GAPPAC

Led by the Flight Safety Foundation - Launched in March 2026

Major collaborative initiative - nearly 200 participants from more than 80 organisations: Regulators, aircraft operators, air navigation service providers (ANSPs), manufacturers, international organisations, and safety experts from around the world

The initiative builds on the success of the Global Action Plan for the Prevention of Runway Excursions (GAPPRE) and the Global Action Plan for the Prevention of Runway Incursions (GAPPRI)

Aligned with the Global Aviation Safety Plan (GASP) and the Global Air Navigation Plan (GANP)

Addresses emerging airborne conflict challenges associated with increasing traffic density, mixed airspace operations, evolving technologies, and growing demands on human performance.

Thank you!
