop training programs in consultation with national organizations such as the Australian Airports Association and the Aviation Access Forum. This approach encourages industry-led cooperation. Canada employs a more prescriptive framework, with regulations specifying training content and timelines in detail. China outlines comprehensive training requirements across relevant air transport entities, reflecting a highly structured approach.

Singapore demonstrates a proactive stance by independently implementing extensive staff training programs at Changi Airport, even without specific regulatory mandates. This indicates a commitment to maintaining service standards. European Union Member States, while following EU regulations, also refer to ECAC Doc 30, Part I, Section 5 as a practical resource for staff training, supporting regional consistency in best practices.

Q 5. Does your State require airports, airlines, or other entities to provide the following facilities or services?

a) Lifting devices, ramps, or other means of assisting persons with disabilities to board and disembark the aircraft when level entry is not available?

Yes: 49 (Algeria, Argentina, Armenia, Australia, Belarus, Benin, Bosnia and Herzegovina, Bulgaria, Cambodia, Canada, China, Cuba, Cyprus, Czechia, Denmark, Egypt, El Salvador, Finland, France, Gabon, Georgia, Guinea, Guyana, Hungary, Kazakhstan, Kyrgyzstan, Latvia, Malaysia, Mongolia, New Zealand, Netherlands (St. Maarten), Nicaragua, Pakistan, Philippines, Poland, Portugal, Republic of Korea, Republic of Moldova, Serbia, Singapore, Slovenia, Sweden, Switzerland, Turkmenistan, Ukraine, United Kingdom, Uruguay, Venezuela (Bolivarian Republic of), Viet Nam)

No: 7 (Burundi, Eswatini, Guatemala, Iceland, Netherlands (Aruba), Lithuania, Paraguay, Sao Tome and Principe)

N/A: 10 (Albania, Ecuador, Germany, Iraq, Ireland, Mauritius, Nigeria, Russian Federation, Somalia, United Republic of Tanzania)

Ensuring accessible boarding and disembarking for passengers with disabilities is a recognized priority internationally. When direct, level access is unavailable, countries are increasingly establishing provisions for specialized facilities and services, such as mechanical lifting devices, ramps, and other solutions.

A core element of this effort is a framework of laws and regulations. Canada's Accessible Transportation for Persons with Disabilities Regulations require that if an airport does not permit level boarding of an aircraft, it must be equipped with a lift, a ramp or portable stairs.

European Union Member States adhere to EU Regulation 1107/2006, which requires airports and airlines to accommodate the needs of disabled persons and those with reduced mobility in air travel, and ECAC Doc 30, Part I, Section 5, as guidelines for implementing accessible services.

Countries such as Armenia, Benin, and Gabon utilize national air transport facilitation programs or specific regulations, like Cuba's Aeronautical Regulation No. 9, to formalize these requirements. Some nations, including Argentina and Venezuela (Bolivarian Republic of), integrate these provisions into broader disability and accessibility laws, reflecting a comprehensive approach to inclusion.

Legal texts often directly specify the types of equipment necessary for assistance. References to "lifting devices, ramps, or other means" are common. Belarus refers to specific standards detailing available equipment, while Ukraine's regulations specify the need for "lifting systems or other devices" and mention "lifts, wheelchairs, onboard wheelchairs, or other aids" to facilitate passenger movement between aircraft and terminal. The primary goal of these regulations is to ensure accessibility, safety, and a respectful travel experience. New Zealand emphasizes providing a "safe and dignified journey" for all passengers.

Responsibility for providing these services is typically shared. Airports are generally tasked with maintaining infrastructure and equipment. Airlines also play a significant role; for example, Air New Zealand has invested in its own "Eagle lifting device" to improve assistance for wheelchair users. Additionally, other entities or service providers, such as ground handling companies, are recognized as important contributors in executing these functions, as reflected in regulations from Ukraine and Venezuela (Bolivarian Republic of).

Some countries include specific operational standards and practical considerations. El Salvador outlines a "contingency plan" for remote aircraft positions, involving aisle chairs and manual assistance. China has detailed "Technical Standards" for accessible facilities and equipment in passenger terminal areas.

Overall, through legislation, technical standards, and operational procedures, the aviation sector works to minimize barriers and promote smooth, respectful boarding and disembarking experiences for persons with disabilities.

b) Flight service related information in an accessible communication format for the vision and hearing impaired?

Note: Amended question to remove the term impairment as it is viewed negatively by persons with disabilities and should be avoided: b) Flight service related information in an accessible communication format for persons with vision and hearing disabilities?

Yes: 39 (Armenia, Australia, Belarus, Bosnia and Herzegovina, Bulgaria, Canada, China, Czechia, Denmark, Egypt, El Salvador, Finland, France, Gabon, Georgia, Guyana, Hungary, Kazakhstan, Kyrgyzstan, Latvia, Malaysia, Mongolia, New Zealand, Nicaragua, Pakistan, Philippines, Poland, Portugal, Republic of Korea, Republic of Moldova, Sao Tome and Principe, Singapore, Slovenia, Sweden, Switzerland, Turkmenistan, Ukraine, United Kingdom, Venezuela (Bolivarian Republic of))

No: 17 (Algeria, Argentina, Benin, Burundi, Cambodia, Cuba, Cyprus, Eswatini, Guatemala, Guinea, Iceland, Lithuania, Macao SAR, China, Paraguay, Serbia, Uruguay, Viet Nam)

N/A: 10 (Albania, Ecuador, Germany, Iraq, Ireland, Mauritius, Nigeria, Russian Federation, Somalia, United Republic of Tanzania)

Traveling by air with a vision or hearing disability may involve certain obstacles, but efforts to improve accessibility are contributing to more inclusive environments. In many countries, there is a common focus on offering essential flight information in formats that are accessible to everyone.

Canada's Accessible Transportation for Persons with Disabilities require that information about any transportation-related service or facility be accessible. If information is made available in an electronic format, the format must be compatible with adaptive technology that is intended to assist persons with disabilities. For information is made available only in a paper format, it must be available on request, in large print, Braille or in an electronic format. Information in an audio format, must be made available in a visual format and information in a visual format, must be made available in an audio format.

Countries within or closely aligned with the European Union, lean heavily on Regulation (EC) No 1107/2006. This pivotal European legislation acts as a blueprint, directly influencing how nations approach accessibility for air passengers with disabilities or reduced mobility. Its widespread adoption underscores a common understanding that accessible communication isn't just a courtesy, but a right.

Regardless of specific regulations, the core principle remains consistent: flight service-related information must be provided in ways that overcome communication barriers. This means ensuring both vision and hearing-impaired individuals can access vital updates, from boarding calls to safety briefings. Whether it's through visual displays, audio announcements, or staff assistance, the aim is to keep all passengers informed at every step of their journey.

The responsibility for accessible communication is typically shared between airports and airlines, with details differing depending on circumstances.

At the airport facilities like designated check-in counters and trained personnel, some with sign language skills, are emerging as common features. Countries like Ukraine highlight the importance of staff training in bridging communication gaps. Many airports also provide comprehensive service

guides, both online and physically, detailing the assistance available. Bosnia and Herzegovina, for instance, directs passengers to specific airport websites for information on reduced mobility services. Switzerland's regulations explicitly task airports with ensuring flight information is available in accessible formats.

On board the aircraft, airlines are increasingly adopting technology and practices to ensure in-flight information is accessible. El Salvador, for example, champions on-board videos with both sound and subtitles in multiple languages for safety and service announcements. New Zealand emphasizes the importance of passengers informing the airline of their needs so that cabin crew can provide tailored assistance throughout the flight.

Beyond these specific examples, national air transport facilitation programs, like those in Armenia, Kyrgyzstan, Republic of Moldova and Turkmenistan, broadly outline the responsibilities of the aviation sector as a whole. Additionally, some countries, integrate aviation accessibility into broader national laws concerning digital services and public facility access, ensuring a more holistic approach to inclusivity.

This shared commitment to accessibility ensures that, regardless of the location, efforts are made to provide clear and effective flight information, contributing to a more inclusive air travel experience.

c) Designated pick-up and drop-off points for persons with disabilities close to the entrances and exits of the terminal building?

Yes: 46 (Armenia, Australia, Belarus, Benin, Bosnia and Herzegovina, Bulgaria, Cambodia, Canada, China, Cyprus, Czechia, Denmark, Egypt, El Salvador, Finland, France, Gabon, Georgia, Guinea, Guyana, Hungary, Iceland, Kazakhstan, Kyrgyzstan, Latvia, Macao SAR, China, Malaysia, Mongolia, New Zealand, Netherlands (St. Maarten), Nicaragua, Pakistan, Philippines, Poland, Portugal, Republic of Korea, Republic of Moldova, Serbia, Singapore, Slovenia, Sweden, Switzerland, Turkmenistan, Ukraine, United Kingdom, Venezuela (Bolivarian Republic of), Viet Nam)

No: 10 (Algeria, Argentina, Burundi, Cuba, Eswatini, Guatemala, Lithuania, Netherlands (Aruba), Paraguay, Sao Tome and Principe, Uruguay)

N/A: 10 (Albania, Ecuador, Germany, Iraq, Ireland, Mauritius, Nigeria, Russian Federation, Somalia, United Republic of Tanzania)

Providing designated pick-up and drop-off points for persons with disabilities near airport terminal entrances and exits is a common and often mandated practice internationally. Although legal requirements differ among countries, there is a general emphasis on ensuring accessibility for passengers with reduced mobility.

Canada's Accessible Transportation for Persons with Disabilities Regulations require airport operators to, upon request, assist passengers with disabilities to proceed between the curbside zone and the check-in and from the general public area to the curbside zone.

European Union Member States follow a unified approach by applying Regulation (EC) No 1107/2006 which includes guidelines for designated pick-up and drop-off points for persons with

disabilities close to the entrances and exits of the terminal building. This regulation establishes the rights of disabled persons and those with reduced mobility when traveling by air, promoting consistent accessibility standards across the European Union.

Many other nations have established their own regulations and frameworks. For example, Armenia, Gabon, Guinea, Kyrgyzstan, Republic of Moldova, and Turkmenistan utilize specific national air transport facilitation programs or aviation regulations. Countries like the Philippines, China, and Republic of Korea incorporate airport accessibility provisions into their broader national disability laws. Venezuela (Bolivarian Republic of) explicitly references its "Persons with Disabilities Act," highlighting a comprehensive approach.

At the operational level, airports are generally responsible for implementing these requirements, in collaboration with relevant stakeholders, including disability organizations. There is also an emphasis on providing clear and accessible information about available services and locations.

Accessible parking facilities are also recognized as essential components. The principle of positioning these facilities close to entrances and exits is consistently emphasized by several countries.

Some operational challenges are acknowledged. For example, El Salvador's temporarily relocated designated points during COVID-19, reducing accessibility and highlighting how contextual factors can hinder ideal service delivery despite commitment.

d) Accessible ground transportation services for persons with disabilities (where access to public transport services is limited)?

Yes: 36 (Argentina, Armenia, Australia, Belarus, Bosnia and Herzegovina, Bulgaria, Cambodia, Canada, China, Czechia, Denmark, Egypt, Gabon, Georgia, Guinea, Guyana, Hungary, Kyrgyzstan, Latvia, Macao SAR, China, Mongolia, New Zealand, Netherlands (St. Maarten), Nicaragua, Pakistan, Philippines, Poland, Portugal, Republic of Moldova, Serbia, Singapore, Slovenia, Switzerland, Turkmenistan, United Kingdom, Venezuela (Bolivarian Republic of), Viet Nam)

No: 19 (Algeria, Benin, Burundi, Cuba, El Salvador, Eswatini, Finland, France, Guatemala, Iceland, Kazakhstan, Lithuania, Malaysia, Netherlands (Aruba), Paraguay, Republic of Korea, Sao Tome and Principe, Sweden, Ukraine, Uruguay)

N/A: 11 (Albania, Cyprus, Ecuador, Germany, Iraq, Ireland, Mauritius, Nigeria, Russian Federation, Somalia, United Republic of Tanzania)

Accessible ground transportation for individuals with disabilities is addressed through a variety of national and international frameworks. Different countries implement regulations and programs to support inclusive mobility, with approaches varying based on context and infrastructure.

Canada's Accessible Transportation for Persons with Disabilities Regulations require airports to ensure that their agreements with ground transportation service providers ensure that the transportation that is accessible to persons who are travelling with a mobility aid or any other assistive device or with a service dog, including transportation with vehicles that are capable of carrying mobility aids.

European Union Member States refer to Regulation (EC) No 1107/2006 establishing standards for assistance to persons with disabilities or reduced mobility during air travel, including airport assistance and access to aircraft.

Outside the EU, nations such as Armenia, Gabon, Guinea, Republic of Moldova and Turkmenistan have established their own National Air Transport Facilitation Programmes, which often align with international guidelines to promote smoother passenger experiences within airports.

Some countries have comprehensive laws on accessibility that extend beyond aviation-specific regulations. For example, Australia's Disability Standards for Accessible Public Transport, the Philippines' Implementing Rules and Regulations of Batas Pambansa Bilang 344, China's Regulations on Building an Accessible Environment, and the Bolivarian Republic of Venezuela's Persons with Disabilities Act encompass wider public space and service accessibility, including ground transportation components.

Some countries provide detailed information about airport services tailored for passengers with reduced mobility.

The connection between aviation regulations and external ground transportation services is not always explicitly outlined. Hungary notes that while EU aviation safety rules are strict, ground transportation falls outside their direct regulation, although broader EU accessibility initiatives support such efforts. In contrast, New Zealand indicates that due to the small size of its airports, dedicated external ground transportation services are not considered necessary. Some airlines, such as Viet Nam Airlines (VNA), also provide specialized transport services for persons with disabilities at certain airports, complementing broader national policies.

Overall, efforts to facilitate accessible ground transportation are implemented through a combination of international regulations, national laws, and specific airport and airline initiatives. These measures collectively contribute to making travel experiences more inclusive for passengers with disabilities.

e) Adequate parking facilities for persons with disabilities?

Yes: 44 (Algeria, Argentina, Armenia, Australia, Belarus, Benin, Bosnia and Herzegovina, Bulgaria, Cambodia, China, Cyprus, Czechia, Denmark, Egypt, El Salvador, Finland, France, Gabon, Georgia, Guinea, Guyana, Hungary, Kazakhstan, Latvia, Macao SAR, China, Malaysia, Mongolia, Netherlands (St. Maarten), New Zealand, Nicaragua, Pakistan, Paraguay, Philippines, Poland, Portugal, Republic of Korea, Republic of Moldova, Serbia, Singapore, Slovenia, Switzerland, Turkmenistan, Ukraine, United Kingdom, Uruguay)

No: 11 (Burundi, Canada, Cuba, Eswatini, Guatemala, Iceland, Kyrgyzstan, Lithuania, Netherlands (Aruba), Sao Tome and Principe, Venezuela (Bolivarian Republic of), Viet Nam)

N/A: 11 (Albania, Ecuador, Germany, Iraq, Ireland, Mauritius, Nigeria, Russian Federation, Somalia, Sweden, United Republic of Tanzania)

Parking facilities for persons with disabilities or reduced mobility are an important aspect of developing accessible environments, and it is noticeable that many countries have implemented regulations and initiatives in this regard. Countries such as Armenia and Republic of Moldova include

requirements for parking facilities in their National Air Transport Facilitation Programs (NATFP) while others such as France and Singapore are covered in building codes.

