ICAO

# 2025 ICAO TRIP SYMPOSIUM

MONTRÉAL , CANADA | NOVEMBER 4 - 6

# Anne-Gaëlle Baudouin

General Manager of France Titres
Program Director of France Identité
Ministry of Interior, France

# Agenda

01 **France Identité**

Understanding France’s approach to digital identity

02 **The EU Regulatory Framework**

Understanding the regulatory framework around digital identity in the EU

03 **Consoritum APTITUDE**

Understanding the APTITUDE consortium, and its use cases

04 **The DTC in the consortium APTITUDE**

Understanding APTITUDE’s approach to DTC piloting

# 01

# France Identité

Understanding France’s approach to digital identity

FRANCE IDENTITÉ

# The French EUDI Wallet centers around physical persons

The French EUDI Wallet : a trusted, secure, and user-centric tool

## Identity

- Name, surname
- Gender
- Nationality

## Credentials

- Qualifications
- Licenses
- Public permits

## Services

- Authentication
- Signature
- Notification
- Create pseudonyms
- Proof of identity
- Create attestation

# How does the France Identité application work?

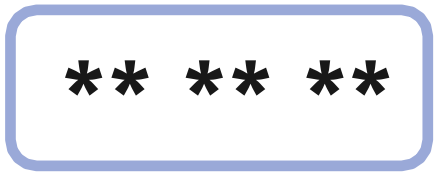
France Identité is the companion app for state issued documents

## The new ID Card

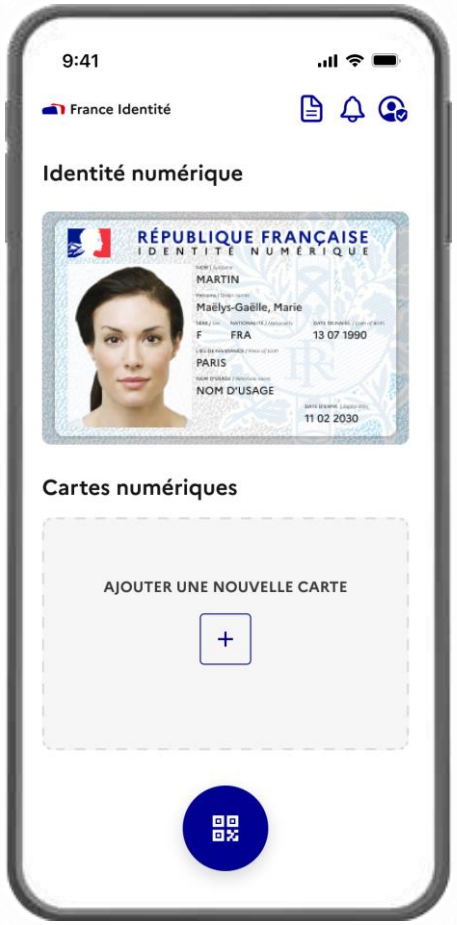
containing the identity data.

## An associated PIN

allowing users to consent to the use of their data.



# Three categories of use



Online track

Single-use proof of ID

Face-to-face

02

# EU Regulations

Understanding the regulatory framework around digital identity in the EU

EU Digital Identity Wallet

# Understanding eIDAS 2

An obligation for EU Member States to provide their citizens with a digital identity wallet

## New obligations for Member States…

All EU Member States shall provide at **least one EUDI Wallet to their citizens by 2026**

The EUDI Wallets will be **accepted everywhere in the EU**

Wallets are **user-centered** and **compliant** with EU data privacy and security norms

