SAFETY

e-Library of Final Reports

The e-Library is at the following link on the ICAO AIG-website:

<https://applications.icao.int/e5web/default.asp>

Currently the e-Library contains approximately 1200 Final Reports. A large number of Final Reports will be added to the e-Library as paper format reports are being scanned.

Please do not hesitate to provide your comments to: AIGInbox@icao.int

ICAO

SAFETY

e-Library of Final Reports

The e-Library is based on the ECCAIRS 5 software. The accident/incident (occurrence) records are used for querying the e-Library and the Final Report of the selected occurrence is an attachment to the occurrence record.

All the Final Reports available in the e-Library were submitted to ICAO by States. The Final Reports may appear in any of the ICAO official languages.

ICAO

SAFETY

e-Library of Final Reports

The e-Library opening page, as illustrated on the next slide, contains four standard queries:

- aircraft make/model
- date
- State of registry
- State/Area of occurrence

To run one of the standard queries click a “Run” icon in the right-hand column.

To count the number of records found by a query, click the “Count” icon.

To run an advanced query hover the pointer over the “Query” icon and click “Query by example” when it appears.

Query Library: Final Queries

Total Queries: 4

ICAO

SAFETY

Aircraft make/model query

The aircraft make/model query will open a selection screen as follows:

Make/mdl/srs -- Webpage Dialog

Attribute: 24;4
Aircraft
Make/mdl/srs

21

Layout: Value

Operator: equal to

Values

☒ Ask later

OK Cancel

Click on the arrow head to select an aircraft make/model

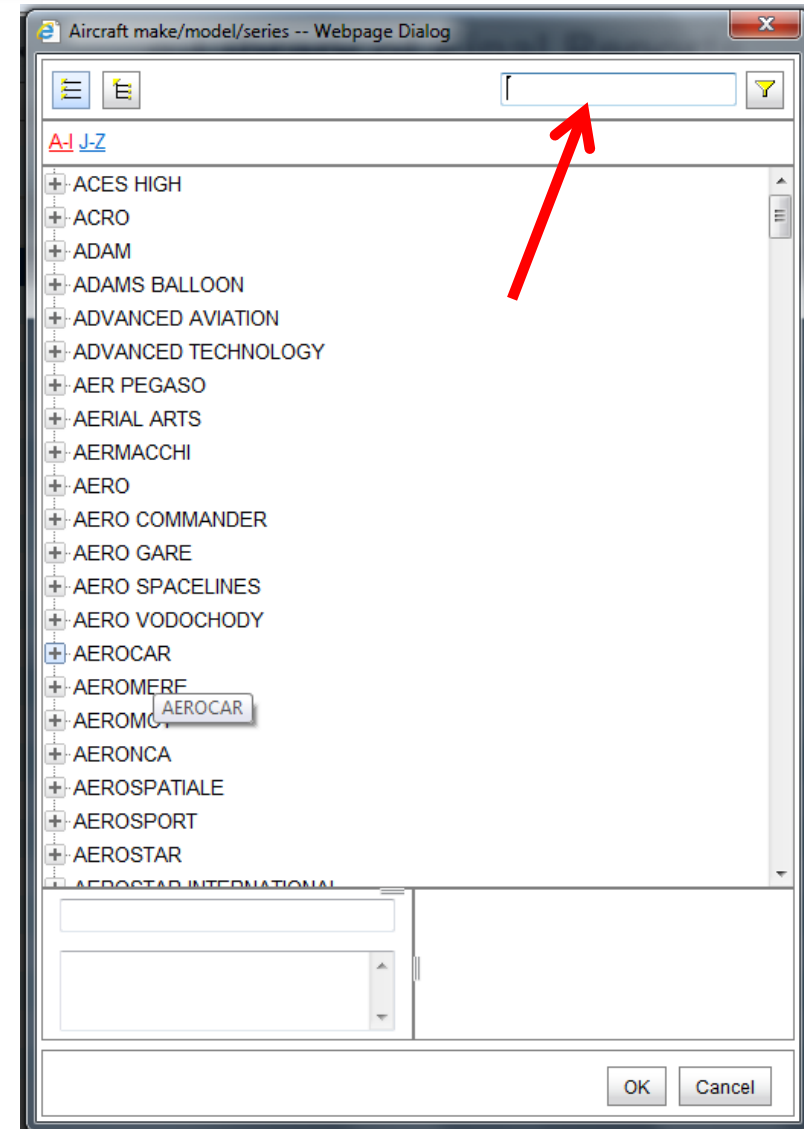

ICAO

SAFETY

Aircraft make/model query

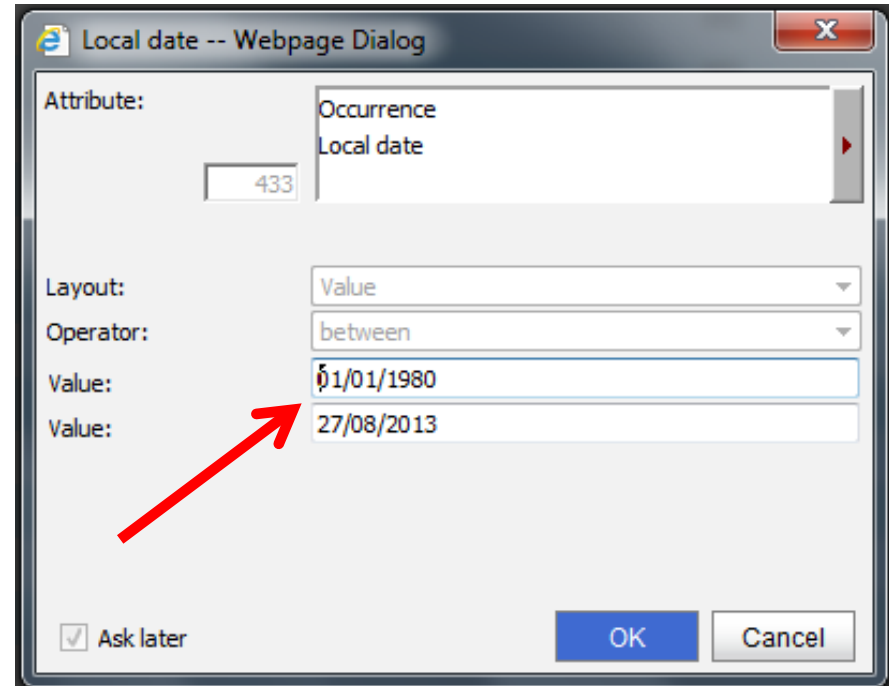

The aircraft make/model selection screen is as follows:

A search function is available by typing an aircraft make in the search box in the upper right corner, for example “Boeing”.

Date query

The date query will open a selection screen as follows:

Local date -- Webpage Dialog

Attribute: Occurrence
Local date

433

Layout: Value

Operator: between

Value: 01/01/1980

Value: 27/08/2013

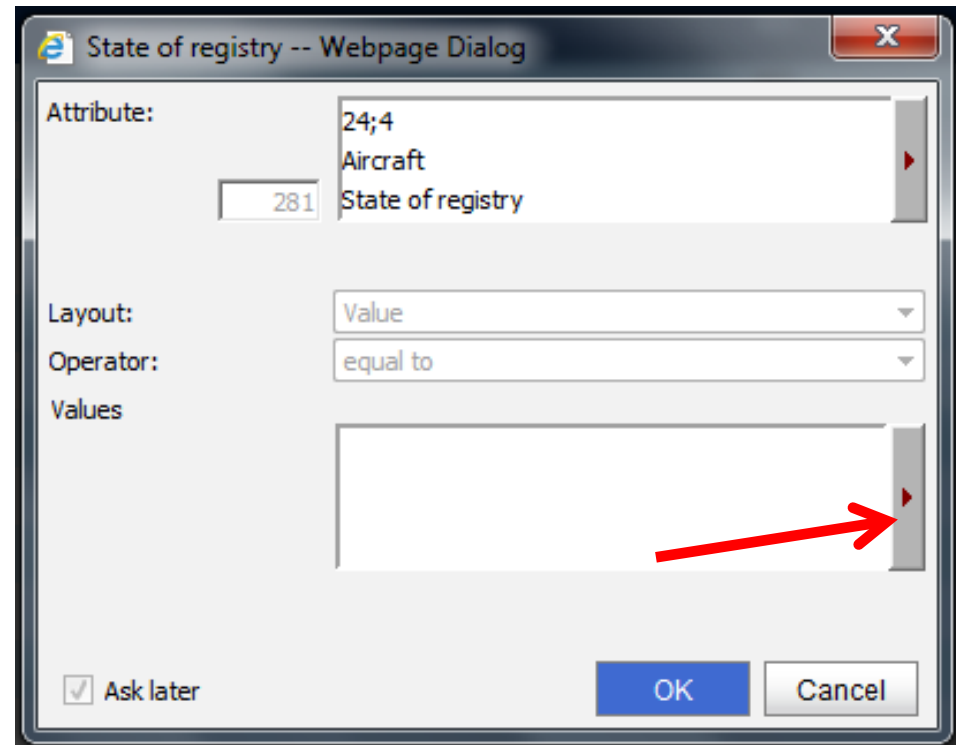

☒ Ask later

OK Cancel

The dates required for the query needs to be entered in the value boxes (example dates are displayed).

