

AVIATION SECURITY WEEK

KIA

OCTOBER 2021

Aviation Security Week

Scope:

- Plan
- Activities
- Budget

Introduction

ACI Africa launches the Security Week 2021. The theme for this year's safety campaign is 'Promoting Security Culture at African Airports'.

Security is an absolute priority in the air transport sector. It is a real guarantee of confidence for passengers and contributes greatly to the ever-growing development of our business. If it is undermined, it can also mean the decline of the business, with very serious economic consequences. A strong and solid security culture is essential to prevent acts of unlawful interference with civil aviation.

Introduction

Due to the constant evolution and increasing sophistication of threats, mitigation measures must involve stakeholders from the entire civil aviation community. Whether they perform security or non security functions, and at all levels of their respective organizations, everyone plays an important role in ensuring that civil aviation security measures remain consistent and effective: Security is everyone's responsibility.

Objective

- To adopt an inclusive approach by involving all internal and external stakeholders whose activities impact on security directly or indirectly.
- To promote and improve our security culture by sharing experiences and knowledge.

Duration

One week, but this can vary from 1 to 5 days depending on the size of the airport, the volume of activities and the resources available.

KADCO Security Department recommend the KIA Aviation Security Week to be held (celebrated) for five days.

Celebration Dates

18th to 22nd October, 2021
