INTERNATIONAL AVIATION FORUM (IAF) DECLARATION

The poster features the IAF logo at the top, followed by the title "DECLARATION Aviation4All". The main text describes the industry's impact and the forum's mission. A list of 10 principles follows, covering environmental, workplace, connectivity, safety, customer experience, and operational performance. Below the principles, a grid of logos represents various stakeholders, including airlines, airports, and industry associations.

DECLARATION Aviation4All

Over the last 110 years the commercial aviation industry has created millions of jobs transporting people and products to places around the world. Air transport supports global tourism and trade generating USD 1.4 trillion and USD 8.0 trillion dollars respectively for the global economy. An estimated 25% of the global population flies each year generating over 4 billion passenger journeys through a growing network of over 22,000 unique city pairs. With pharmaceutical, personalised healthcare and e-commerce growing in every region, air cargo is a significant enabler of growth in global welfare and prosperity. The International Aviation Forum (IAF) launches the concept of "Aviation4All" to enable sustainable growth and prosperity;

- Delivering on environmental commitments to provide a "net zero" industry
- Enhancing the workplace to establish an inclusive and diverse working environment, regardless of age, religion, gender, academic or physical ability or national origin
- Increasing connectivity to enhance global accessibility
- Working with governments to enhance safety and security to protect passengers, customers, and the workforce
- Integrating throughout the value chain to provide an improved customer and shipper experience, adopting seamless technology-based solutions
- Providing a customer centric culture
- Dedicated focus on improving operational performance to minimize service disruptions enhancing the joy of flying
- Delivering financial efficiencies to lower the barrier of access, so that a greater percentage of the global population can reap the benefits of domestic and international air travel
- Enhancing the overall positive impact that commercial aviation has on global society through increased opportunities for prosperity and cultural integration

The IAF welcomes the commitment of the following organisations, associations and corporate entities, to these principles as we collaboratively engage to deliver commercial aviation as an "Aviation4All" Industry.
