

ICAO Action (SR 006/2015)

The ad-hoc working group (AH-WG) on aircraft tracking developed a concept of operations (CONOPS) for the Global Aeronautical Distress and Safety System (GADSS) and finalized the CONOPS in March 2016. The High-Level Safety Conference 2015 called upon ICAO to lead the conduct of a normal aircraft tracking implementation initiative (NATII). The NATII was established to provide input for the development of guidance material to support the implementation of aircraft tracking provisions. The ICAO global tracking initiatives and ongoing work related to the GADSS may be followed on the ICAO website at: <http://www.icao.int/safety/globaltracking>.

Further Action

Referencing the ICAO global tracking initiatives website at <http://icao.int/safety/globaltracking>, updates are provided to surveillance information to determine the requirement for aircraft tracking and the aircraft tracking information database.