## … defining a shared approach to European Digital Identity Wallets

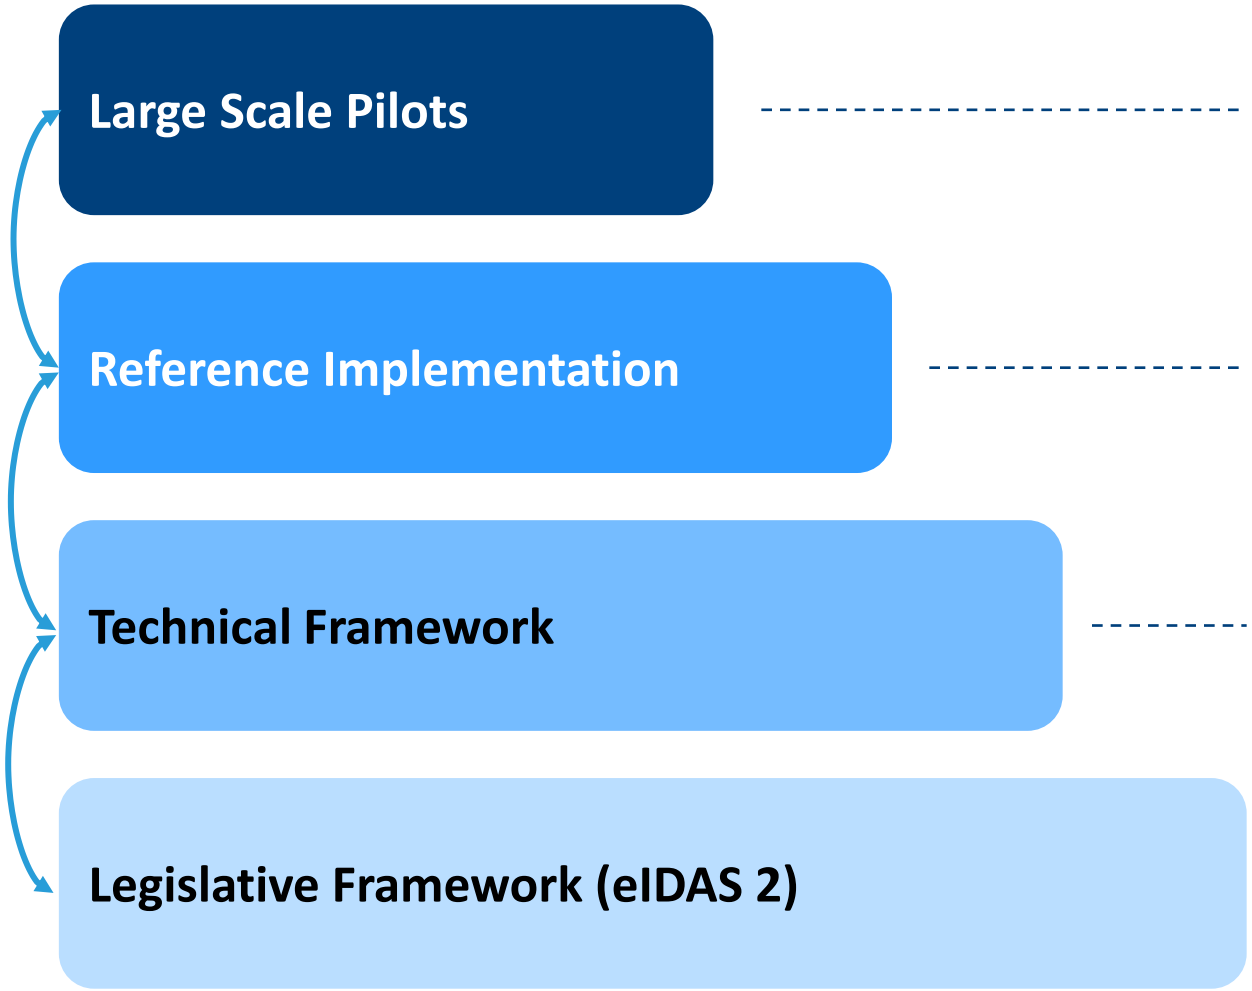
**Identification** and **authentication** to access public or private services

**Storing** and **sharing** identity data/ attestations

**Signing** electronically

# Implementing eIDAS 2

A collaborative and iterative process among member states to ensure the deployment of EUDI Wallets by 2026



**6 large-scale pilots** experimenting with EUDI Wallets use cases and cross border interoperability

**Libraries and software components** serving as a baseline for MS to build their wallets

**Functional and technical specifications** of the EUDI Wallets

**Set of obligations and definition** of the EUDI Wallets' functionalities, trust framework and certification requirements

# 03

# APTITUDE

Understanding the APTITUDE consortium, and its use cases

aptitude
For European Digital Identity

Co-funded by the European Union

# APTITUDE: A Large-Scale Pilot

**12** Countries represented

**115** Public and private partners

Ministries, state operators, research centres, major companies and start-ups acting as wallet issuers, credential issuers, and relying parties

**29** Observers

Entity external to the Consortium with a recognized advisory role in the project.

