AVIATION SECURITY PROFESSIONAL MANAGEMENT COURSE

ABOUT THE COURSE

From shifting global relationships to fast-changing regulatory demands, aviation leaders must face every challenge head-on. The Aviation Security Professional Management course prepares you to navigate this evolving landscape with confidence. Designed in partnership with the International Civil Aviation Organization (ICAO), you'll build and expand aviation security and management capabilities while connecting with experienced professionals.

WHO SHOULD ATTEND

- Government employees involved in aviation security policy or operations
- Civil aviation industry managers seeking to enhance their security management skills
- Other industry stakeholders engaged in aviation security functions
- Professionals aiming to bridge the gap between aviation security expertise and management competencies

OFFERED ONLINE OR IN PERSON

This intensive 12-week course can be taken online or in person. The course combines two weeks of classroom time and 10 weeks of self-paced learning.

ADMISSION REQUIREMENTS

- Minimum of two years of experience in the aviation field
- Current or prospective managerial responsibilities in aviation security
- Demonstrated interest in enhancing managerial skills related to airport security
