ICAO Priorities/Challenges for Aviation Decarbonization

COP31 TÜRKİYE ANTALYA | ICAO ENVIRONMENT

Scale up SAF, LCAF and cleaner energies under the harmonized ICAO framework

- Ongoing efforts to **scale up supply and accelerate** production pathways, feedstocks, life cycle assessment (LCA), and sustainability certification.
- **ICAO's CORSIA framework provides the accepted basis** for the eligibility of aviation cleaner energies.
- **ICAO ACT-SAF and Finvest Hub** to facilitate project support and financing.

CORSIA as the only global market-based measure for international aviation

- Expand **State participation** to increase environmental integrity.
- Accelerate issuance of **Host Country Attestation** (**Letter of Authorization)** to facilitate access and availability of CORSIA Eligible Emissions Units.
- Concerns **against overlapping market-based measures**, including aviation taxation.

CORSIA

Implement comprehensive LTAG Monitoring and Reporting methodology

- ICAO Tracker Tools
- ICAO State Action Plans
- Annual stocktaking, i.e., ICAO Aviation Climate Week
- ICAO CAAF/4 and Assembly in 2028