Airports prioritize accessible parking close to terminal entrances. These spaces are designed with unobstructed routes, ramps, and lifts to address elevation changes. Some airports provide assistance call systems within parking areas, clearly signposted and accessible from vehicles. Payment and ticketing systems are often designed to be user-friendly for wheelchair users. Additionally, accessible shuttle services may connect distant parking lots to terminals, and valet parking services with dedicated accessible spots are frequently available. Travellers are encouraged to research airport facilities in advance to identify parking, shuttle options, and reservation possibilities.

In general, despite regional differences in implementation and responsibilities, there is a common commitment to ensuring that parking and air travel facilities are accessible and accommodating for all individuals.

Q 6. Have any service challenges for persons with disabilities, especially in any of the following categories been identified?

a) Accessibility of travel related information.

Yes: 14 (Australia, Bosnia and Herzegovina, Cambodia, China, Cuba, Finland, Gabon, Georgia, Mongolia, Netherlands (St. Maarten), New Zealand, Portugal, Republic of Korea, Sao Tome and Principe, Switzerland)

No: 40 (Algeria, Argentina, Armenia, Belarus, Benin, Bulgaria, Burundi, Canada, Cyprus, Czechia, Denmark, Egypt, El Salvador, France, Guatemala, Guinea, Guyana, Hungary, Iceland, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Macao SAR, China, Malaysia, Netherlands (Aruba), Nicaragua, Pakistan, Paraguay, Philippines, Poland, Republic of Moldova, Serbia, Singapore, Slovenia, Turkmenistan, Ukraine, United Kingdom, Uruguay, Venezuela (Bolivarian Republic of), Viet Nam)

N/A: 12 (Albania, Ecuador, Eswatini, Germany, Iraq, Ireland, Mauritius, Nigeria, Russian Federation, Somalia, Sweden, United Republic of Tanzania)

Access to travel-related information for persons with disabilities or reduced mobility involves various challenges across different countries. Certain common issues are evident, particularly concerning airports and airlines. Many nations face difficulties in providing accessible travel information and services.

A primary concern is the limited availability of accessible information. Cuba notes that travel details are not always available in formats suitable for individuals with visual or hearing disabilities, such as audio, sign language, or plain text.

Coordination and communication among travel stakeholders also present challenges. Often "codeshare flights" fail in transferring assistance information between the main airline and partner carriers, which can affect the delivery of necessary support. Similarly, airlines sometimes struggle to offer timely services if passengers do not specify their needs when booking. This suggests a need

for improved communication channels and awareness initiatives encouraging passengers to disclose their requirements.

Regulatory consistency and compliance are additional concerns. For instance, Australia describes a lack of uniform national standards for accessibility, indicating fragmentation in service provision. Portugal notes difficulties in ensuring that travel agencies and tour operators follow European regulations, emphasizing that enforcement is often a matter for authorities other than the Civil Aviation Authority. These issues reflect ongoing efforts to establish clear standards and accountability within the travel sector.

Other practical aspects, such as wayfinding within terminals, are also noted. Australia highlights challenges faced by passengers with disabilities or reduced mobility navigating complex airport layouts. Additionally, digital accessibility of booking and informational platforms is an area of concern, as seen in New Zealand's mention of website accessibility issues related to quarantine facility bookings.

Operationally, airports are offering various services, such as assistants, audio announcements, telescreens, and dedicated information desks.

While progress has been made in establishing legal and operational supports, challenges remain in providing comprehensive, accessible information, ensuring effective communication among all parties, and maintaining consistent standards across the travel environment.

b) The transportation of service animals.

Yes: 16 (Australia, Bosnia and Herzegovina, Cambodia, Canada, China, Czechia, Finland, France, Gabon, Georgia, Hungary, Mongolia, Netherlands (St. Maarten), Poland, Republic of Korea, Switzerland, Viet Nam)

No: 38 (Algeria, Argentina, Armenia, Belarus, Benin, Bulgaria, Burundi, Cuba, Cyprus, Denmark, Egypt, El Salvador, Guatemala, Guinea, Guyana, Iceland, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Macao SAR, China, Malaysia, Republic of Moldova, New Zealand, Netherlands (Aruba), Nicaragua, Pakistan, Paraguay, Philippines, Portugal, Sao Tome and Principe, Serbia, Singapore, Slovenia, Turkmenistan, Ukraine, United Kingdom, Uruguay, Venezuela (Bolivarian Republic of))

N/A: 12 (Albania, Ecuador, Eswatini, Germany, Iraq, Ireland, Mauritius, Nigeria, Russian Federation, Somalia, Sweden, United Republic of Tanzania)

The transportation of service animals for persons with disabilities or reduced mobility, especially in air travel, faces regulatory inconsistencies. Many countries lack clear definitions or standard certifications for service animals, resulting in varied rules and passenger experiences.

A primary concern is the absence of a universally accepted, clear definition of "service animal" or "assistance dog." Consequently, the recognition and treatment of such animals can differ between nations. Many EU Member States highlight the lack of a national legal definition and specific training requirements for assistance dogs. These differences can lead to varying policies at airlines and airports, and in some cases, may result in the rejection of service animals that are recognized in their home countries.

The distinction between trained assistance animals and emotional support animals also varies. Canada's regulations, for instance, require carriers to accept service dogs that have been individually trained by an organization or person specializing in service dog training to perform a task to assist the person with a disability with a need related to their disability. Emotional support animals don't generally have such training, from the definition of service dogs, which may affect passengers' expectations.

Certification and identification processes present additional challenges. France has received reports from disability organizations regarding difficulties faced by travellers with service dogs in training, despite the dogs having national certificates. China notes that processes for issuing IDs and quarantine certificates for service animals are still being developed, while Poland states that certification procedures are not clearly defined.

There are also practical concerns for airlines. China, for example, has identified issues related to service dogs urinating in passenger areas, which can impact the comfort of all passengers.

While many issues are common globally, certain countries have established specific regulations or guidelines. Bosnia and Herzegovina's "Law on Obligations in Civil Aviation" provides relevant legal context, along with airport-specific information for passengers with disabilities or reduced mobility. Georgia's "Rules on Providing Assistance to Disabled Persons when Traveling by Air" offer detailed procedures. Korea's "Airport Service Manual" outlines operational practices. Mongolia states that transportation of assistance dogs is provided free of charge.

Conversely, some countries have limited provisions. Gabon mentions a lack of signage for animal transport, which may cause logistical confusion. Viet Nam indicates that no specific regulations exist regarding service animals, leaving gaps in service provision.

Overall, some progress has been made in certain regions to support service animals in air travel. However, developing more consistent definitions, training standards, and certification practices worldwide could further improve the experience and accessibility for passengers or disabilities and reduced mobility.

c) Wheelchair service requests.

Yes: 12 (Bosnia and Herzegovina, Cambodia, Canada, China, Finland, Gabon, Georgia, Malaysia, Mongolia, Netherlands (St. Maarten), Republic of Korea, Sao Tome and Principe, Viet Nam)

No: 42 (Algeria, Argentina, Armenia, Australia, Belarus, Benin, Bulgaria, Burundi, Cuba, Cyprus, Czechia, Denmark, Egypt, El Salvador, Eswatini, France, Guatemala, Guinea, Guyana, Hungary, Iceland, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Macao SAR, China, Netherlands (Aruba), Nicaragua, Pakistan, Paraguay, Philippines, Poland, Portugal, Republic of Moldova, Serbia, Singapore, Slovenia, Switzerland, Turkmenistan, Ukraine, United Kingdom, Uruguay, Venezuela (Bolivarian Republic of))

N/A: 12 (Albania, Ecuador, Germany, Iraq, Ireland, Mauritius, New Zealand, Nigeria, Russian Federation, Somalia, Sweden, United Republic of Tanzania)

Many countries are striving to improve wheelchair services for passengers with disabilities or reduced mobility, with a general emphasis on advance notification to ensure timely and adequate assistance.

This allows airports and airlines to prepare the necessary equipment and personnel, making the travel experience smoother. A common thread across the board is that wheelchair service provided by airports or airlines is typically free of charge, a welcome policy that helps reduce the burden on passengers with disabilities. Passengers are usually encouraged to make their requests through various channels, including airline customer service, reservation offices, or dedicated online forms. This ensures that assistance can be coordinated from check-in through boarding and upon arrival. Furthermore, several nations have implemented specific laws and regulations to govern the provision of assistance for persons with disabilities in air transport, demonstrating a commitment to accessibility as a legal right.

While the overarching goals are similar, individual countries and their respective airports and airlines face unique challenges and employ specific strategies:

Bosnia and Herzegovina has a clear legal framework with its "Law on Obligations in Civil Aviation BiH," and major airports like Sarajevo, Tuzla, and Banja Luka provide detailed information on their services for passengers with reduced mobility (PRM) on their websites. This suggests a structured and transparent approach.

In Cambodia, airport operators are responsible for wheelchair services for all types of passengers—departing, arriving, transfer, and transit. However, some airlines, like Sky Angkor Airlines, may charge a fee for their own wheelchair service, though they transport passenger-owned wheelchairs free of charge. The importance of pre-booking is also highlighted to avoid delays.

Canada faces a different challenge: despite general provisions, the Canadian Transportation Agency has received complaints about passengers not receiving requested wheelchair assistance or experiencing delays.

Finland emphasizes a strict 48-hour advance notification period, often requiring a medical clearance form (MEDIF) for certain conditions. Helsinki Airport even has a dedicated Finnair Special Assistance check-in desk, streamlining the process for those needing aid.

A fundamental issue in Gabon is the lack of accessible information, with "no information panels at airports" being a significant barrier for passengers with disabilities.

Georgia has a comprehensive document, "The Rules on Providing Assistance to Disabled Persons when Traveling by Air Transport," underscoring its regulatory commitment. Tbilisi Airport, like many others, recommends pre-booking at least 48 hours in advance and allows personal mobility aids up to the departure gate.

Republic of Korea boasts a robust legal foundation with its "Mobility Impaired Persons' Movement Convenience Promotion Act Enforcement Decree," indicating a thorough approach to accessibility for all.

In Malaysia, passengers can request assistance at information counters, or via phone or email to the airport. Airlines like Malaysia Airlines also require a 48-hour notice for wheelchair requests, processed through their various contact channels.

Mongolia explicitly states that wheelchair service from the airport or airline is provided free of charge, setting a clear standard for passengers.

China grapples with an "inadequate number of compact onboard wheelchairs," which can hinder in-flight mobility. Despite this, major airports are generally well-equipped with ramps, elevators, and dedicated assistance, and personal wheelchairs are typically checked in free.

Sao Tome and Principe acknowledges a problem with "poor quality" services, indicating that while services may exist, their effectiveness or comfort for users is lacking.

Netherlands (St. Maarten) mentions "operators and services providers for person with disabilities," suggesting that some services might be outsourced to specialized companies.

Finally, Viet Nam highlights a unique challenge: "too heavy wheelchair owned by passengers," which could lead to logistical difficulties. Despite this, Viet Nam Airlines offers free wheelchair service and allows personal wheelchairs as checked or carry-on baggage without charge.

In general, many countries have made progress in providing wheelchair services for air passengers, but the implementation and quality of these services can differ, which can present continued challenges for persons with disabilities. Planning ahead remains an important aspect of ensuring a smooth journey.

d) Aircraft accessibility

Yes: 14 (Argentina, Australia, Bosnia and Herzegovina, Cambodia, China, France, Gabon, Georgia, Malaysia, Mongolia, New Zealand, Netherlands (St. Maarten), Portugal, Republic of Korea, Sao Tome and Principe)

No: 41 (Algeria, Armenia, Belarus, Benin, Bulgaria, Burundi, Canada, Cuba, Cyprus, Czechia, Denmark, Egypt, El Salvador, Eswatini, Finland, Guatemala, Guinea, Guyana, Hungary, Iceland, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Macao SAR, China, Netherlands (Aruba), Nicaragua, Pakistan, Paraguay, Philippines, Poland, Republic of Moldova, Serbia, Singapore, Slovenia, Switzerland, Turkmenistan, Ukraine, United Kingdom, Uruguay, Venezuela (Bolivarian Republic of), Viet Nam)

N/A: 11 (Albania, Ecuador, Germany, Iraq, Ireland, Mauritius, Nigeria, Russian Federation, Somalia, Sweden, United Republic of Tanzania)

Service challenges for persons with disabilities regarding aircraft accessibility indicate a set of common obstacles, especially related to smaller aircraft and airport infrastructure. Several countries face similar issues, with some providing possible solutions or illustrating the complexities involved in managing regulations.

A recurring theme across nations like Argentina, New Zealand, Portugal, and Sao Tome and Principe is the inherent difficulty posed by smaller aircraft. These compact planes often come with weight restrictions that can hinder the transport of wheelchairs, as seen in France and Sao Tome and Principe. Furthermore, their limited space makes it genuinely challenging to accommodate passengers with reduced mobility (PRMs), and for non-scheduled services using these aircraft, passenger movement can be severely restricted.

Beyond the aircraft themselves, insufficient accessible equipment at airports presents a significant barrier, especially at smaller facilities. Argentina and China, for instance, specifically noted a lack of essential boarding equipment such as ramps, ambulifts, or telescopic airbridges. This absence of proper infrastructure can make the simple act of boarding and disembarking a strenuous, if not impossible, task for individuals with disabilities.

Even when it comes to aircraft design, a gap exists. Australia highlighted that current standards primarily mandate accessible lavatories only on wide-body aircraft, leaving the majority of flights on narrow-body planes without this crucial amenity. This oversight can significantly impact the comfort and dignity of passengers with disabilities on shorter or regional routes.

Despite these challenges, there's a common thread of addressing these issues through legal frameworks and regulations. Countries like Bosnia and Herzegovina, Georgia, and Republic of Korea explicitly refer to or provide links to their specific laws and rules for assisting disabled persons in air travel. This indicates a shared recognition that robust legal mandates are essential to ensuring accessibility, even if the effectiveness of their implementation varies.

