PBN Implementation for safety and efficiency enhancement in the AFI region-Requirements and status of PBN implementation

Albert Aidoo Taylor

RO- Air Traffic Management & Search and
Rescue; WACAF Regional Office

Malabo, 27 June – 1 July 2016

Presentation Outline

- ICAO Assembly Resolution
 - APIRG Conclusions
 - AFI PBN Plan and Timelines
 - Status of Implementation
 - AFI ANS Performance Indicators & Targets (PBN)
 - » Way Forward/AFPP

ICAO Assembly Resolution A 37-11 Performance-based navigation global goals

- Urges all States to implement RNAV and RNP air traffic services (ATS) routes and approach procedures in accordance with the ICAO PBN concept laid down in the Performance-based Navigation (PBN) Manual (Doc 9613)
- PBN Route Network Development Work-Group- 58 iFLEX tracks created to provide access to the Atlantic Ocean Random Routing Area
- The AFI ATS route lengths reduced by about 4797nm
- track mile reductions represent reduction of about 144 million metric tons of CO₂ emissions

- a) States complete a PBN implementation plan as a matter of urgency to achieve:
- 1) implementation of RNAV and RNP operations (where required) for en route and terminal areas according to established timelines and intermediate milestones;
- 2) implementation of approach procedures with vertical guidance (APV) (Baro-VNAV and/or augmented GNSS), including LNAV-only minima, **for all instrument runway ends**, either as the primary approach or as a back-up for precision approaches by 2016 with intermediate milestones as follows: 30 per cent by 2010, 70 per cent by 2014
- 3) implementation of straight-in LNAV-only procedures, as an exception to 2) above, for instrument runways at aerodromes where there is no local altimeter setting available and where there are no aircraft suitably equipped for APV operations with a maximum certificated take-off mass of 5 700 kg or more;

- **APIRG CONCLUSION 17/47: NATIONAL PBN IMPLEMENTATION PLAN**
- That States:
- (a) Use the Regional PBN implementation plan template to develop national PBN implementation plan
- (b) Provide feedback to the ESAF and WACAF Regional Offices by **30 October 2010** regarding progress in the development of their national plans, indicating any challenges, if any, that are delaying the development of the plan, as well as measures taken or to be taken to overcome such challenges.

CONCLUSION 17/54: PBN ENABLING LEGISLATION

- That, AFI States that have not already done so, include in their legislation and/or regulations provisions to enable the implementation of PBN.

CONCLUSION 17/55: PARTICIPATION OF REPRESENTATIVES OF STATES INVOLVED IN PBN APPROVAL PROCESS

- That, to support the PBN planning and implementation processes, AFI States include experts and officials involved in the PBN approval process of aircraft operators to meetings.

CONCLUSION 17/56: FUNDING OF THE PBN IMPLEMENTATION PROGRAMME

- That, regulatory bodies, operators, service providers and other stakeholders be **granted budgetary allocations** for acquisitions and other activities necessary for ensuring that all the requirements be met in a timely manner in order to safely implement PBN in the AFI Region.

- CONCLUSION 17/58: NATIONAL PBN PROGRAMME MANAGERS (NPPM)

That, to facilitate PBN implementation and Regional coordination:

- a) AFI States nominate/designate NPPMs as soon as possible and assign them the terms of reference and provide ICAO with contact details of the NPPMs;
- b) States update the NPPMs contact information provided to ICAO whenever changes have been made.

CONCLUSION 17/59: AIRSPACE PLANNING AND AIRCRAFT EQUIPMENT SURVEY

That, in order to facilitate airspace planning and decisions related to ANS infrastructure:

- a) ICAO coordinates with IATA and AFRAA conduct surveys on aircraft equipage
- b) AFI States and ANSPs to support the ICAO/IATA global survey on aircraft equipment
- c) AFI States make efforts to bring awareness to the aircraft operators; and
- d) AFI States ensure that initiatives for air navigation system enhancements are matched with fleets capabilities and readiness.

Air Navigation Services (ANS) Key Performance Indicators and Targets adopted by APIRG/20 Meeting

Implement ICAO Aviation System Block Upgrades (ASBUs)
Block-0 Modules by 2018

- **Establish and update national PBN plans by 2016**
- Implement all applicable elements of PBN by 2018
- **Implement Continuous Descent Operations /Continuous Climb Operations (CDO/CCO) by 2018**

- PBN reflects ICAO's 5 Strategic Objectives
 - **Safety**
 - **Efficiency and Capacity**
 - **Security**
 - **Economy**
 - **Environment**
- PBN is number ONE AN Priority

Australia turns to GNSS for primary navigation

- 179 ground-based navigation aids and associated non-precision approach procedures will be withdrawn from service this week. Australia earlier this year mandated the use of satellite navigation technology;
- The move on 26 May will see the Airservices Navigation Rationalisation Project switch-off 179 navigation aids, including non-directional beacons, VHF Omni-directional radio ranges and distance measuring equipment;
- **Australia's Civil Aviation Safety Authority also required from 4 February that instrument flight rules (IFR) aircraft use Global Navigation Satellite System (GNSS) technology as their primary means of navigation.**
- Airservices consulted extensively on the changes and in May issued three types of Notices to Airmen (NOTAMS) alerting operators to the progressive shutdown from 4am (AEST) on 26 May.

- The navaid information has been removed from Aeronautical Information Publications in the 26 May edition.
- Benefits of the switch to satellite navigation include a reduced requirement to use ground-based aids, greater operational flexibility, and reduced track miles, step-down and circling approaches, as well as reduced fuel burn and flight times.
- Airservices will monitor the remaining 213 navigation aids forming the **industry-selected Backup Navigation Network (BNN)** which will be available in the unlikely event a pilot is unable to access the satellite service.

Actions Required

States that have not already done so should as a matter of urgency, States:

- Complete and send approved national PBN implementation plan to the ICAO regional office by 15th September 2016;
- Initiate processes to include in their legislation and/or regulations provisions to enable the implementation of PBN;
- Conduct PBN awareness programmes among all stakeholders;
- Ensure regulatory bodies, operators, service providers and other stakeholders are granted budgetary allocations for acquisitions and other activities necessary for ensuring that all the requirements are met in a timely manner in order to safely implement PBN in the AFI Region;
- Ensure that all PBN procedures are approved and published; and
- Contact the AFPP and ICAO Regional Offices as necessary to ensure implementation of PBN without further delay;