# A Large-Scale Pilot structured around mobility and payment use cases

## Wallet for travel – Digital Travel Credentials (DTC)

Manage the issuance and revocation of DTCs via the EUDI Wallet for use cases related to border control.

## Tickets & Check-ins

Simplify the traveler's journey for tickets and check-in at hotels, transportation and tourist sites.

## Mobile Vehicle Registration Certificate (mVRC)

Pilot the use of the mobile Vehicle Registration Certificate within the EUDIW in various scenarios (multiple drivers, rentals, etc.)

## Wallet for Payment and Banking

Integrate banking and payment functionalities in the EUDI Wallets to enable secure transactions.

04

# Digital Travel Credentials in APTITUDE

Understanding APTITUDE's approach to DTC piloting

# 8 MS and Ukraine are involved in WP3

France Titres
AGENCE NATIONALE DES TITRES SÉCURISÉS

WP3 is lead by France Titres

# A coalition of public and private contributors

# WP3’s main objectives

Piloting the use of DTCs in Europe

The objective of this use case is to enable citizens to use their EUDIW for easier and quicker border crossing.

### Implementation within EUDI Wallet

Demonstrate that Digital Travel Credentials can be issued within the EUDIWs

### Piloting DTC at border control

Experiment the use of DTC within the EUDIW at border control

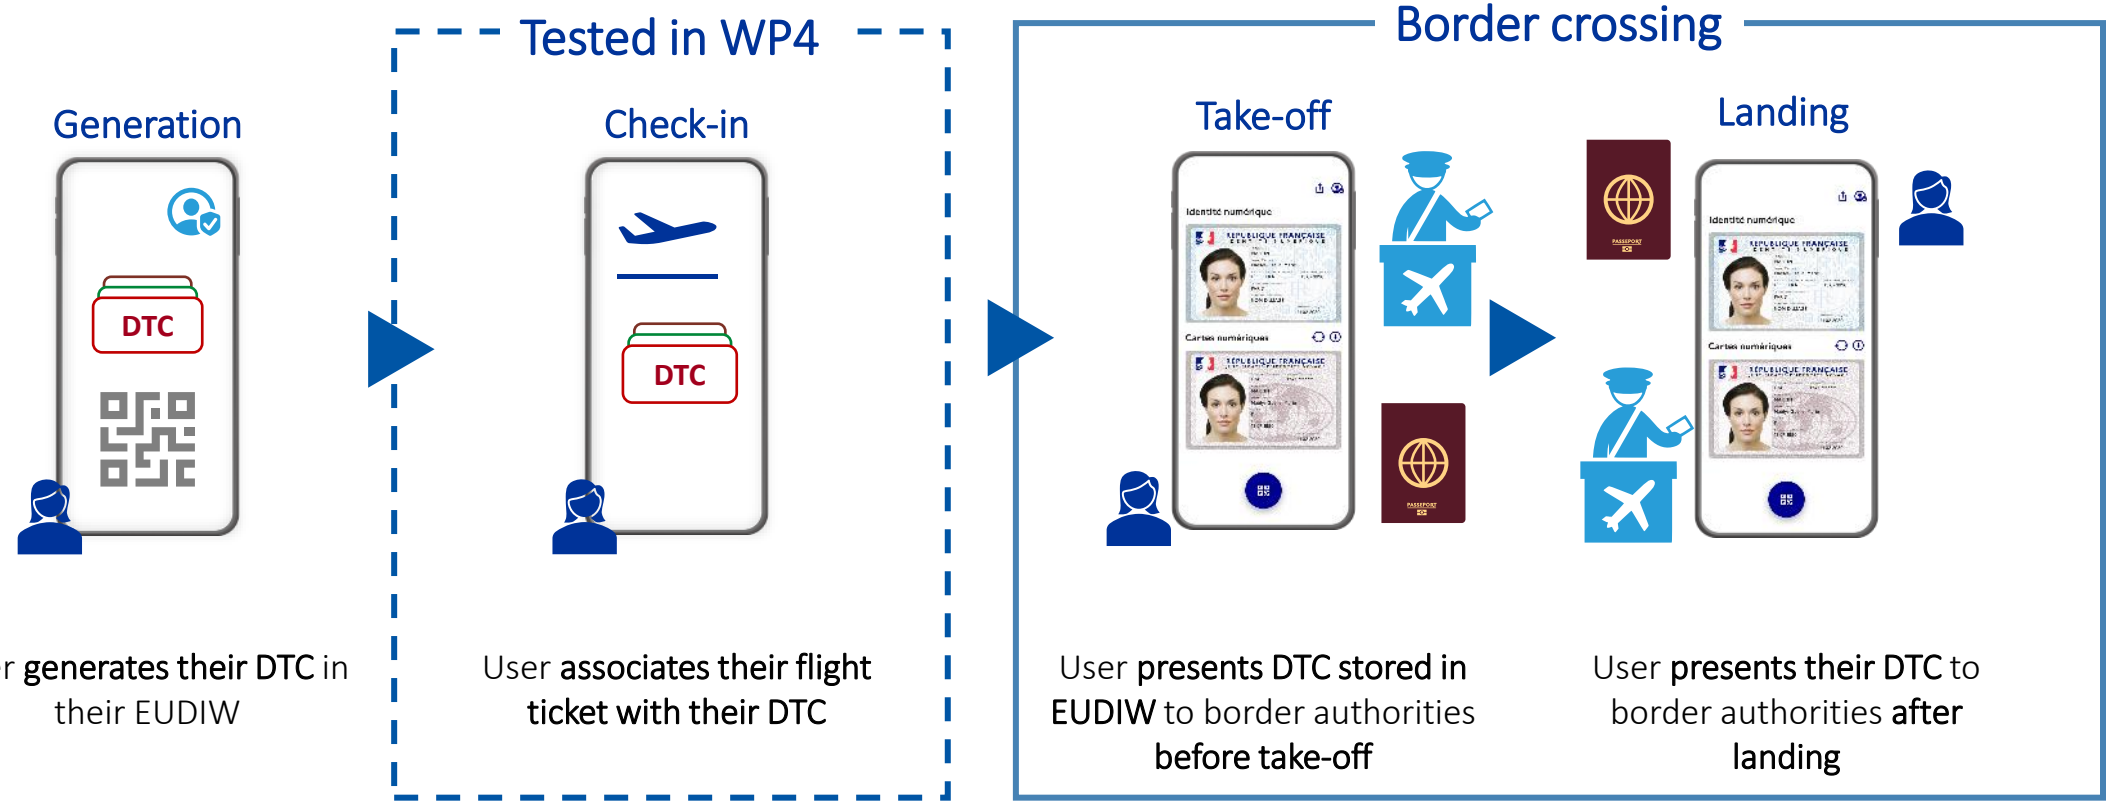
### Compliance with relevant standards

Develop a solution that is as ICAO and eIDAS compliant as possible, with a strong authentication and consent from the user