Argentina faces particular difficulties with its airports, where the absence of ramps, ambulifts, or telescopic airbridges frequently leads to complaints regarding safe aircraft access. For non-scheduled airlines operating lighter aircraft (under 5700 kg), limitations in passenger movement are a notable challenge.

In Australia, the focus is on aircraft design, where the current requirement for accessible lavatories on only wide-body aircraft leaves a significant portion of flights on narrow-body planes without this necessary feature.

Bosnia and Herzegovina stand out by referencing specific laws and dedicated airport pages (like those for Sarajevo, Tuzla, and Banja Luka airports) that outline protocols for PRM assistance, indicating a more formalized approach to accessibility.

France offers an interesting case study where an air carrier was deemed not at fault for refusing a booking due to wheelchair weight restrictions. This was because the airline had proactively informed its customers about approved transport restrictions, underscoring the importance of clear communication and adherence to regulated limitations.

On a more positive note, Malaysia's airports are equipped with Passenger Loading Bridges (PLBs), which significantly aid in accessible boarding.

However, China echoes the concern about smaller airports lacking sufficient accessible equipment for boarding and disembarking. Similarly, Sao Tome and Principe struggles with a general lack of lifts at its airports and faces frequent issues with disabled passengers weighing over 50kg, hinting at limitations in their equipment or personnel capabilities.

It's clear that while the ambition to provide accessible air travel is present, the practicalities of diverse aircraft types and varying airport infrastructures present ongoing hurdles that require continued attention and innovative solutions.

e) The transportation of disability aids

Yes: 18 (Bosnia and Herzegovina, Cambodia, Canada, China, Czechia, Denmark, Finland, France, Gabon, Georgia, Mongolia, Netherlands (St. Maarten), New Zealand, Portugal, Republic of Korea, Sao Tome and Principe, Sweden, Switzerland, Viet Nam)

No: 37 (Algeria, Argentina, Armenia, Australia, Belarus, Benin, Bulgaria, Burundi, Cuba, Cyprus, Egypt, El Salvador, Eswatini, Guatemala, Guinea, Guyana, Iceland, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Macao SAR, China, Malaysia, Netherlands (Aruba), Nicaragua, Pakistan, Paraguay, Philippines, Poland, Republic of Moldova, Serbia, Singapore, Slovenia, Turkmenistan, Ukraine, United Kingdom, Uruguay, Venezuela (Bolivarian Republic of))

N/A: 11 (Albania, Ecuador, Germany, Hungary, Iraq, Ireland, Mauritius, Nigeria, Russian Federation, Somalia, United Republic of Tanzania)

Despite their different contexts, countries encounter similar challenges and are tending to adopt common approaches regarding the transportation of disability aids for persons with disabilities, especially in the context of air travel.

Key common challenges:

Size and weight of mobility aids: a common challenge involves the logistical difficulties associated with large and heavy motorized wheelchairs. Countries such as Canada, China, Czechia, Portugal, and Viet Nam have observed that these aids can present operational challenges for airlines and ground staff, particularly due to differences in cargo hold capacities across aircraft.

Damage to equipment: the issue of damaged mobility equipment during transit is a common concern, clearly reported by some EU Member States and generally acknowledged as an area where handling could be improved. These aids are essential to an individual's independence, so damage can have a significant impact.

Defining and Regulating Aids: some countries, such as Czechia, Sweden and Switzerland, highlight the difficulty in consistently defining what constitutes a "disability aid" and in applying existing regulations, especially regarding batteries and dangerous goods. The absence of a universal categorization may result in confusion and variations in the implementation of rules.

Capacity Limitations: The issue of airlines restricting the number of wheelchairs on board, as noted by Denmark, reflects a broader systemic challenge that extends beyond individual aircraft constraints.

Common approaches and emerging best practices

Regulatory frameworks: many countries, including all European Union Member States, Bosnia and Herzegovina, Canada, Georgia and Republic of Korea, have established legal and regulatory structures to oversee assistance for persons with reduced mobility in air transport. These regulations typically specify minimum standards for service provision.

Operator responsibility: while the details may differ, it's generally understood that the main responsibility for safe and effective transport sits with the aircraft operators.

Advance notification and information sharing: a key point is that passengers should inform airlines in advance about their mobility aids, including details such as dimensions, weight, and battery type. This helps airlines in planning and addressing potential challenges. At the same time, airlines are becoming more expected to offer transparent information regarding their requirements. Canada's Accessible Transportation for Persons with Disabilities Regulations requires airlines to publish information about the maximum weight and dimensions of mobility aids that each make and model of its aircraft is capable of transporting.

Free transport: European Union Member States refer to Regulation (EC) No 1107/2006 establishing free transport of disability aids. Canada's Accessible Transportation for Persons with Disabilities Regulations prohibits airlines from charging a fee for the transportation of mobility aids. In general, many countries have implemented policies for the free transport of disability aids, recognizing them as essential personal equipment rather than standard baggage.

Addressing battery regulations: the mention of "Dangerous Goods / Batteries" by European Union Member States, along with the detailed regulations often provided by airlines, emphasizes the importance of following international safety standards (such as ICAO-TI) for the transport of lithium-ion batteries in power wheelchairs. This remains a key safety aspect within the industry.

International collaboration: Canada's initiative to launch an international working group on mobility aids and air travel is a significant example of a common approach: recognizing that these challenges are global and require collaborative, harmonized solutions. International bodies like IATA and ACI World are also actively working on accessibility standards and best practices for airports and airlines worldwide.

Focus on damage prevention and resolution: although damage may occur, the priority is on refining handling procedures and establishing clear processes for airlines to address and provide compensation for damaged equipment, with some regional variations in implementation.

Countries are working together to address the practical aspects of integrating increasingly diverse and complex mobility aids into current air transport systems. The general focus is on establishing clearer regulations, improving communication, and fostering international cooperation to ensure that persons with disabilities can travel with their essential aids safely, reliably, and without unnecessary difficulty.

f) Airport accessibility

Yes: 12 (Australia, Bosnia and Herzegovina, China, Gabon, Georgia, Lithuania, Malaysia, Mongolia, New Zealand, Republic of Korea, Sao Tome and Principe, Viet Nam)

No: 44 (Algeria, Argentina, Armenia, Belarus, Benin, Bulgaria, Burundi, Cambodia, Canada, Cuba, Cyprus, Czechia, Denmark, Egypt, El Salvador, Eswatini, Finland, France, Guatemala, Guinea, Guyana, Hungary, Iceland, Kazakhstan, Kyrgyzstan, Latvia, Macao SAR, China, Republic of Moldova, Netherlands (Aruba), Nicaragua, Pakistan, Paraguay, Philippines, Poland, Portugal, Serbia, Singapore, Slovenia, Sweden, Switzerland, Turkmenistan, Ukraine, United Kingdom, Uruguay, Venezuela (Bolivarian Republic of))

N/A: 10 (Albania, Ecuador, Germany, Iraq, Ireland, Mauritius, Nigeria, Russian Federation, Somalia, United Republic of Tanzania)

Navigating airports can present specific challenges for passengers with disabilities or reduced mobility, and information from various countries highlights both ongoing efforts and areas where accessibility can be improved.

Many nations, such as Australia, Malaysia, and Mongolia, recognize the importance of providing dedicated parking for passengers with disabilities. This serves as an initial step towards facilitating a smoother travel experience from the moment of arrival. However, this practice is not universal, as São Tomé and Príncipe notes the absence of priority parking facilities.

Beyond parking, the physical infrastructure of airports is a key focus. Countries like Malaysia and Australia emphasize the need for accessible facilities, including ramps, elevators, accessible washrooms, and clear signage or announcements to assist with navigation. Nonetheless, these provisions are not consistently available across all airports. Lithuania provides an example, mentioning a single ticketing counter at VNO airport that is not wheelchair accessible, with efforts underway to address this issue. Similarly, smaller airports in China and Viet Nam often lack adequate facilities or necessary equipment.

Legal measures have been adopted by several countries to address these issues. Bosnia and Herzegovina, Georgia and Republic of Korea reference specific laws or regulations that require assistance for passengers with disabilities. While these legal frameworks establish standards, the level of implementation varies.

Challenges also persist after entering the airport. The transfer to and from the terminal can be problematic. New Zealand points out difficulties in accessing suitable taxi vans, particularly for passengers arriving late in the evening. This highlights a need for improved coordination between airport services and local transportation to support a seamless travel experience.

Overall, although many countries are advancing in areas such as dedicated parking and legal guidelines, certain gaps remain. These include inconsistent facilities at smaller airports and a lack of integrated services like accessible transportation, which are essential for comprehensive accessibility.

g) Emerging trends

Yes: 12 (Australia, Bosnia and Herzegovina, Canada, China, Czechia, Finland, France, Georgia, Mongolia, Netherlands (St. Maarten), Portugal, Sweden, Switzerland)

No: 42 (Algeria, Argentina, Armenia, Belarus, Benin, Bulgaria, Burundi, Cuba, Cyprus, Denmark, Egypt, El Salvador, Eswatini, Gabon, Guatemala, Guinea, Guyana, Iceland, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Malaysia, Netherlands (Aruba), New Zealand, Nicaragua, Pakistan, Paraguay, Philippines, Poland, Republic of Korea, Republic of Moldova, Sao Tome and Principe, Serbia, Singapore, Slovenia, Turkmenistan, Ukraine, United Kingdom, Uruguay, Venezuela (Bolivarian Republic of), Viet Nam)

N/A: 12 (Albania, Cambodia, Ecuador, Germany, Hungary, Iraq, Ireland, Mauritius, Nigeria, Russian Federation, Somalia, United Republic of Tanzania)

Many countries are building upon existing regulations and legal frameworks to support the rights of people with disability or reduced mobility (PRM). The COVID-19 pandemic, however, revealed a gap in these laws, as they were not originally devised to accommodate new health protocols. For example, Czechia noted the absence of harmonized guidelines for measures like face masks and terminal access, which created some confusion among passengers and service providers. Similarly, Switzerland faced challenges in managing exemptions from mask mandates for certain passengers.

There is a noticeable trend toward increased diversity and volume of assistance needs. Finland has experienced an overall rise, while Netherlands (St. Maarten) specifically attributes this increase to "medical tourism." This has led countries like Switzerland to develop new methods for identifying and supporting individuals with hidden disabilities, such as dementia.

In response, airlines and airports are adopting new technologies and equipment. France's civil aviation authority now recognizes modern devices like "Segway-type equipment" as mobility aids. Australia's Qantas is working on developing own equipment, such as "Q Ramps," to facilitate disembarking. However, this transition introduces some challenges. Canada highlighted concerns that certain biometric technologies, such as iris scans, may not be accessible to passengers who are blind or partially sighted. Conversely, China identified difficulties faced by people with disabilities when attempting to purchase tickets online in an accessible manner.

To address these changing needs, airlines are investing in better communication and staff training. Virgin Australia, for instance, has implemented a specialized training program for its customer service team. Switzerland is working toward standardizing the recognition of assistance dogs and improving pre-notification procedures for assistance requirements. Some countries, however, are experiencing issues related to service misuse. Portugal reported incidents in which individuals have exploited the inability of airlines and airports to request proof of disability, thereby straining available resources.

Q 7. Does your State collect any other data or statistics not covered in question 6 that would be beneficial to this study?

Yes: 10 (China, France, Gabon, Mongolia, Republic of Korea, Serbia, Turkmenistan, United Kingdom, Uruguay, Viet Nam)

No: 43 (Algeria, Argentina, Armenia, Australia, Belarus, Benin, Bosnia and Herzegovina, Bulgaria, Burundi, Cambodia, Canada, Cuba, Czechia, Denmark, Egypt, El Salvador, Finland, Georgia, Guatemala, Guinea, Guyana, Hungary, Iceland, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Macao SAR, China, Malaysia, Republic of Moldova, Netherlands (Aruba), Netherlands (St. Maarten), New Zealand, Nicaragua, Pakistan, Paraguay, Philippines, Poland, Sao Tome and Principe, Singapore, Slovenia, Sweden, Switzerland, Ukraine, Venezuela (Bolivarian Republic of))

N/A: 13 (Albania, Cyprus, Ecuador, Eswatini, Germany, Iraq, Ireland, Mauritius, Nigeria, Portugal, Russian Federation, Somalia, United Republic of Tanzania)

Based on the responses regarding additional data collected on passengers with reduced mobility, several countries shared their approaches, highlighting both common strategies and unique perspectives.

A prevalent method is the use of passenger surveys and feedback. The United Kingdom employs a bi-annual "UK Aviation Consumer Survey," which includes a dedicated section to gather the experiences and attitudes of passengers with disabilities or reduced mobility (PRMs). This approach aims to directly capture passenger experiences. Other countries, like Uruguay, utilizes information from complaints and claims as useful sources, leveraging existing feedback channels to identify potential issues.

Another common approach involves relying on existing legal and regulatory frameworks to guide data collection. For instance, France collects data through inspections conducted under the ECAC Doc 30, which provides specific guidance for PRM inspections. This indicates that data collection often occurs within the context of compliance and operational oversight. Republic of Korea references a specific national law aimed at enhancing mobility for the "transportation vulnerable," suggesting efforts are based on a broader legal framework.

Some countries provided specific quantitative data points. Viet Nam, for example, reports tracking the total number of PRM passengers traveling by air each year. Such statistics are useful for understanding the scope and volume of this passenger segment.

Additionally, China's response was more qualitative, noting challenges faced by this group. They observed that persons with disabilities often have limited knowledge about air travel and are unfamiliar with relevant civil aviation requirements. This highlights an area related to communication and awareness that may warrant further attention.

Finally, some countries, including Mongolia, Serbia and Turkmenistan, did not provide any information, possibly indicating they do not currently collect additional data on this topic or lack readily available information.

Overall, the responses range from specific data and survey results to legal references and qualitative insights, demonstrating the different methods countries use to understand the needs of passengers with reduced mobility.

Q 8. What other challenges do you face implementing ICAO standards and recommended practices in the area of accessibility in aviation? Please provide a brief summary of any implementation challenges.

Yes: 14 (Australia, Czechia, France, Georgia, Kazakhstan, Lithuania, Malaysia, Netherlands (Aruba), Netherlands (St. Maarten), New Zealand, China, Philippines, Poland, Portugal, Sweden, Turkmenistan)

N/A or None: 52

One of the commonly noted challenges is the regulatory and legislative process. For countries such as Aruba, the difficulty largely lies not in the standards themselves but in the lengthy process of establishing them as national law. These bureaucratic delays can impact timely implementation.

Financial and resource limitations are also frequently mentioned. Several nations, including Malaysia and St. Maarten, identified budget constraints as significant obstacles. China observed that certain practices can impose substantial costs on airlines and airports. The Philippines highlighted a specific issue: the absence of specialized equipment like Aviramps, which can be costly for some operators.

