

ICAO Action

With respect to this safety recommendation concerning inclusion of requirements for paved blast pads in Annex 14 — *Aerodromes*, Volume I — *Aerodrome Design and Operations*, it is envisaged that the Air Navigation Commission will refer the subject to the Aerodromes Panel for further study, taking into account the guidance material on the treatment of shoulders and blast pads already existing in the ICAO *Aerodrome Design Manual*, Part 2 – *Taxiways, Aprons and Holding Bays* (Doc 9157).
