

WORKSHOP

New ICAO Obstacle Limitation Surfaces

Amendment 18 to Annex 14, Volume 1 — ICAO

Workshop on New OLS for the CAR Region

ICAO NACC Regional Office

Mexico City · August 17-18, 2026

Housekeeping

Punctuality

Participation

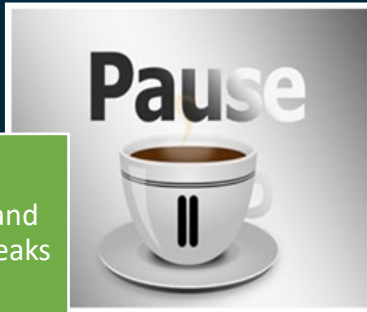

No smoking

Put cell phones on mute/vibrate

Coffee and lunch breaks

Networking

What are we going to achieve these two days?

DAY 1

Understand

What changed in the OLS and why. The new concept, in plain language.

DAY 2 · Morning

Apply

A practical exercise in groups on the analysis of the changes.

DAY 2 · Afternoon

Recommend

Build together applicable regional recommendations.

Amendment 18 comes into effect in November 2030. Preparing now is the region's advantage.

How we are going to work

1

On-screen content

Each topic is explained on the slide. We read it together, without haste.

2

Moments of discussion

When a BIG QUESTION appears on the screen, it's the room's turn. There's the real value.

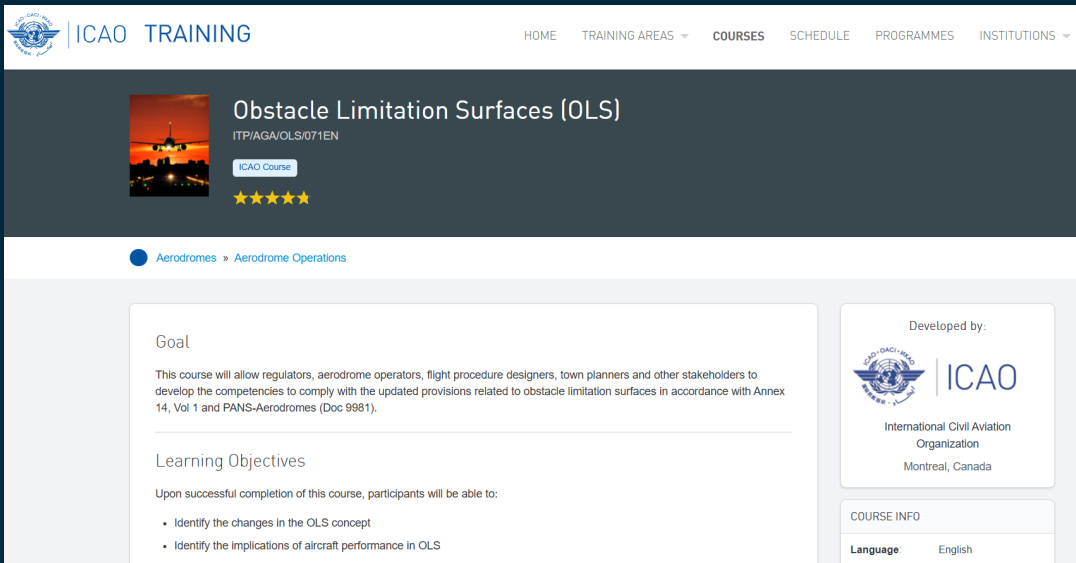

3

Your experience rules

No one knows your airports better than you. The workshop is built with their cases.

ICAO Specialized Course

- This workshop does not aim to prepare experts in new surfaces, but to understand their impact on our environment.
- In case more training is required (which may be part of the conclusions of this activity), ICAO has a specialized course on OLS.

The screenshot shows the ICAO Training website. The header includes the ICAO logo and the text "ICAO TRAINING". Navigation links include HOME, TRAINING AREAS, COURSES, SCHEDULE, PROGRAMMES, and INSTITUTIONS. The main content area features a course card for "Obstacle Limitation Surfaces (OLS)" with the reference "ITP/AGA/OLS/071EN" and a "5-star" rating. Below the card, a breadcrumb trail shows "Aerodromes > Aerodrome Operations". The course details section includes a "Goal" statement, "Learning Objectives", and a "Developed by:" section with the ICAO logo and text: "International Civil Aviation Organization, Montreal, Canada". A "COURSE INFO" table lists the "Language" as "English".