From an operational perspective, some countries face particular challenges. Australia, for example, has difficulty achieving a uniform approach due to its mix of privatized airports and airlines, along with political differences between state and federal levels. Lithuania noted that the COVID-19 pandemic resulted in staffing reductions, and with passenger numbers increasing, recruiting and training new personnel to uphold service quality presents a challenge. New Zealand mentioned the specific difficulty of implementing standards for smaller aircraft serving regional airports.

Some countries are also dealing with more nuanced issues. Kazakhstan is seeking additional international guidance on how to support passengers with conditions such as autism, while Sweden raised important questions about balancing safety with accessibility, especially regarding aircraft features like toilets and onboard wheelchairs.

Regarding implementation approaches, a notable pattern is observed among European Union Member States reporting no significant challenges, as they benefit from a unified system. For them, ICAO standards are incorporated into European Union regulations, which are directly enforceable within their national laws. This common legal framework effectively mitigates many of the obstacles encountered elsewhere.

In summary, while many countries experience smooth implementation, those facing difficulties often cite legislative delays, financial constraints, and specific operational or logistical issues that necessitate tailored solutions.

Q 9. When developing policies, regulations, statutes, training programs, plans, or reports on accessible aviation, does your State consult any of the following?

- a) Stakeholders from the community of persons with disabilities.
- b) Airports
- c) Airlines
- d) Other

If yes, please identify how these consultations are carried out.

Yes: 44 (Argentina, Armenia, Australia, Belarus, Benin, Bosnia and Herzegovina, Bulgaria, Cambodia, Canada, China, Cuba, Czechia, Denmark, Egypt, Finland, France, Gabon, Georgia, Hungary, Iceland, Kazakhstan, Kyrgyzstan, Latvia, Malaysia, Netherlands (St. Maarten), New Zealand, Nicaragua, Paraguay, Philippines, Poland, Portugal, Republic of Korea, Republic of Moldova, Sao Tome and Principe, Serbia, Singapore, Slovenia, Sweden, Switzerland, Turkmenistan, Ukraine, United Kingdom, Uruguay, Venezuela (Bolivarian Republic of), Viet Nam)

No: 9 (El Salvador, Eswatini, Guatemala, Guinea, Lithuania, Macao SAR, China, Netherlands (Aruba), Pakistan)

N/A: 12 (Albania, Burundi, Cyprus, Ecuador, Germany, Guyana, Iraq, Ireland, Mauritius, Mongolia, Nigeria, Russian Federation, Somalia, United Republic of Tanzania)

A review of the responses from various countries indicates a common practice of consulting with different groups during the development of accessible aviation policies. While approaches differ, several shared methods are evident as central to their policy processes.

Centralized Consultation Bodies

Many nations utilize formal, structured entities to collect input. For instance, Australia has the Aviation Access Forum (AAF), and Canada relies on its Accessibility Advisory Committee. These groups serve as consistent platforms for dialogue, bringing together stakeholders from disability communities, airports, and airlines. Similarly, Czechia, Paraguay, and Singapore refer to their National Facilitation Committees as key forums for discussions, helping to review new policies with input from a range of experts and affected parties.

Direct and Collaborative Engagement

In addition to formal committees, many countries pursue direct, collaborative interactions. Argentina emphasizes joint efforts and regular meetings between regulatory agencies, disability organizations, and airport operators. Likewise, Benin and Armenia prefer direct communication methods, such as meetings and correspondence, to gather feedback. This approach facilitates open exchange of perspectives as new measures are considered.

Public and Regulatory Processes

A broader strategy involves public consultation and legislative review. The United Kingdom exemplifies this by publishing proposals online for public comment, often accompanied by workshops and seminars to gather detailed input from relevant stakeholders. Similarly, Cuba and Ukraine require that new regulations go through formal consultation processes with reviews by disability associations and government bodies. This ensures diverse perspectives, from the general public to specialized organizations, are considered before policies are finalized.

Overall, this widespread emphasis on consultation—through formal committees, direct engagement, or public processes—reflects an understanding that effective accessible aviation policies benefit from incorporating the expertise and experiences of all involved parties.

Q 10. Does your State promote any best practices regarding accessibility in civil aviation?

If yes, please provide a description and any available supporting data.

Yes: 33 (Algeria, Argentina, Armenia, Australia, Belarus, Benin, Bulgaria, Cambodia, Canada, Cyprus, Czechia, Finland, France, Gabon, Hungary, Iceland, Latvia, Lithuania, Macao SAR, China, Malaysia, Mongolia, New Zealand, Pakistan, China, Philippines, Poland, Portugal, Sao Tome and Principe, Singapore, Switzerland, Ukraine, United Kingdom, Venezuela (Bolivarian Republic of))

No: 19 (Bosnia and Herzegovina, Burundi, Cuba, Denmark, Egypt, Eswatini, Georgia, Guatemala, Guinea, Guyana, Kyrgyzstan, Netherlands (St. Maarten), Nicaragua, Paraguay, Republic of Moldova, Serbia, Slovenia, Sweden, Turkmenistan, Uruguay)

N/A: 16 (Albania, Ecuador, El Salvador, Germany, Iraq, Ireland, Kazakhstan, Mauritius, Netherlands (Aruba), Nigeria, Republic of Korea, Russian Federation, Somalia, United Republic of Tanzania, Viet Nam)

Many countries are taking steps to promote accessibility in civil aviation, often utilizing common approaches. A notable shared element is the reliance on established international and regional guidelines. The ECAC Doc 30 is frequently referenced as a primary resource for best practices, with European Union member States explicitly adopting it as their standard. Additionally, EU Member States participate in EU and ECAC working groups to share and promote best practices among airlines and airport operators.

Similarly, nations such as Pakistan and Venezuela refer to ICAO SARPs (Standards and Recommended Practices) of Annex 9, adapting these international principles into their national regulations.

In addition to implementing these international frameworks, several countries are developing their own national policies and legislation. Armenia, Gabon, and China have enacted dedicated laws to support accessible air travel. Malaysia is also working on a Code of Practice to formalize its standards.

Another common approach is fostering collaboration and communication among key stakeholders. Argentina, for example, holds regular consultations to gather input from various parties. Canada extends this effort by involving people with disabilities directly in discussions to help shape accessibility standards.

The practical implementation of these policies is also emphasized. Countries like Ukraine and China, Macao highlight the importance of designing airports and facilities with accessibility considerations from the outset. Algeria employs oversight audits to monitor compliance, while the Philippines has established a dedicated task force to address accessibility issues. To support these initiatives, some countries, including Argentina and Bulgaria, organize capacity-building courses and seminars for industry professionals.

Lastly, some countries prioritize making information accessible to the public. New Zealand provides information specifically for travellers with disabilities, and Poland conducts campaigns and announcements to promote the accessibility standards outlined in ECAC Doc 30.

These efforts aim to increase awareness and ensure that both industry stakeholders and the public are informed about available resources and best practices.

Q 11. What measures would be useful to assist States in developing programs for enhancing accessibility, building capacity, and/or in collecting statistical data on accessible aviation?

Yes: 37 (Argentina, Armenia, Benin, Cambodia, Canada, China, Czechia, Denmark, Egypt, Gabon, Guinea, Hungary, Iceland, Kazakhstan, Latvia, Macao SAR, China, Malaysia, Mongolia, Netherlands

(Aruba), New Zealand, Nicaragua, Pakistan, Paraguay, Philippines, Poland, Portugal, Republic of Moldova, Sao Tome and Principe, Serbia, Singapore, Slovenia, Sweden, Turkmenistan, Ukraine, United Kingdom, Uruguay, Venezuela (Bolivarian Republic of), Viet Nam)

N/A or None: 29 (Albania, Algeria, Australia, Belarus, Bosnia and Herzegovina, Bulgaria, Burundi, Cuba, Cyprus, Ecuador, El Salvador, Eswatini, France, Finland, Georgia, Germany, Guatemala, Guyana, Iraq, Ireland, Lithuania, Kyrgyzstan, Mauritius, Netherlands (St. Maarten), Nigeria, Republic of Korea, Russian Federation, Somalia, Switzerland, United Republic of Tanzania)

A review of the suggestions from various countries indicates a shared focus on several key strategies to improve accessible aviation.

One frequently mentioned approach is to promote a culture of knowledge sharing and ongoing learning. Many countries, including Armenia, Cambodia, Czechia and Latvia, recommend organizing workshops, seminars, and training sessions to facilitate experience exchange and capacity building. This emphasis on collaborative learning forms a core part of their recommendations. Canada, for example, emphasizes the usefulness of a compilation of information and direct access to experts from countries with well-established programs.

Another important area is the development of clear guidance and standardized regulations. Countries like Aruba and Macao SAR, China consider the creation of comprehensive guidance materials essential. Hungary suggests standardizing regulations and establishing a common understanding of fundamental terms, while Portugal and Ukraine support updating existing recommended practices into official standards to promote wider adoption.

Additionally, there is an emphasis on fostering active collaboration and stakeholder engagement. Argentina proposes establishing airport facilitation committees that include disability agencies, airport staff, and airline representatives to ensure all perspectives are considered. Similarly, Eswatini, Nicaragua, and others highlight the importance of involving advocacy groups and the community of persons with disabilities to gather input. Such collaboration is viewed as key to developing truly inclusive programs.

While these themes — knowledge sharing, regulatory standards, and stakeholder engagement — are most common, some countries provided additional insights. Benin and Canada, for instance, stressed the importance of systematic data collection and analysis to support informed policy decisions. The United Kingdom addressed the issue of wheelchair damage, suggesting a multilateral approach to liability and stowage procedures. These specific recommendations, alongside the broader themes, reflect a collective interest in advancing accessible and inclusive air travel for all.

Annex A

NOTE:

For questions 8 to 17, if an answer for either airport or airline was yes, then it was deemed as an overall yes for statistical purposes.

Question No. (Paper Survey)	Question No. (Survey Monkey)	Question	Country Name	Entities-Airlines Response (Yes/No)	Entities-Airports Response (Yes/No)	Response (Yes/No)	Information Provided (If yes)	Comment
0	1	Name of state	Albania					
1	2	Does your State have policies, regulations, or statutes giving persons with disabilities equivalent access to air transportation?	Albania					
2a	3	Please indicate whether your policies, regulations, or statutes include the following, as set out in the recommended practices outlined in Annex 9. Provisions requiring new or refurbished aircraft to conform, where aircraft type, size, and configuration permit, to standards of accessibility with respect to on-board equipment (including movable armrests, onboard wheelchairs, accessible washrooms, and suitable lighting and signs).	Albania					
2b	4	Provisions requiring the transportation of disability aids needed by persons with disabilities at no additional charge.	Albania					
2c	5	Provisions requiring the transportation of service animals needed by persons with disabilities, in the cabin of the aircraft on the floor at the person's feet, at no additional charge	Albania					
2d	6	Provisions allowing persons with disabilities to travel without providing medical clearance/ a medical certificate.	Albania					
2e	7	Provisions allowing assistants required by persons with disabilities to travel with them at a discounted price.	Albania					
3	8	Does your State have a program for validating compliance by airlines and/or airports related to accessibility in aviation?	Albania					
4a	9	Does your State have any policies, regulations, or statutes related to the following issues? a) That airlines and/or airports provide special assistance to ensure passengers with disabilities receive information and services customarily available to the general public. Examples include but are not limited: to safety briefings; accessible inflight entertainment; accessible wayfinding information; and/or accessible kiosks.	Albania					
4b	10	That airlines and/or airports establish and publish minimum standards of accessibility for persons with disabilities.	Albania					
4c	11	That airlines and/or airports ensure that persons with disabilities are given the information they need, in communication formats accessible to those with cognitive or sensory disabilities.	Albania					
4d	12	That airlines and/or airports implement training programs to ensure that trained personnel are available to assist persons with disabilities.	Albania					
5a	13	Does your State require airports, airlines, or other entities to provide the following facilities or services? Lifting devices, ramps, or other means of assisting persons with disabilities to board and disembark the aircraft when level entry is not available?	Albania					
5b	14	Flight service related information in an accessible communication format for the vision and hearing impaired?	Albania					
5c	15	Designated pick-up and drop-off points for persons with disabilities close to the entrances and exits of the terminal building?	Albania					
5d	16	Accessible ground transportation services for persons with disabilities (where access to public transport services is limited)?	Albania					
5e	17	Adequate parking facilities for persons with disabilities?	Albania

0	1	Name of state	Algeria					
1	2	Does your State have policies, regulations, or statutes giving persons with disabilities equivalent access to air transportation?	Algeria			Yes		
2a	3	Please indicate whether your policies, regulations, or statutes include the following, as set out in the recommended practices outlined in Annex 9. Provisions requiring new or refurbished aircraft to conform, where aircraft type, size, and configuration permit, to standards of accessibility with respect to on-board equipment (including movable armrests, onboard wheelchairs, accessible washrooms, and suitable lighting and signs).	Algeria			Yes	Provisions in the Air Algérie guidelines for reduced mobility passengers established pursuant to Regulation EC No. 1107/2006 of 5 July 2006 concerning the rights of disabled and reduced mobility passengers; Article 9 of Executive Decree No. 06-455 of 11 December 2006 on modalities for disabled access to physical, social, economic and cultural environments.	
2b	4	Provisions requiring the transportation of disability aids needed by persons with disabilities at no additional charge.	Algeria			Yes	Article 32 of Law 02-09 of 8 May 2002 on protection and support for the disabled which states, "Disabled persons in possession of a disability card stamped priority enjoy free transport of their personal mobility aids."	
2c	5	Provisions requiring the transportation of service animals needed by persons with disabilities, in the cabin of the aircraft on the floor at the person's feet, at no additional charge	Algeria			Yes	Provisions in the Air Algérie guidelines for reduced mobility passengers established pursuant to Regulation EC No. 1107/2006.	
2d	6	Provisions allowing persons with disabilities to travel without providing medical clearance/ a medical certificate.	Algeria			No		
2e	7	Provisions allowing assistants required by persons with disabilities to travel with them at a discounted price.	Algeria			Yes	Article 8(3) of Law No. 02-09 of 8 May 2002 on protection and support for the disabled; Article 7 of Executive Decree No. 06-144 of 26 April 2006 on disabled benefits, and transport free of charge and at reduced rates.	
3	8	Does your State have a program for validating compliance by airlines and/or airports related to accessibility in aviation?	Algeria		Yes		Article 10 of Executive Decree No. 06-455 of 11 December 2006 on modalities for disabled access to physical, social, economic and cultural environments.	
4a	9	Does your State have any policies, regulations, or statutes related to the following issues? a) That airlines and/or airports provide special assistance to ensure passengers with disabilities receive information and services customarily available to the general public. Examples include but are not limited to: safety briefings; accessible inflight entertainment; accessible wayfinding information; and/or accessible kiosks.	Algeria		Yes		Chapter III of Executive Decree No. 06-455 of 11 December 2006 on modalities for disabled access to physical, social, economic and cultural environments.	
4b	10	That airlines and/or airports establish and publish minimum standards of accessibility for persons with disabilities.	Algeria		No			
4c	11	That airlines and/or airports ensure that persons with disabilities are given the information they need, in communication formats accessible to those with cognitive or sensory disabilities.	Algeria		Yes		Chapter III of Executive Decree No. 06-455 of 11 December 2006 on modalities for disabled access to physical, social, economic and cultural environments.	
4d	12	That airlines and/or airports implement training programs to ensure that trained personnel are available to assist persons with disabilities.	Algeria		No			
5a	13	Does your State require airports, airlines, or other entities to provide the following facilities or services? Lifting devices, ramps, or other means of assisting persons with disabilities to board and disembark the aircraft when level entry is not available?	Algeria		Yes		Inter-ministerial Decision of 6 March 2011 on disabled access specifications for buildings and facilities open to the public; Algerian Standard NA 5214 on guardrail dimensions – Safety Regulations for dimensions of guardrails and stair ramps.	
5b	14	Flight service related information in an accessible communication format for the vision and hearing impaired?	Algeria		No			
5c	15	Designated pick-up and drop-off points for persons with disabilities close to the entrances and exits of the terminal building?	Algeria		No			
5d	16	Accessible ground transportation services for persons with disabilities (where access to public transport services is limited)?	Algeria		No