State of registry query

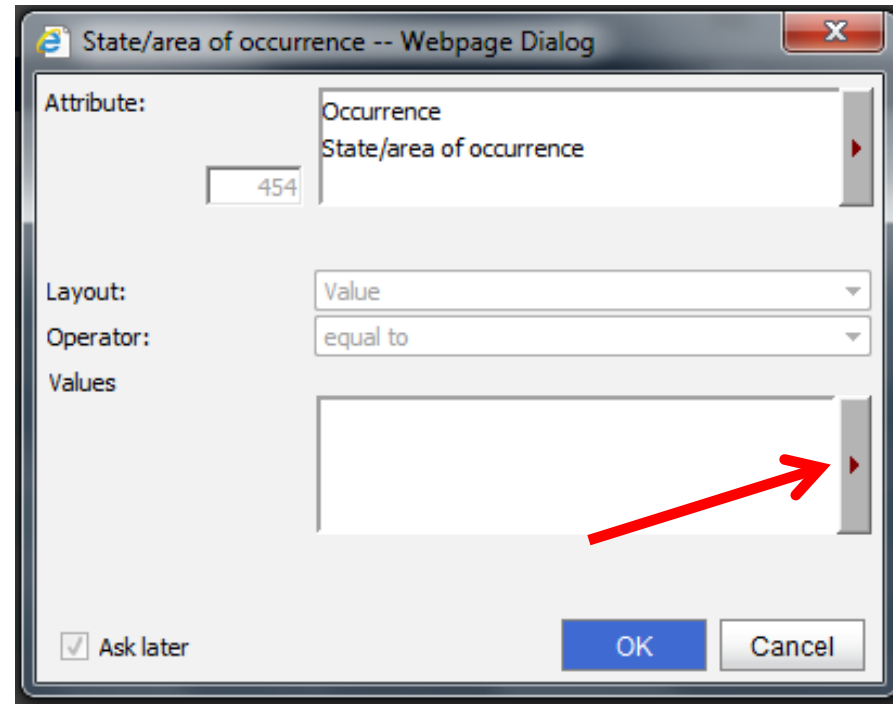

The State of registry query will open a selection screen as follows:

Click on the arrow head to select a State of Registry from the selection screen

State/Area of occurrence

The State/Area of occurrence query will open a selection screen as follows:

State/area of occurrence -- Webpage Dialog

Attribute: Occurrence
State/area of occurrence

454

Layout: Value

Operator: equal to

Values

☒ Ask later

OK Cancel

Click on the arrow head to select a State/Area of occurrence from the selection screen

Enhanced Query

The “Query by example” option provides for advanced queries. The query by example options will be displayed as illustrated on the next slide.

- Any of the options may be entered similar to the standard query options. Note only one or multiple attributes may be entered.
- The “Narrative text (Word)” search provides for a word search in the narrative of the occurrence record, *not in the Final Report*. Please note that the narratives in occurrence records could be in a different language than English. Thus, during a word search, if the word is entered in English, the records where this word appears in another language will not appear in the query results.

Query results

Once the query is executed, the query results screen will be displayed as illustrated on next slide.

- The query executed will appear in text format below the query bar.
- A list of all records found by the query will be displayed. To access the Final Report of a specific record, click on the magnifying glass icon on the left.
- In the lower right-hand corner the number of occurrence records found is displayed.
- To exit back to the standard query screen hover over the “Query▼” icon in the left-hand upper area of the screen and click on “Show queries” when it appears.

Final Report selection

Selecting a Final Report related to a chosen record will display a Final Report screen (illustrated on the next slide).

- To open the Final Report, click on the file name under the heading “Report” and the Final Report will open. If two file names appear, it is an indication that the Final Report exists in two language versions in the database. For example, the file name with an “en” before the .pdf is the English version and with an “fr” before the .pdf is the French version.
- To return to the query results screen, click “Last Query Results” in the lower right-hand corner.
- To exit back to the query screen, click on “Query ▼” in the left-hand upper area of the screen.
