

ICAO Action (SR 004/2015)

The installation of equipment for visual recordings inside and outside the cockpit is related to the carriage of airborne image recorders and was referred to the Flight Recorder Specific Working Group (FLIRECSWG) for consideration in their ninth meeting held during May 2016. The recommendations of the FLIRECSWG will be presented to the ANC in October 2016.

Further Action

Amendements 43, 36 and 22 of Annex 6, Parts I, II and III, respectively, were adopted by the ICAO Council on 7 March 2018 with embedded applicability date of 1 January 2023, containing provisions for image recordings by FLIRECSWG. The adopted provisions were for flight crew-machine interface recordings of information displayed to the flight crew and the operation of switches and selectors. The intent is to exclude recorded images with a full cockpit view, which would include the flight crew.