0	1	Name of state	Netherlands (Aruba)					
1	2	Does your State have policies, regulations, or statutes giving persons with disabilities equivalent access to air transportation?	Netherlands (Aruba)			No		
2a	3	Please indicate whether your policies, regulations, or statutes include the following, as set out in the recommended practices outlined in Annex 9. Provisions requiring new or refurbished aircraft to conform, where aircraft type, size, and configuration permit, to standards of accessibility with respect to on-board equipment (including movable armrests, onboard wheelchairs, accessible washrooms, and suitable lighting and signs).	Netherlands (Aruba)					
2b	4	Provisions requiring the transportation of disability aids needed by persons with disabilities at no additional charge.	Netherlands (Aruba)					
2c	5	Provisions requiring the transportation of service animals needed by persons with disabilities, in the cabin of the aircraft on the floor at the person's feet, at no additional charge	Netherlands (Aruba)					
2d	6	Provisions allowing persons with disabilities to travel without providing medical clearance/ a medical certificate.	Netherlands (Aruba)					
2e	7	Provisions allowing assistants required by persons with disabilities to travel with them at a discounted price.	Netherlands (Aruba)					
3	8	Does your State have a program for validating compliance by airlines and/or airports related to accessibility in aviation?	Netherlands (Aruba)					
4a	9	Does your State have any policies, regulations, or statutes related to the following issues? a) That airlines and/or airports provide special assistance to ensure passengers with disabilities receive information and services customarily available to the general public. Examples include but are not limited: to safety briefings; accessible inflight entertainment; accessible wayfinding information; and/or accessible kiosks.	Netherlands (Aruba)					
4b	10	That airlines and/or airports establish and publish minimum standards of accessibility for persons with disabilities.	Netherlands (Aruba)					
4c	11	That airlines and/or airports ensure that persons with disabilities are given the information they need, in communication formats accessible to those with cognitive or sensory disabilities.	Netherlands (Aruba)					
4d	12	That airlines and/or airports implement training programs to ensure that trained personnel are available to assist persons with disabilities.	Netherlands (Aruba)					
5a	13	Does your State require airports, airlines, or other entities to provide the following facilities or services? Lifting devices, ramps, or other means of assisting persons with disabilities to board and disembark the aircraft when level entry is not available?	Netherlands (Aruba)	No	No			
5b	14	Flight service related information in an accessible communication format for the vision and hearing impaired?	Netherlands (Aruba)	No	No			
5c	15	Designated pick-up and drop-off points for persons with disabilities close to the entrances and exits of the terminal building?	Netherlands (Aruba)	No	No			
5d	16	Accessible ground transportation services for persons with disabilities (where access to public transport services is limited)?	Netherlands (Aruba)	No	No			
5e	17	Adequate parking facilities for persons with disabilities?	Netherlands (Aruba)	No	No			
6a	18	Have any service challenges for persons with disabilities, especially in any of the following categories been identified? Accessibility of travel related information.	Netherlands (Aruba)			No		
6b	19	The transportation of service animals.	Netherlands (Aruba)			No

0	1	Name of state	Australia					
1	2	Does your State have policies, regulations, or statutes giving persons with disabilities equivalent access to air transportation?	Australia			Yes		
2a	3	Please indicate whether your policies, regulations, or statutes include the following, as set out in the recommended practices outlined in Annex 9. Provisions requiring new or refurbished aircraft to conform, where aircraft type, size, and configuration permit, to standards of accessibility with respect to on-board equipment (including movable armrests, onboard wheelchairs, accessible washrooms, and suitable lighting and signs).	Australia			Yes	https://www.legislation.gov.au/Details/F2005B01059	https://www.legislation.gov.au/Details/F2005B01059
2b	4	Provisions requiring the transportation of disability aids needed by persons with disabilities at no additional charge.	Australia			Yes	https://www.legislation.gov.au/Details/F2005B01059	https://www.legislation.gov.au/Details/F2005B01059
2c	5	Provisions requiring the transportation of service animals needed by persons with disabilities, in the cabin of the aircraft on the floor at the person's feet, at no additional charge	Australia			Yes	https://www.legislation.gov.au/Details/F2005B01059	https://www.legislation.gov.au/Details/F2005B01059
2d	6	Provisions allowing persons with disabilities to travel without providing medical clearance/ a medical certificate.	Australia			No		
2e	7	Provisions allowing assistants required by persons with disabilities to travel with them at a discounted price.	Australia			No		
3	8	Does your State have a program for validating compliance by airlines and/or airports related to accessibility in aviation?	Australia	Yes	Yes		The Australian Human Rights Commission is the designated agency that deals with complaints about disability access. The Government convenes the Aviation Access Forum to advise the Government on matters of policy, review legislation, and to work with the industry on developing Disability Access Facilitation Plans.	
4a	9	Does your State have any policies, regulations, or statutes related to the following issues? a) That airlines and/or airports provide special assistance to ensure passengers with disabilities receive information and services customarily available to the general public. Examples include but are not limited: to safety briefings; accessible inflight entertainment; accessible wayfinding information; and/or accessible kiosks.	Australia	Yes	Yes		Disability Standards for Accessible Public Transport 2002, Part 27 Information	
4b	10	That airlines and/or airports establish and publish minimum standards of accessibility for persons with disabilities.	Australia	Yes	Yes		Disability Access Facilitation Plans (DAFP) are developed by airports and airlines through the Aviation Access Forum (AAF) and are available for download from the AAF web site.	
4c	11	That airlines and/or airports ensure that persons with disabilities are given the information they need, in communication formats accessible to those with cognitive or sensory disabilities.	Australia	Yes	Yes		Disability Standards for Accessible Public Transport 2002, Parts 16-20, 26-27	
4d	12	That airlines and/or airports implement training programs to ensure that trained personnel are available to assist persons with disabilities.	Australia	Yes	Yes		Airports and Airlines develop their own programs in consultation with national agencies such as the Australian Airports Association, and Aviation Access Forum.	
5a	13	Does your State require airports, airlines, or other entities to provide the following facilities or services? Lifting devices, ramps, or other means of assisting persons with disabilities to board and disembark the aircraft when level entry is not available?	Australia	Yes	Yes		https://www.legislation.gov.au/Details/F2005B01059	https://www.legislation.gov.au/Details/F2005B01059
5b	14	Flight service related information in an accessible communication format for the vision and hearing impaired?	Australia	Yes	Yes		https://www.legislation.gov.au/Details/F2005B01059	https://www.legislation.gov.au/Details/F2005B01059
5c	15	Designated pick-up and drop-off points for persons with disabilities close to the entrances and exits of the terminal building?	Australia	No	Yes		https://www.infrastructure.gov.au/aviation/aaf/disability.aspx	https://www.infrastructure.gov.au/aviation/aaf/disability.aspx

Question No. (Paper Survey)	Question No. (Survey Monkey)	Question	Country Name	Entities-Airlines Response (Yes/No)	Entities-Airports Response (Yes/No)	Response (Yes/No)	Information Provided (If yes)	Comment
5d	16	Accessible ground transportation services for persons with disabilities (where access to public transport services is limited)?	Australia	Yes	Yes		https://www.legislation.gov.au/Details/F2005B01059 https://www.infrastructure.gov.au/aviation/aaf/disability.aspx	https://www.legislation.gov.au/Details/F2005B01059 https://www.infrastructure.gov.au/aviation/aaf/disability.aspx
5e	17	Adequate parking facilities for persons with disabilities?	Australia	Yes	Yes		https://www.infrastructure.gov.au/aviation/aaf/disability.aspx	https://www.infrastructure.gov.au/aviation/aaf/disability.aspx
6a	18	Have any service challenges for persons with disabilities, especially in any of the following categories been identified? Accessibility of travel related information.	Australia			Yes	Wayfinding in terminal buildings and national consistency.	
6b	19	The transportation of service animals.	Australia			Yes	The Aviation Access forum is working on achieving national consistency.	
6c	20	Wheelchair service requests.	Australia			No		
6d	21	Aircraft accessibility.	Australia			Yes	Current standards only require wide-body aircraft to be fitted with accessible lavatories. Most flights are done by narrow body aircraft though.	
6e	22	The transportation of disability aids.	Australia			No		
6f	23	Airport accessibility.	Australia			Yes	Wayfinding at airports.	
6g	24	Emerging trends.	Australia			Yes	Airlines are introducing their own initiatives in this area: for example QANTAS are introducing "Q Ramps" to ease disembarking, and Virgin Australia has a specialized training program for customer service reps to aid passengers with disabilities.	
7	25	Does your State collect any other data or statistics not covered in question 6 that would be beneficial to this study?	Australia			No		
8	26	What other challenges do you face implementing ICAO standards and recommended practices in the area of accessibility in aviation? Please provide a brief summary of any implementation challenges.	Australia				Achieving nationally consistent results is a challenge due to the nature of the decision making process, the privatized airports and airlines, and the State/Federal divide in Australian politics.	
9	27	When developing policies, regulations, statutes, training programs, plans, or reports on accessible aviation, does your State consult any of the following? a) Stakeholders from the community of persons with disabilities. b) Airports c) Airlines d) Other	Australia	Yes	Yes	Yes	The Government chairs the Aviation Access Forum (AAF) to develop policies and Disability Access Facilitation Plans (DAFP).	
10	28	Does your State promote any best practices regarding accessibility in civil aviation?	Australia			Yes	Best practices are set by the Disability Standards for Accessible Public Transport 2002 which is currently being reviewed by the AAF to ensure they remain fit for purpose, efficient, and effective. https://www.legislation.gov.au/Details/F2005B01059	Best practices are set by the Disability Standards for Accessible Public Transport 2002 which is currently being reviewed by the AAF to ensure they remain fit for purpose, efficient, and effective. https://www.legislation.gov.au/Details/F2005B01059
11	29	What measures would be useful to assist States in developing programs for enhancing accessibility, building capacity, and/or in collecting statistical data on accessible aviation?	Australia

Bulgaria			Yes	https://www.ecac-ceac.org/images/activities/facilitation/ECAC-Doc_30_Part_I_Facilitation_12th_Edition_May_2018.pdf	https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX%3A32006R1107
3	8	Does your State have a program for validating compliance by airlines and/or airports related to accessibility in aviation?	Bulgaria	Yes	Yes		https://www.ecac-ceac.org/images/activities/facilitation/ECAC-Doc_30_Part_I_Facilitation_12th_Edition_May_2018.pdf	
4a	9	Does your State have any policies, regulations, or statutes related to the following issues? a) That airlines and/or airports provide special assistance to ensure passengers with disabilities receive information and services customarily available to the general public. Examples include but are not limited to: safety briefings; accessible inflight entertainment; accessible wayfinding information; and/or accessible kiosks.	Bulgaria	Yes	Yes		All essential information provided to air passengers should be provided in alternative formats accessible to disabled persons and persons with reduced mobility, and should be in at least the same languages as the information made available to other passengers. -EU Regulation 1107/2006	
4b	10	That airlines and/or airports establish and publish minimum standards of accessibility for persons with disabilities.	Bulgaria	Yes	Yes		The document which contains ECAC policy recommendations on facilitation matters, such as persons with reduced mobility (PRMs), immigration, cargo or health is Doc 30, Part I - Facilitation (12th edition, May 2018). This document specifies policies adapted to the European context and is used as a reference in the development of national regulations concerning facilitation in ECAC Member States. Doc 30, Part I also includes implementation guidance in its various annexes.	
4c	11	That airlines and/or airports ensure that persons with disabilities are given the information they need, in communication formats accessible to those with cognitive or sensory disabilities.	Bulgaria	Yes	Yes		In order to provide the appropriate assistance, the air carrier should inform of the actual needs of the passenger using the "free text" box, visible in the messaging system between air carriers and airports (PAL/CAL messaging). This is particularly useful in the case of passengers with invisible disabilities.	
4d	12	That airlines and/or airports implement training programs to ensure that trained personnel are available to assist persons with disabilities.	Bulgaria	Yes	Yes		Provide disability-equality and disability-awareness training to all their personnel working at the airport who deal directly with the travelling public and; Ensure upon recruitment, all new employees attend disability related training and personnel receive refresher-training courses when appropriate.	
5a	13	Does your State require airports, airlines, or other entities to provide the following facilities or services? Lifting devices, ramps, or other means of assisting persons with disabilities to board and disembark the aircraft when level entry is not available?	Bulgaria		Yes		https://www.ecac-ceac.org/images/activities/facilitation/ECAC-Doc_30_Part_I_Facilitation_12th_Edition_May_2018.pdf	
5b	14	Flight service related information in an accessible communication format for the vision and hearing impaired?	Bulgaria	Yes	Yes		https://www.ecac-ceac.org/images/activities/facilitation/ECAC-Doc_30_Part_I_Facilitation_12th_Edition_May_2018.pdf

Examples include but are not limited: to safety briefings; accessible inflight entertainment; accessible wayfinding information; and/or accessible kiosks.	Canada	Yes	Yes		The Accessible Transportation for Persons with Disability Regulations (ATPDR) require both air carriers and air terminals to ensure that information provided to the public regarding their services or facilities be provided in an accessible manner, including by having accessible web sites. Additionally, by June 25, 2022 automated self-service kiosk must be accessible. Part I of the ATPDR provides more detailed information on the accessible communication that must be provided. Airlines are required, upon request, to describe the layout of the aircraft, including the location of washrooms and exits and location and operation of operating controls at the person's seat to passenger who are blind or have a visual impairment. Airlines are also required, upon request, to provide an individualized safety briefing and demonstration. Airports are also required to provide assistance to persons with disabilities, for example by providing assistance from the curb to check-in and having accessible ground transportation. Part II and Division I of Part IV of the ATPDR provide more detailed information on the accessibility service that must be provided. Airlines and airport not within the scope of the ATPDR have similar obligations under Part VII of the Air Transportation Regulations (https://laws-lois.justice.gc.ca/eng/regulations/SOR-88-58/page-13.html#h-915948) and the Code of Practice: Removing Communication Barriers for Travellers with Disabilities (https://otc-cta.gc.ca/eng/publication/removing-communication-barrierstravellers-with-disabilities-code-practice).	
4b	10	That airlines and/or airports establish and publish minimum standards of accessibility for persons with disabilities.	Canada	Yes	Yes		The ATPDR and Part VII of the ATR, as well as Codes of Practice: Removing Communication Barriers for Travellers with disabilities (links to all three provided in previous responses), Passenger Terminal Accessibility (https://otc-cta.gc.ca/eng/publication/passengerterminal-accessibility), and Accessibility of Non-National Air Terminals (https://otc-cta.gc.ca/eng/publication/accessibility-non-nationalairports-system-air-terminals-code-practice) all set out minimum standards of accessibility related to equipment, services and the communication of information. In terms of publishing information about these standards, section 5(1) of the ATPDR requires airlines and airports to publish that they are subject to these regulations, the regulatory provisions that apply to them, and the services they offer to persons with disabilities including any conditions that apply.	

