DECARBONIZATION GOALS

Industry Commitment From 2021

- Improve fuel-efficiency by an average of 2% per year - 2020 to 2030
- Carbon-neutral growth after 2020
- Reduction in total carbon dioxide emissions to net-zero by 2050

Gulfstream

- Reduce CO₂ emissions 40% by 2034, relative to 2019

AIRCRAFT

Our next-generation fleet leads the industry, with fuel-efficiency gains as much as 33% over predecessor models.¹

OPERATIONS

We have reduced operational emissions by 18% while growing our facilities more than 30%.²

FUEL

Gulfstream was the first business jet OEM to fly on 100% SAF.

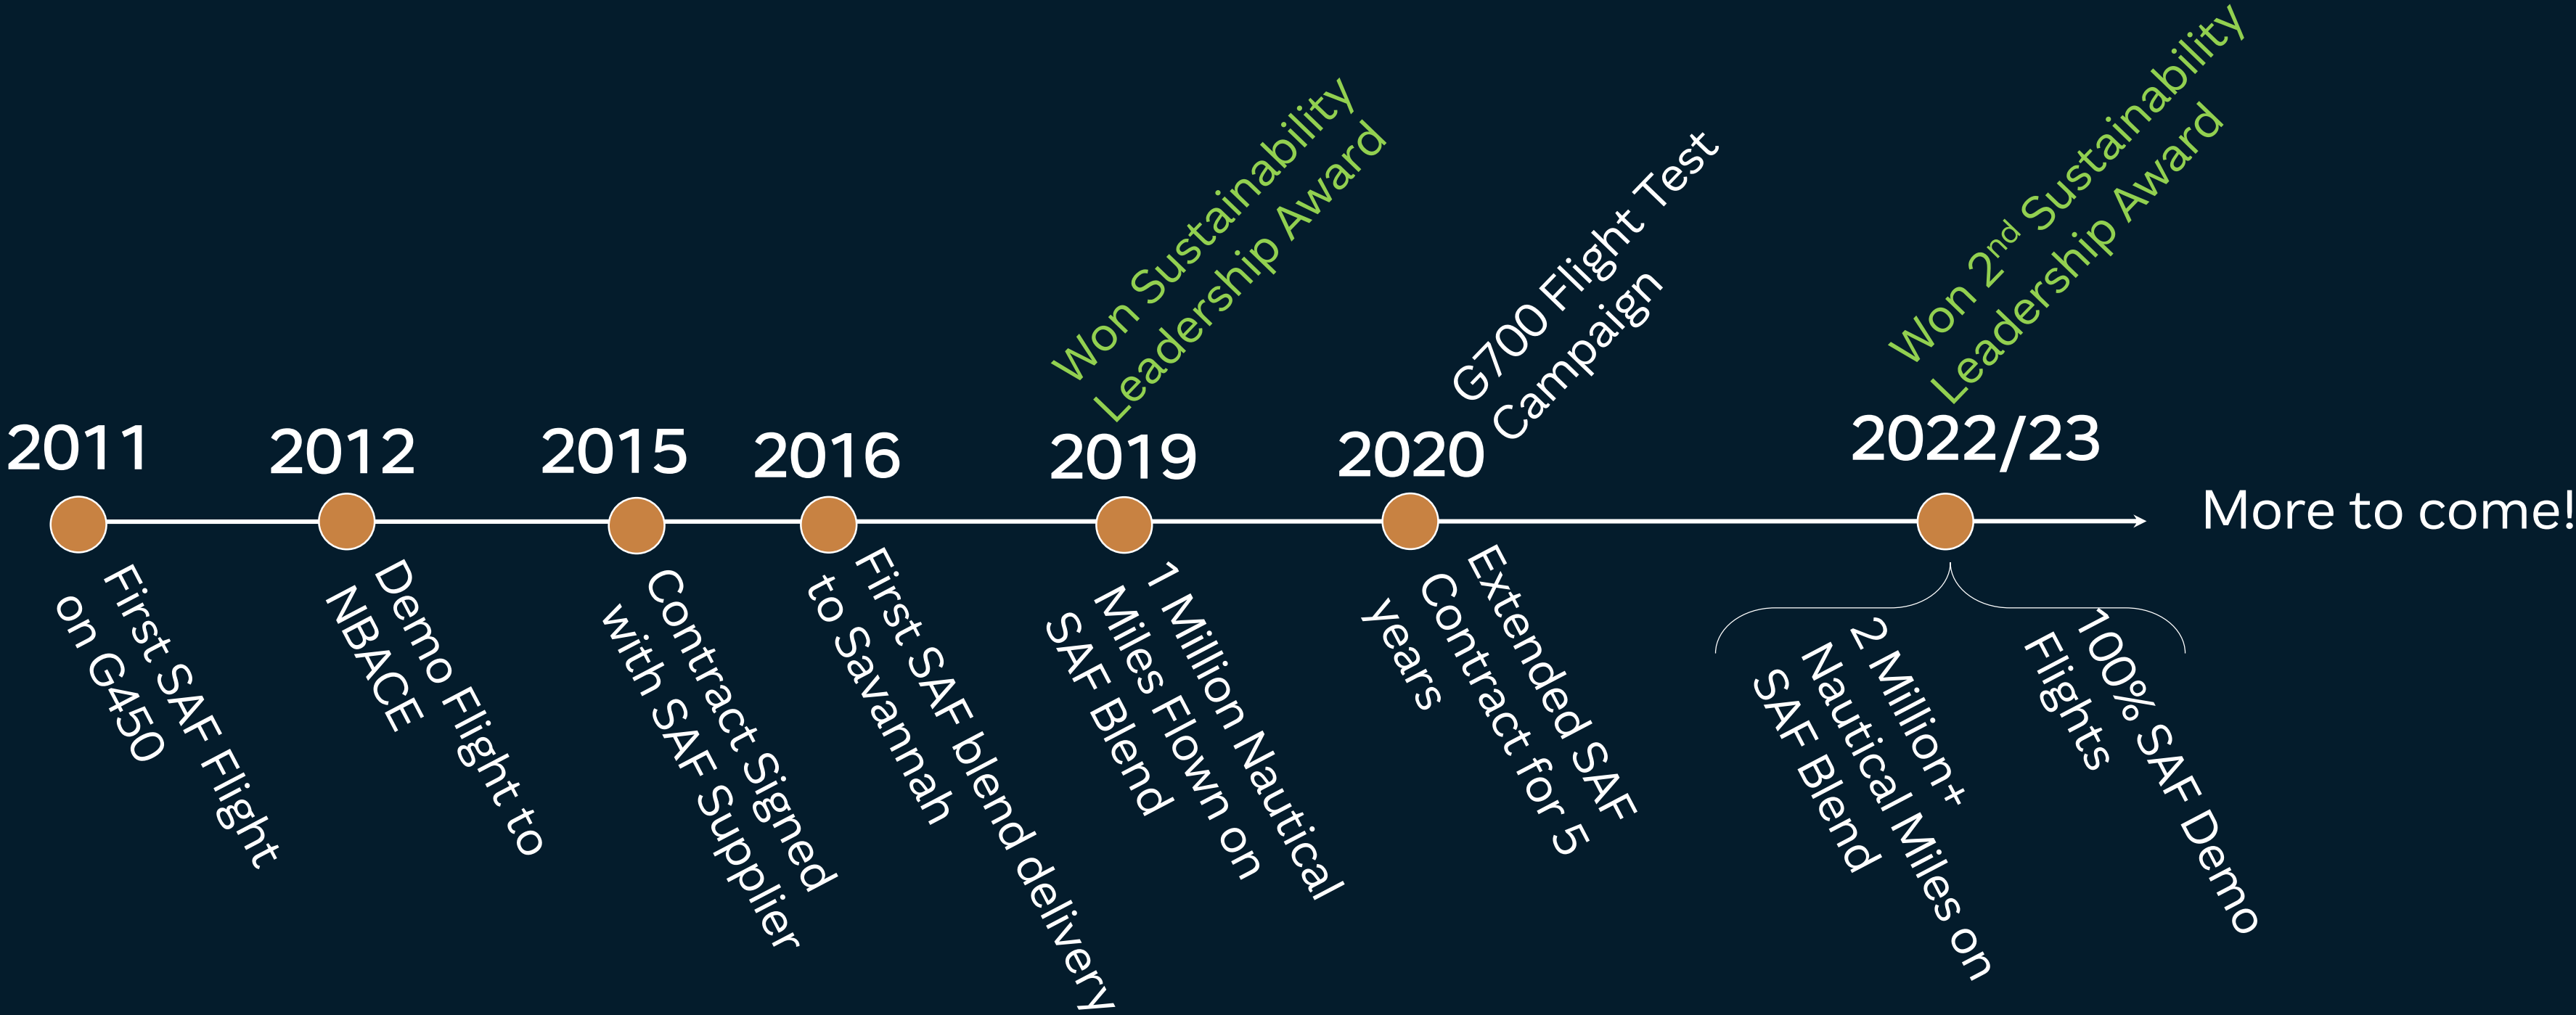

SUSTAINABLE FLIGHT DEPARTMENT

Gulfstream is the first and only OEM to receive accreditation for its own flight department of the NBAA Sustainable Flight Department in all four available categories :

- Flight
- Operations
- Ground Support
- Infrastructure

GULFSTREAM'S SAF JOURNEY

SAF Will Play a Key Role to Decarbonizing Aviation

SUSTAINABILITY IS A JOURNEY

Sustainability is the responsibility for every flight department on every single flight

Thank You