### Alignment with other Work Packages

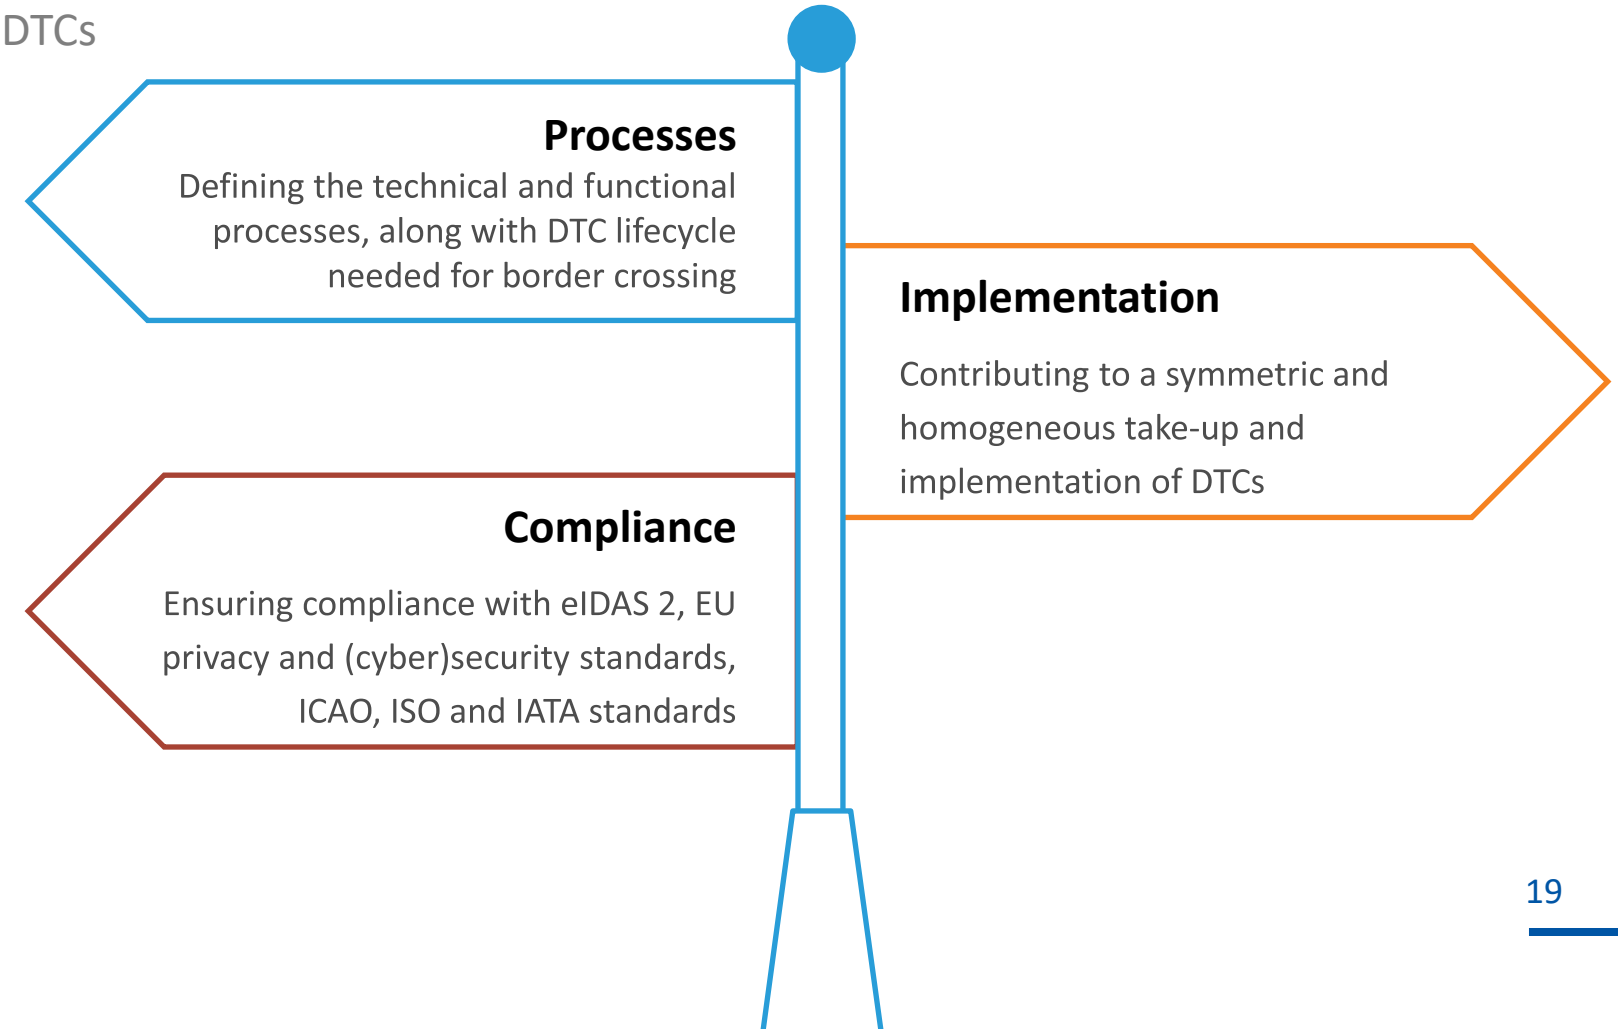
Ensure that activities under WP3 (Digital Travel Credentials) are aligned with WP2 (Tech standards, specifications & testing) and WP4 (Tickets & Check-in)

# DTC use case to consolidate within WP3 with physical passport on hand



# Key points to discuss

Discussions within Working Group 3 will contribute to guide France's implementation of DTCs



# WP3 Roadmap

**January 2026**
Definition of mechanisms and ecosystem analysis

**October 2026**
Border control use cases specifications

**April 2027**
Implementation and integration within EUDI Wallets

**September 2027**
Final Use Case Validation Report

# Thank You

ICAO