Question No. (Paper Survey)	Question No. (Survey Monkey)	Question	Country Name	Entities-Airlines Response (Yes/No)	Entities-Airports Response (Yes/No)	Response (Yes/No)	Information Provided (If yes)	Comment
4c	11	That airlines and/or airports ensure that persons with disabilities are given the information they need, in communication formats accessible to those with cognitive or sensory disabilities.	Canada	Yes	Yes		Under section 4 of the ATPDR (link previously provided), airlines and airports must make general information available in alternative formats. Section 10 requires that public announcements be made in audible and visual formats. Sections 1.1, 2.3 and 2.4 of the Code of Practice: Removing Communication Barriers for Travellers with Disabilities (link previously provided) also has requirements pertaining to providing information in multiple formats, accessibility of announcements and arrival/departure monitors.	
4d	12	That airlines and/or airports implement training programs to ensure that trained personnel are available to assist persons with disabilities.	Canada	Yes	Yes		Sections 15-23 of the ATPDR include requirements for training programs to ensure personnel are trained to provide assistance to persons with disabilities. The Personnel Training for the Assistance of Persons with Disabilities Regulations (https://lawslois.justice.gc.ca/eng/regulations/SOR-94-42/index.html) have similar obligations. Greater detail can be found in the links above, but broadly the requirements cover training for personnel who interact with the public, provide physical assistance, handle mobility aids, and assist with special equipment or aids. There are also requirements around the timing of the training as well as the timing of refresher training that must be provided.	
5a	13	Does your State require airports, airlines, or other entities to provide the following facilities or services? Lifting devices, ramps, or other means of assisting persons with disabilities to board and disembark the aircraft when level entry is not available?	Canada	Yes	Yes		https://laws-lois.justice.gc.ca/eng/regulations/SOR-2019-244/page-7.html#h-1176315 (sections 69, 70, 71, 223, 224, 225) https://otc-cta.gc.ca/eng/publication/passenger-terminal-accessibility (section 2.4) https://otc-cta.gc.ca/eng/publication/accessibility-non-national-airports-system-air-terminals-code-practice (section 2.4)	https://laws-lois.justice.gc.ca/eng/regulations/SOR-2019-244/page-7.html#h-1176315 (sections 69, 70, 71, 223, 224, 225) https://otc-cta.gc.ca/eng/publication/passenger-terminal-accessibility (section 2.4) https://otc-cta.gc.ca/eng/publication/accessibility-non-national-airports-system-air-terminals-code-practice (section 2.4)

5e	17	Adequate parking facilities for persons with disabilities?	Canada	No	No		There are no federal regulations that require this, there may be municipal ones, but accessible parking is standard at airports.	
6a	18	Have any service challenges for persons with disabilities, especially in any of the following categories been identified? Accessibility of travel related information.	Canada			No		

Question No. (Paper Survey)	Question No. (Survey Monkey)	Question	Country Name	Entities- Airlines Response (Yes/No)	Entities- Airports Response (Yes/No)	Response (Yes/No)	Information Provided (If yes)	Comment
6b	19	The transportation of service animals.	Canada			Yes	The Canadian Transportation Agency does not include in its definition of service animals support animals that are not trained to perform a task for a person with a disability related to their disability (e.g., emotional support animals) and has received complaints from individuals who want to travel with their emotional support animal. No data available.	
6c	20	Wheelchair service requests.	Canada			Yes	The Canadian Transportation Agency has received complaints from passengers who allege to have not received wheelchair assistance when requested or who have experienced delays waiting for wheelchair assistance. No data is available.	
6d	21	Aircraft accessibility.	Canada			No		
6e	22	The transportation of disability aids.	Canada			Yes	Certain aircraft cannot accommodate large wheelchairs in the cargo hold. This tends to be more of an issue in smaller centres that cannot support larger aircraft, but this is not always the case. The Canadian Transportation Agency launched an international working group in 2018 to discuss the transport and stowage of mobility aids on aircraft. The final report can be found here: https://otccta.gc.ca/eng/publication/mobility-aids-and-air-travel-final-report .	Certain aircraft cannot accommodate large wheelchairs in the cargo hold. 11	29	What measures would be useful to assist States in developing programs for enhancing accessibility, building capacity, and/or in collecting statistical data on accessible aviation?	Canada				A useful means to assist States in enhancing accessibility programs and building capacity, would be having access to information, such as through the compendium that will be developed from this survey, as well as access to individuals working in accessible transportation programs in States with well-developed programs. The lack of available data on accessible aviation, as well as access to existing data, poses a challenge for decision-makers and limits the ability to develop policies for barrier-free travel. Norms around data collecting, standardization, and data openness, as well as the sharing of best practices in these areas, would address some of these concerns. Supporting norms for how data is being produced, collected and processed, and how this information is made available to transportation service providers, and policy-makers alike, is another key measure that would be useful to assist States in developing programs for enhancing accessibility and building capacity in aviation.

6a	18	Have any service challenges for persons with disabilities, especially in any of the following categories been identified? Accessibility of travel related information.	Czechia			No		

Question No. (Paper Survey)	Question No. (Survey Monkey)	Question	Country Name	Entities- Airlines Response (Yes/No)	Entities- Airports Response (Yes/No)	Response (Yes/No)	Information Provided (If yes)	Comment
6b	19	The transportation of service animals.	Czechia			Yes	It is necessary to define and harmonise requirements for certification of assistance dogs (service animals) and to ensure that assistance dogs are trained according to safe and recognised standards.	
6c	20	Wheelchair service requests.	Czechia			No		
6d	21	Aircraft accessibility.	Czechia			No		
6e	22	The transportation of disability aids.	Czechia			Yes	It is necessary to define and harmonize disability aids. There are often very heavy motorized equipments, which cause operational problems for air carriers.	
6f	23	Airport accessibility.	Czechia			No		
6g	24	Emerging trends.	Czechia			Yes	COVID-19 has necessitated significant changes to the passenger experiences when flying, PRMs included. It is clear, that the current legislation (Regulation (EC) 1107/2006, ICAO Annex 9) ensures PRMs opportunities for air travel comparable to those of other citizens and assistance to meet their particular needs, but this legislation does not take (and couldn't take) into account the situation caused by pandemic and its impact on PRMs travelling by air. The approach regarding the health measures had not been harmonized in the Member States and PRMs faced many differing national requirements (for example face covering, restricted entry to Terminal to travelers only). Lack of a common approach with harmonized guidelines and communication, related to COVID-19 measures, requirements and restrictions had a crucial impact on the PRM service providers.	
7	25	Does your State collect any other data or statistics not covered in question 6 that would be beneficial to this study?	Czechia			No		
8	26	What other challenges do you face implementing ICAO standards and recommended practices in the area of accessibility in aviation? Please provide a brief summary of any implementation challenges.	Czechia				Czechia and Portugal prepared working paper for FALP/12, where have identified some of the existing Recommended Practices that are already implemented by most States, and, consequently, should become Standards without significant changes to current practice in those States.	
9	27	When developing policies, regulations, statutes, training programs, plans, or reports on accessible aviation, does your State consult any of the following? a) Stakeholders from the community of persons with disabilities. b) Airports c) Airlines d) Other	Czechia	Yes	Yes	Yes	The NFC is the platform for these consultations.	
10	28	Does your State promote any best practices regarding accessibility in civil aviation?	Czechia			Yes	The NFC is the platform for these consultations.	
11	29	What measures would be useful to assist States in developing programs for enhancing accessibility, building capacity, and/or in collecting statistical data on accessible aviation?	Czechia				Workshops, trainings, sharing information, assessment programme on the assistance to PRM.	
Annex A	30	Details of the person completing this form	Czechia				Name: Marie Hauerova Official Title/Position: Senior Officer Mailing address: Nábřeží Ludvíka Svobody 12 Telephone number: 603119720 E-mail address: marie.hauerova@mdcr.cz

5c	15	Designated pick-up and drop-off points for persons with disabilities close to the entrances and exits of the terminal building?	El Salvador	Yes	Yes		The airport Covid plan has made it impossible for us to maintain the designated pick-up and drop-off points for persons with disabilities, but drop-off is in the parking lot, which is at the shopping centre level, and for pick-up, it's at the end of the main entrance corridor. Both are far from the entrance or exit of the terminal building.	
5d	16	Accessible ground transportation services for persons with disabilities (where access to public transport services is limited)?	El Salvador	No	No		As an airline, we don't have any transport service for any passengers. An option for passengers is to use the service provided by taxis at the airport exit on the customs side.	
5e	17	Adequate parking facilities for persons with disabilities?	El Salvador	No	Yes		As an airline, we do not have our own parking lot. Everything is provided by the airport, but there are adequate areas identified for persons with disabilities.	
6a	18	Have any service challenges for persons with disabilities, especially in any of the following categories been identified? Accessibility of travel related information.	El Salvador			No		
6b	19	The transportation of service animals.	El Salvador			No

2d	6	Provisions allowing persons with disabilities to travel without providing medical clearance/ a medical certificate.	France			Yes	<p>Regulation EC No. 1107/2006 does not require disabled and reduced-mobility persons to provide medical or other proof of disability or reduced mobility to justify the requested assistance. Carriers are therefore not permitted to require such proof as a condition for the sale of tickets or travel clearance. However, if there</p> <p>is a reasonable doubt as to whether the person can travel safely without assistance in flight, an air carrier may assess whether they are fit to fly and request information to that effect. Information is shared on the basis of medical confidentiality.</p> <p>https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32006R1107#:~:text=REGULATION%28EC%29%2F2006%2F1107%2F2006%20OF%20THE%20EUROPEAN%20PARLIAMENT,when%20travelling%20by%20air%28Text%20with%20EEA%20relevance%29</p>	
2e	7	Provisions allowing assistants required by persons with disabilities to travel with them at a discounted price.	France			No	<p>Regulation EC No. 1107/2006 does not say whether the seat of an assistant accompanying the disabled passenger should be free of charge. In the Interpretive guidelines on the application of Regulation EC No. 1107/2006 published on 11 June 2012, the experts of the European Commission recommend that when the air carrier requires disabled/reduced mobility passengers to be accompanied, the additional seat should be offered free of charge or at a significant discount. The DGCA encourages this practice. However, the interpretive guidelines are not legally binding.</p> <p>https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32006R1107#:~:text=REGULATION%28EC%29%2F2006%2F1107%2F2006%20OF%20THE%20EUROPEAN%20PARLIAMENT,when%20travelling%20by%20air%28Text%20with%20EEA%20relevance%29</p>

3	8	Does your State have a program for validating compliance by airlines and/or airports related to accessibility in aviation?	France	Yes	Yes		<p>The Law of 11 February 2005 on Equal Rights and Opportunities enshrines the principle of the right to disability compensation and the obligation on all of society to show solidarity toward disabled persons. The disability law reaffirms this principle of general accessibility regardless of the type of disability (physical, sensory, mental, psychological, cognitive or multiple). The accessibility obligation covers the entire journey without interruption. Thus, the disability policy duly highlights the obligation to make the entire journey accessible, covering all the different public areas such as buildings (new and existing establishments serving the public, etc.), public transport (bus, metro, tram, train, plane, boat), roads and public spaces (parks, parking lots, sidewalks, outdoor furnishings, etc.), public means of communication (internet, telephone, TV, etc.), public services (emergency numbers, know-your-rights facilities, etc.).</p> <p>As the national body designated by France to ensure compliance with Regulation EC No. 1107/2006 by airport managers and airlines, the DGCA has the mission of general oversight in respect of the Regulation. If the DGCA finds that an infraction has occurred, a sanction proceeding may be initiated that can result in a fine being levied by the Ministry for Transport.</p> <p>Law on Equal Opportunity: Loi n° 2005-102 du 11 février 2005 pour l'égalité des droits et des chances, la participation et la citoyenneté des personnes handicapées (1) - Légifrance (legifrance.gouv.fr)</p> <p>Regulation EC No. 1107/2006: https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32006R1107#:~:text=REGULATION%28EC%29%2F2006%20OF%20THE%20EUROPEAN%20PARLIAMENT,when%20travelling%20by%20air%28Text%20with%20EEA%20relevance%29</p>	
4a	9	Does your State have any policies, regulations, or statutes related to the following issues? a) That airlines and/or airports provide special assistance to ensure passengers with disabilities receive information and services customarily available to the general public. Examples include but are not limited to: safety briefings; accessible inflight entertainment; accessible wayfinding information; and/or accessible kiosks.	France	Yes	Yes		<p>Under Regulation EC No. 1107/2006, in order to give disabled/reduced mobility persons opportunities for air travel comparable to those of other citizens, assistance to meet their particular needs should be provided at no additional cost at airports as well as on board aircraft, by employing the necessary staff and equipment (whereas clause 4).</p> <p>https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32006R1107#:~:text=REGULATION%28EC%29%2F2006%20OF%20THE%20EUROPEAN%20PARLIAMENT,when%20travelling%20by%20air%28Text%20with%20EEA%20relevance%29</p>

