Critical Factors for SAF Development

1. Policy and Planning

- **Coherent** and predictable national policies
- **Collaboration** across stakeholders
- **Integrate** SAF and LCAF into ICAO State Action Plan
- **Assess** feedstock and production potential

2. Regulatory Framework

- **Pursue sustainable** and diversified feedstock
- **Align** with CORSIA sustainability criteria and life cycle emissions methodology
- **Ensure** environmental integrity
- **Recognize** fuels certified by ICAO-approved SCS

3. Implementation Support

- **Facilitate partnerships**
- Support **access** to technology
- **Exchange** best practices and lessons learned
- **Define** priorities for capacity-building under ICAO ACT-SAF Programme
- **Raise** awareness
- **Support** pilot projects

4. Financing

- **Encourage** long-term offtake agreements and risk-sharing guarantees
- **Engage** development banks and climate finance institutions
- **Foster** investor engagement through ICAO Finvest Hub
- **Facilitate** project de-risking and bankability
- **Advocate** for investment

How to become a CORSIA-approved Sustainability Certification Scheme (SCS)?

APPLY

- Between 1 February – 15 March
- Application form available on the ICAO Website
- Must submit System Documents demonstrating compliance with ICAO requirements

Evaluation

- By ICAO CAEP Sustainability Certification Schemes Evaluation Group (SCSEG)

Recommendation

- SCSEG provides recommendations for the ICAO Council's approval
