

Action

The contributing factors leading to the recommendations, as mentioned in the report, require standardization in Annex 14, and the implications thereof would need to be studied in detail by visual aids experts before proposing any amendments to Annex 14 — *Aerodromes*, Volume I — *Aerodrome Design and Operations*. The Visual Aids Working Group (VAWG), which is a specialized working group of the Aerodrome Design and Operations Panel (ADOP), will review the recommendations for appropriate advice and action.