5e	17	Adequate parking facilities for persons with disabilities?	France		Yes		<p>The building and housing code sets forth accessibility standards for vehicle parking applicable to existing public establishments or ones created on existing premises, and to existing facilities open to the public (see also the Decision of 8 December 2014 setting forth implementing arrangements for Articles R-111-19-17 to R-111-19-11 of the building and housing code, and Article 14 of Decree No. 2006-555 on disabled access to establishments serving the public located in an existing building and existing facilities open to the public). This is not applicable to airlines.</p> <p>Decision of 8 December 2014: Arrêté du 8 décembre 2014 fixant les dispositions prises pour l'application des articles R. 111-19-7 à R. 111-19-11 du code de la construction et de l'habitation et de l'article 14 du décret n° 2006-555 relatives à l'accessibilité aux personnes handicapées des établissements recevant du public situés dans un cadre bâti existant et des installations existantes ouvertes au public - Légifrance (legifrance.gouv.fr)</p> <p>Decree No. 2006-555 of 17 May 2016: Décret n° 2006-555 du 17 mai 2016 relatif à l'accessibilité des établissements recevant du public, des installations ouvertes au public et des bâtiments d'habitation et modifiant le code de la construction et de l'habitation - Légifrance (legifrance.gouv.fr)</p>	
6a	18	Have any service challenges for persons with disabilities, especially in any of the following categories been identified? Accessibility of travel related information.	France			No		
6b	19	The transportation of service animals.	France			Yes	Certain associations representing disabled/reduced mobility persons have alerted the DGCA to difficulties experienced by some of their members when boarding with their service dogs that are in training, even though the dogs have a national certificate. The DGCA has never had such a case referred to it directly.	
6c	20	Wheelchair service requests.	France			No		
6d	21	Aircraft accessibility.	France			Yes	One report to the DGCA referred to the refusal to book a passenger due to the weight restrictions for the wheelchair on board the aircraft. The air carrier was not found to be at fault, since it had informed its customers in advance about the transport restrictions approved by the competent authorities.	
6e	22	The transportation of disability aids.	France			Yes	Between 2017 and 2020, five reports were submitted to the DGCA regarding damaged mobility equipment (wheelchairs).	
6f	23	Airport accessibility.	France			No		
6g	24	Emerging trends.	France			Yes	The DGCA has been alerted to the use of segway type equipment by disabled/reduced mobility persons, and has found that such equipment can be considered a mobility aid by the terms of Regulation EC No. 1107/2006. https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32006R1107#:~:text=REGULATION%28EC%29%2FNo%201107%2F2006%20OF%20THE%20EUROPEAN%20PARLIAMENT,when%20travelling%20by%20air%28Text%20with%20EEA%20relevance%29	
7	25	Does your State collect any other data or statistics not covered in question 6 that would be beneficial to this study?	France			Yes	The DGCA seeks to use all data that can be derived from inspections under ECAC Doc 30, Annex 5-L (guidance material on PRM inspections). Doc30-Part I-12th-May 2018-Amendment No 5-02092021 (clean final) (ecac-ceac.org)

8	26	What other challenges do you face implementing ICAO standards and recommended practices in the area of accessibility in aviation? Please provide a brief summary of any implementation challenges.	France				It is very important to have more advance notices so as to better adapt services to needs, and maintain high standards.	
9	27	When developing policies, regulations, statutes, training programs, plans, or reports on accessible aviation, does your State consult any of the following? a) Stakeholders from the community of persons with disabilities. b) Airports c) Airlines d) Other	France	Yes	Yes	Yes	<p>The DGCA is answering this question strictly in accordance with the French position on the work of the PRM Sub-group of the ECAC Facilitation Working Group and the work on Regulation EC No. 1107/2006.</p> <p>Regular meetings are held with the stakeholders depending on how the French position evolves. Preparatory talks for input to the French position can include entities responsible for out-of-court dispute settlement (the tourism and travel mediation bureau in France), and other administrations such as the Défenseur des</p> <p>droits, the French authority that defends citizens' rights in cases of discrimination, and the Ministerial Delegation on Accessibility under the Ministry of Environmental Transition.</p> <p>https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32006R1107#:~:text=REGULATION%28EC%29%2F1107%2F2006%20OF%20THE%20EUROPEAN%20PARLIAMENT,when%20travelling%20by%20air%28Text%20with%20EEA%20relevance%29</p>	
10	28	Does your State promote any best practices regarding accessibility in civil aviation?	France			Yes	<p>The DGCA assists in the adoption of best practices for accessibility in civil aviation by virtue of its role as the implementing entity of Regulation EC No. 1107/2006, as well as its participation on the ECAC Facilitation Working Group. As such, the DGCA is well placed to recommend good practices to air transport operators and users.</p> <p>https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32006R1107#:~:text=REGULATION%28EC%29%2F1107%2F2006%20OF%20THE%20EUROPEAN%20PARLIAMENT,when%20travelling%20by%20air%28Text%20with%20EEA%20relevance%29</p>	
11	29	What measures would be useful to assist States in developing programs for enhancing accessibility, building capacity, and/or in collecting statistical data on accessible aviation?	France				Nothing to report.

0	1	Name of state	Hungary					
1	2	Does your State have policies, regulations, or statutes giving persons with disabilities equivalent access to air transportation?	Hungary			Yes		
2a	3	Please indicate whether your policies, regulations, or statutes include the following, as set out in the recommended practices outlined in Annex 9. Provisions requiring new or refurbished aircraft to conform, where aircraft type, size, and configuration permit, to standards of accessibility with respect to on-board equipment (including movable armrests, onboard wheelchairs, accessible washrooms, and suitable lighting and signs).	Hungary			Yes	According to Reg. EU 1107/2006, recital (11): "air carriers should, where possible, take such needs into account when deciding on the design of new and newly refurbished aircraft."	
2b	4	Provisions requiring the transportation of disability aids needed by persons with disabilities at no additional charge.	Hungary			Yes	EU Reg. 1107/2006, recitals (4), (8), (9), Art. 9.: "The managing body of an airport shall be responsible for ensuring the provision of the assistance specified in Annex I without additional charge to disabled persons and persons with reduced mobility."	
2c	5	Provisions requiring the transportation of service animals needed by persons with disabilities, in the cabin of the aircraft on the floor at the person's feet, at no additional charge	Hungary			Yes	"Service animals" is limited to assistance dogs. Eu Reg. 1107/2006, Art. 7. (2)	
2d	6	Provisions allowing persons with disabilities to travel without providing medical clearance/ a medical certificate.	Hungary			Yes	According to the European implementation of the affected Regulation, no medical clearance/certificate is requested.	
2e	7	Provisions allowing assistants required by persons with disabilities to travel with them at a discounted price.	Hungary			No		
3	8	Does your State have a program for validating compliance by airlines and/or airports related to accessibility in aviation?	Hungary	Yes	Yes		Hungary audits regularly the compliance with the Eu Reg. 1107/2006. The Regulation has 2 Annexes: Annex 1 concerning the obligations of the airports and Annex II. concerning the obligations of the air carriers.	
4a	9	Does your State have any policies, regulations, or statutes related to the following issues? a) That airlines and/or airports provide special assistance to ensure passengers with disabilities receive information and services customarily available to the general public. Examples include but are not limited: to safety briefings; accessible inflight entertainment; accessible wayfinding information; and/or accessible kiosks.	Hungary	Yes	Yes		Providing information in accessible format is a general requirement both for air carrier and airports. Eu Reg. 1107/2006 Recital (13), Art. 4.(3) and Annexes of the Regulation.	
4b	10	That airlines and/or airports establish and publish minimum standards of accessibility for persons with disabilities.	Hungary	No	Yes		According to EU Reg. 1107/2006 Art. 9., quality standards for the assistance should be published by airports which have yearly more PAX than 150.000.	
4c	11	That airlines and/or airports ensure that persons with disabilities are given the information they need, in communication formats accessible to those with cognitive or sensory disabilities.	Hungary	Yes	Yes		See our answer to 4. a)	
4d	12	That airlines and/or airports implement training programs to ensure that trained personnel are available to assist persons with disabilities.	Hungary	Yes	Yes		Training for all staff who can be in contact with PRM passengers is a requirement in EU Reg. 1107/2006 Art. 11.	
5a	13	Does your State require airports, airlines, or other entities to provide the following facilities or services? Lifting devices, ramps, or other means of assisting persons with disabilities to board and disembark the aircraft when level entry is not available?	Hungary	Yes	Yes		The assistance on behalf of airports and airlines are detailed in the Reg. 1107/2006 Annex I. and II. This requires proper infrastructure too.	
5b	14	Flight service related information in an accessible communication format for the vision and hearing impaired?	Hungary	Yes	Yes		There is no special requirement for vision and hearing impaired people. It is a general rule to provide information in accessible way to all categories of PRM-s according to EU Reg. 1107/2006.	
5c	15	Designated pick-up and drop-off points for persons with disabilities close to the entrances and exits of the terminal building?	Hungary		Yes		EU Reg. 1107/2006 Annex I.	
5d	16	Accessible ground transportation services for persons with disabilities (where access to public transport services is limited)?	Hungary	Yes	Yes		Ground transportation services are not directly part of the EU aviation regulations. However, generally the accessibility act in EU provides support to all modes of transport.

6a	18	Have any service challenges for persons with disabilities, especially in any of the following categories been identified? Accessibility of travel related information.	China			Yes	Persons with disabilities do not inform the airline of their disability or the help needed when purchasing their tickets, resulting in airlines unable to provide them with timely services.	
6b	19	The transportation of service animals.	China			Yes	Service dogs excreting in the passenger cabin upset other passengers; the provision and validation of IDs and quarantine certificates of service dogs are yet to be optimized.	
6c	20	Wheelchair service requests.	China			Yes	Inadequate number of compact onboard wheelchairs.	
6d	21	Aircraft accessibility.	China			Yes	Not enough accessible equipment for boarding and disembarking at smaller airports.	
6e	22	The transportation of disability aids.	China			Yes	Persons with disabilities do not always understand the many restrictions on checking electric wheelchairs as baggage.	
6f	23	Airport accessibility.	China			Yes	At smaller airports, accessible facilities do not meet the requirements or are inadequate in number.	
6g	24	Emerging trends.	China			Yes	It is rather difficult for persons with disabilities to purchase air tickets online in an accessible way.	
7	25	Does your State collect any other data or statistics not covered in question 6 that would be beneficial to this study?	China			Yes	Persons with disabilities have lower level of knowledge about air travel in general, and are not familiar with the relevant requirements of civil aviation.	
8	26	What other challenges do you face implementing ICAO standards and recommended practices in the area of accessibility in aviation? Please provide a brief summary of any implementation challenges.	China				Some of the recommended practices have higher requirements, placing additional cost burden on airlines and airports.	
9	27	When developing policies, regulations, statutes, training programs, plans, or reports on accessible aviation, does your State consult any of the following? a) Stakeholders from the community of persons with disabilities. b) Airports c) Airlines d) Other	China	Yes	Yes	Yes	Conduct surveys, hold themed seminars to heed the voices of representatives of persons with disabilities and their organizations.

2d	6	Provisions allowing persons with disabilities to travel without providing medical clearance/ a medical certificate.	Portugal			Yes	The EU Regulation does not impose any obligation on disabled persons and persons with reduced mobility to provide evidence of their disability or reduced mobility (whether medical or other) in order to justify the assistance requested. Thus, carriers are not allowed to ask for such a proof as a precondition of selling a ticket or of permitting carriage. However, in situations where the medical condition of a passenger is such that there is reasonable doubt that the passenger can complete the flight safely without requiring assistance during the flight, an air carrier may assess whether the passenger is fit-to-fly and request information to support that assessment.	
2e	7	Provisions allowing assistants required by persons with disabilities to travel with them at a discounted price.	Portugal			No

6a	18	Have any service challenges for persons with disabilities, especially in any of the following categories been identified? Accessibility of travel related information.	Portugal			Yes	The challenge of ensuring that travel agencies and tour operators comply with the European Regulation. The Civil Aviation Authority is not the appropriate authority for travel agencies and tour operators.	
6b	19	The transportation of service animals.	Portugal			No		
6c	20	Wheelchair service requests.	Portugal			No		
6d	21	Aircraft accessibility.	Portugal			Yes	Some aircrafts are very small and their dimensions difficult the transportation of the PRMs.	
6e	22	The transportation of disability aids.	Portugal			Yes	Some electric wheelchairs are very heavy and this is a problem for the ground handlers.	
6f	23	Airport accessibility.	Portugal			No		
6g	24	Emerging trends.	Portugal			Yes	Some abuses occur, taking advantage of the fact that airports and airlines cannot ask for a proof of disability or reduced mobility.	
7	25	Does your State collect any other data or statistics not covered in question 6 that would be beneficial to this study?	Portugal					
8	26	What other challenges do you face implementing ICAO standards and recommended practices in the area of accessibility in aviation? Please provide a brief summary of any implementation challenges.	Portugal				There have been no specific challenges on the implementation of the ICAO standards and recommended practices in the area of accessibility in aviation, as the EC Regulation No 1107/2006 of the European Parliament and of the Council of 5 July 2006, concerning the rights of disabled persons and persons with reduced mobility when travelling by air, is in line with Annex 9 SARPs. According to the European Union law regulations are binding and directly applicable in all Member States.	

Question No. (Paper Survey)	Question No. (Survey Monkey)	Question	Country Name	Entities-Airlines Response (Yes/No)	Entities-Airports Response (Yes/No)	Response (Yes/No)	Information Provided (If yes)	Comment
9	27	When developing policies, regulations, statutes, training programs, plans, or reports on accessible aviation, does your State consult any of the following? a) Stakeholders from the community of persons with disabilities. b) Airports c) Airlines d) Other	Portugal	Yes	Yes	Yes	As EC Regulation No 1107/2006 of the European Parliament and of the Council of 5 July 2006, concerning the rights of disabled persons and persons with reduced mobility when travelling by air, is binding and directly applicable and ECAC's Doc 30, Part I contains all the guidance considered necessary and adequate, Portugal has not developed additional policies or regulations. Therefore, stakeholders from the community of persons with disabilities, airports and airlines have not been consulted. If the need to develop additional policies or regulations will be identified stakeholders from the community of persons with disabilities, airports and airlines will be consulted.	
10	28	Does your State promote any best practices regarding accessibility in civil aviation?	Portugal			Yes	Between airports and airlines and also in several international fora, such as the regular EU and ECAC (Facilitation Sub-Group on the Transport of persons with reduced mobility) meetings.	
11	29	What measures would be useful to assist States in developing programs for enhancing accessibility, building capacity, and/or in collecting statistical data on accessible aviation?	Portugal				To upgrade certain Annex 9 Recommend Practices into Standards. Portugal submitted a Working Paper for the next Facilitation Panel in order to stress the importance of the PRM assistance. To have a pool of experts that can help developing national legislation, training programmes and reporting systems to collect and analyze data from airports and airlines.

0	1	Name of state	Singapore					
1	2	Does your State have policies, regulations, or statutes giving persons with disabilities equivalent access to air transportation?	Singapore			Yes		
2a	3	Please indicate whether your policies, regulations, or statutes include the following, as set out in the recommended practices outlined in Annex 9. Provisions requiring new or refurbished aircraft to conform, where aircraft type, size, and configuration permit, to standards of accessibility with respect to on-board equipment (including movable armrests, onboard wheelchairs, accessible washrooms, and suitable lighting and signs).	Singapore			Yes	<ul style="list-style-type: none"> The Civil Aviation Authority of Singapore (CAAS) has published guidelines to Singapore carriers on acceptable restraint devices for passengers with restricted mobility (link to the Advisory Circular - https://www.caas.gov.sg/docs/default-source/pdf/ac121-1-3(rev-0)-carriage-of-service-animals-in-the-passenger-cabin.pdf). The aircraft of Singapore carriers have accessible-friendly features, where aircraft type, size and configuration permit, although this is not mandated by CAAS. For example, wide-body aircraft of the existing Singapore Airlines fleet have moveable armrests, onboard wheelchairs, accessible washrooms and suitable lighting and signs, while wide-body aircraft of the Scoot fleet have an aisle wheelchair onboard. Wide-body aircraft of Singapore Airlines, Scoot and Jetstar Asia also have handicapped-friendly toilets. 	
2b	4	Provisions requiring the transportation of disability aids needed by persons with disabilities at no additional charge.	Singapore			No	<ul style="list-style-type: none"> Singapore carriers are not required to provide transportation of disability aids free-of-charge. Nonetheless, Singapore Airlines and Scoot do not charge for the use of a wheelchair outside the aircraft (e.g. to get from check in to the boarding gate). Jetstar Asia charges for such a wheelchair use (except certain flights). However, Singapore carriers all offer the use of on-board aisle wheelchairs which can shuttle passengers between their seats and the aircraft toilets, free of charge. Singapore carriers also provide, at no additional charge, the use of a high lift (when aircraft is not parked at an aerobridge and boarding is via stairs) to transport the wheelchair-bound passenger from the boarding gate to the aircraft in the absence of an aerobridge. They also allow for the carriage of passengers' own disability aids (e.g. wheelchairs, canes, crutches, walkers, etc.) free-of-charge. 	
2c	5	Provisions requiring the transportation of service animals needed by persons with disabilities, in the cabin of the aircraft on the floor at the person's feet, at no additional charge	Singapore			No	<ul style="list-style-type: none"> CAAS has provisions requiring Singapore carriers to transport service animals needed by persons with disabilities, without mandating that this service be provided free-of-charge (link to the Advisory Circular here - https://www.caas.gov.sg/docs/defaultsource/pdf/ac121-6-4-(rev-0)-acceptable-restraint-devices-for-passengers-with-restricted-mobility.pdf). Singapore carriers do not levy additional charge for the transportation of service animals. 	
2d	6	Provisions allowing persons with disabilities to travel without providing medical clearance/ a medical certificate.	Singapore			No	<ul style="list-style-type: none"> Singapore carriers allow persons with disabilities to travel without providing medical clearance/a medical certificate, although this is not mandated by the State. 	
2e	7	Provisions allowing assistants required by persons with disabilities to travel with them at a discounted price. Question No. (Paper Survey)	Question No. (Survey Monkey)	Question	Country Name	Entities-Airlines Response (Yes/No)	Entities-Airports Response (Yes/No)	Response (Yes/No)	Information Provided (If yes)	Comment
0	1	Name of state	Switzerland					
1	2	Does your State have policies, regulations, or statutes giving persons with disabilities equivalent access to air transportation?	Switzerland			Yes		
2a	3	Please indicate whether your policies, regulations, or statutes include the following, as set out in the recommended practices outlined in Annex 9. Provisions requiring new or refurbished aircraft to conform, where aircraft type, size, and configuration permit, to standards of accessibility with respect to on-board equipment (including movable armrests, onboard wheelchairs, accessible washrooms, and suitable lighting and signs).	Switzerland			No		
2b	4	Provisions requiring the transportation of disability aids needed by persons with disabilities at no additional charge.	Switzerland			Yes	Article 10, in conjunction with Annex II of Regulation (EC) No 1107/2006, defines that air carriers shall provide the assistance specified as follows: In addition to medical equipment, transport of up to two pieces of mobility equipment per disabled person or person with reduced mobility, including electric wheelchairs (subject to advance warning of 48 hours and to possible limitations of space on board the aircraft, and subject to the application of relevant legislation concerning dangerous goods).	
2c	5	Provisions requiring the transportation of service animals needed by persons with disabilities, in the cabin of the aircraft on the floor at the person's feet, at no additional charge	Switzerland			Yes	According to Article 10 in conjunction with Annex II of Regulation (EC) No 1107/2006, air carriers are obliged to provide assistance free of charge to persons with reduced mobility. This includes the Carriage of recognised assistance dogs in the cabin, subject to national regulations. In Switzerland there is no specific legal definition of the term "assistance dog" and training standards are not regulated.	
2d	6	Provisions allowing persons with disabilities to travel without providing medical clearance/ a medical certificate.	Switzerland			Yes	According to Article 3 of Regulation (EC) No 1107/2006, air carriers shall not refuse to accept a reservation for a flight and carry persons with disabilities on the grounds of their disability or reduced mobility (non-discrimination). Exceptions (Article 4): carriage could be refused based on safety requirements or if the size of the aircraft or its doors make the embarkation or carriage of the PRM passenger concerned physically impossible. In certain cases, air carriers may assess whether a passenger is fit-to-fly. The interpretative guidelines to Regulation (EC) No 1107/2006 state the following: "The Regulation does not impose any obligation on disabled persons and persons with reduced mobility to provide evidence of their disability or reduced mobility (whether medical or other) in order to justify the assistance requested. Thus, carriers are not allowed to ask for such a proof as a precondition of selling a ticket or of permitting carriage. However, in situations where the medical condition of a passenger is such that there is reasonable doubt that the passenger can complete the flight safely without requiring assistance during the flight, an air carrier may assess whether the passenger is fit-to-fly and request information to support that assessment."	
2e	7	Provisions allowing assistants required by persons with disabilities to travel with them at a discounted price.	Switzerland			No		

Question No. (Paper Survey)	Question No. (Survey Monkey)	Question	Country Name	Entities-Airlines Response (Yes/No)	Entities-Airports Response (Yes/No)	Response (Yes/No)	Information Provided (If yes)	Comment
3	8	Does your State have a program for validating compliance by airlines and/or airports related to accessibility in aviation?	Switzerland	Yes	Yes		The Federal Office of Civil Aviation (FOCA) is the National Enforcement Body for Regulation (EC) 1107/2006 in Switzerland and handles complaints concerning issues of beforementioned Regulation. In case of violations, sanctions could be imposed on violating airlines and airports. The aim is to ensure that the rights of disabled persons and persons with reduced mobility are respected. FOCA performs regular on-site audits (e.g. annual audits at the national airports) and on site inspections in order to check the compliance with the requirements of Regulation (EC) No 1107/2006. This is done on the basis of a standardized audit program (questionnaire, on-site examination). Following the audit, FOCA establishes an audit report containing a summary of the audit, a list of findings (if a non-compliance was found), observations and conclusions. In case of non-compliance / findings, corrective actions, which have to be carried out until a due date, are defined. Corrective actions have to be established and reported to FOCA until the due date.	
4a	9	Does your State have any policies, regulations, or statutes related to the following issues? a) That airlines and/or airports provide special assistance to ensure passengers with disabilities receive information and services customarily available to the general public. Examples include but are not limited: to safety briefings; accessible inflight entertainment; accessible wayfinding information; and/or accessible kiosks.	Switzerland	Yes	Yes		Regulation (EC) No. 1107/2006 requires airports and air carriers to provide assistance for persons with disabilities. Air carriers must publish information on relevant safety regulations, restrictions on carriage and essential information on a flight in an accessible form (Article 4(3) and Article 10 in conjunction with Annex II). Airports must provide basic information about the airport in accessible formats at designated arrival and departure points (Article 5(2)). Furthermore, ECAC DOC 30 provides best practices, e.g. Guidance on Websites information for Persons with Disabilities and Persons with Reduced Mobility (Annex 5-J).	
4b	10	That airlines and/or airports establish and publish minimum standards of accessibility for persons with disabilities.	Switzerland	Yes	Yes		Regulation (EC) No 1107/2006 defines the minimum assistance. Article 9 of Regulation (EC) No 1107/2006 requires airports exceeding exceeding 150'000 commercial passenger movements per year to define and publish quality standards for the assistance specified in Annex I. "In the setting of such standards, full account shall be taken of internationally recognized policies and codes of conduct concerning facilitation of the transport of disabled persons or persons with reduced mobility, notably the ECAC Code of Good Conduct in Ground Handling for Persons with Reduced Mobility" (Art. 9.2).	
4c	11	That airlines and/or airports ensure that persons with disabilities are given the information they need, in communication formats accessible to those with cognitive or sensory disabilities.	Switzerland	Yes	Yes		Air carriers must publish information on relevant safety regulations, restrictions on carriage and essential information on a flight in an accessible form (Article 4(3) and Article 10 in conjunction with Annex II). Airports must provide basic information about the airport in accessible formats at designated arrival and departure points (Article 5(2)). Furthermore, ECAC Doc 30 outlines best practices	
4d	12	That airlines and/or airports implement training programs to ensure that trained personnel are available to assist persons with disabilities.	Switzerland	Yes	Yes		Based on Article 11 of Regulation (EC) No 1107/2006 air carriers and airport managing bodies shall ensure that all their personnel, including those employed by any sub-contractor, providing direct assistance to disabled persons and persons with reduced mobility have knowledge of how to meet the needs of persons having various disabilities or mobility impairments, to provide disability-equality and disability-awareness training to all their personnel working at the airport who deal directly with the travelling public and to ensure all new employees attend disability-related training and personnel receive refresher training courses. ECAC Doc 30, Annex 5-G, gives guidelines on training.	

Question No. (Paper Survey)	Question No. (Survey Monkey)	Question	Country Name	Entities-Airlines Response (Yes/No)	Entities-Airports Response (Yes/No)	Response (Yes/No)	Information Provided (If yes)	Comment
5a	13	Does your State require airports, airlines, or other entities to provide the following facilities or services? Lifting devices, ramps, or other means of assisting persons with disabilities to board and disembark the aircraft when level entry is not available?	Switzerland	No	Yes		According to Article 7 in conjunction with Annex I of Regulation (EC) No 1107/2006, airports are obliged to assist persons with disabilities in connection with departure and arrival as well as in reaching connecting flights in transit. This also includes assistance and arrangements necessary to enable disabled persons and persons with reduced mobility to board the aircraft or to disembark from the aircraft, with the provision of lifts, wheelchairs or other assistance needed, as appropriate	
5b	14	Flight service related information in an accessible communication format for the vision and hearing impaired?	Switzerland	Yes	Yes		Annex I of Regulation (EC) No 1107/2006 defines that airports have to offer communication of information needed to take flights in accessible formats. Annex II of Regulation (EC) No 1107/2006 defines that air carriers shall communicate essential information concerning a flight in accessible formats	
5c	15	Designated pick-up and drop-off points for persons with disabilities close to the entrances and exits of the terminal building?	Switzerland	No	Yes		Airports are obliged to designate points of arrival and departure in accordance with Article 5 of Regulation (EC) No 1107/2006. The points of arrival and departure shall be clearly signed (Art. 5.2). ECAC Doc 30 Annex 5-K gives recommendations for the harmonization of call point signage in airports.	
5d	16	Accessible ground transportation services for persons with disabilities (where access to public transport services is limited)?	Switzerland	No	Yes		According to Article 7 in conjunction with Annex II of Regulation (EC) No 1107/2006, airports are responsible for providing appropriate assistance to passengers in the airport area. Swiss national law (Disability Equality Act) regulates the accessibility and assistance for railway or bus passengers.	
5e	17	Adequate parking facilities for persons with disabilities?	Switzerland	No	Yes		Regulation (EC) No 1107/2006 does not contain specific provisions on adequate parking facilities for persons with disabilities. The Swiss Disability Act and Ordinance regulate adequate parking facilities for persons with disabilities and airports are obliged to provide the defined minimum.	
6a	18	Have any service challenges for persons with disabilities, especially in any of the following categories been identified? Accessibility of travel related information.	Switzerland			Yes	NEB received reports that it was not possible for some codeshare flights to notify the passenger's information concerning assistance for a flight carried out by a codeshare-partner (single booking).It concerned the transmission of the information between the contracting airline and the codeshare partner airline.	
6b	19	The transportation of service animals.	Switzerland			Yes	No (national) legal definition of the term "assistance dog" nor specifications concerning the training of assistance dogs. There is no uniform international standard for the recognition of assistance dogs. As a result, passengers are treated differently depending on the operating air carrier and the point of departure or arrival and sometimes, assistance dogs recognized in the passenger's country of origin are refused carriage.	
6c	20	Wheelchair service requests.	Switzerland			No		
6d	21	Aircraft accessibility.	Switzerland			No		
6e	22	The transportation of disability aids.	Switzerland			Yes	Issues with regard to transportation of disability aids concern Dangerous Goods / Batteries. Dangerous goods regulations do not consider some sports equipment / portable electronic devices, e.g. mini-segways or hoverboards, as mobility aids, which means that with regard to the power of the installed batteries and in accordance with the ICAO-TI. (ICAO Provisions regarding Small Vehicles powered by Lithium Batteries) other values are applied than for disability aids such as wheelchairs etc.	
6f	23	Airport accessibility.	Switzerland			No

11	29	What measures would be useful to assist States in developing programs for enhancing accessibility, building capacity, and/or in collecting statistical data on accessible aviation?	United Kingdom				<p>Wheelchairs are essential aid for those who use them to move, but are vulnerable to damage and/or loss during air travel. Furthermore, the wheelchairs usually are expensive, but are categorised under the Montreal Convention 1999 as cargo, which limits the airlines' liability to a level which is less than the value. While the Montreal Convention 1999 includes a right for airlines to waive the limits, the voluntary take-up of this waiving is not widespread, although some good practice has been identified in the UK. The UK government aims to increase the practice of waiving the liability, and is considering ways to achieve this within the scope of the Montreal Convention 1999. It would be helpful if this issue would be considered multilaterally. The UK government is also exploring options to make the stowing of wheelchairs and other mobility equipment in the aircraft hold safer, reducing the risk of damages occurring during transit. It would be helpful for this aspect to be considered multilaterally to achieve a standard that can be used globally, which would increase confidence, and ensure safer travel by air, for disabled persons and persons with reduced mobility.</p>
